Management David R. Patton, 2011-06-27 Across the continental United States one can identify 20 distinct forest cover
types Most of these are to be found on federal lands managed by the U S Forest Service and Bureau of Land Management
Those responsible for the management of trees that form the 20 different cover types and the diversity of forest wildlife that
reside in them must have a solid grounding in concepts of forest management especially silviculture as well as concepts of
wildlife management in order to integrate both as part of any effective natural resource management plan Forest Wildlife
Ecology and Habitat Management provides both foresters and wildlife biologists responsible for managing forest resources
with an integrated understanding of the relationship between forests and wildlife Based on David Patton s 50 years of
experience as a forester and wildlife biologist the book shows readers how to look at forests as ecological systems and
wildlife as part of the energy flow and nutrient cycling process within those systems He offers readers a fundamental
understanding of the natural processes that occur in a forest taking into consideration vegetation water and the natural
effects of climate and time He then provides a biological perspective on wildlife discussing reproduction behavior feeding
habits and mobility He also discusses the various influences on forests and wildlife by both natural and human caused events
Covering those forest types included in the U S National Atlas and associating over 1 100 wildlife species with 20 major
forest types in 48 states Professor Patton provides recommendations for ways to restore and maintain wildlife habitat by
direct and indirect coordination Towards this end the author Evaluates various approaches to integrate forestry and wildlife
management Offers a number of practical management strategies emphasizing a progressive holistic approach Presents the
FAAWN Forest Attributes and Wildlife Needs data model A CD ROM is included that provides readers with easy to use
software that will help them consider more than 63 000 potential associations among forest components and wildlife within

with landscape and how cycling and creativity are connected Taking a journey through the places that have shaped him we
ride across wild moorland through suburbia and city streets into quintessentially English pastoral scenes We see too some of
the darker parts of the British countryside sites of great secrecy that intrigue the imagination This is a book about how
