H Kauffman

Gammas Girl:

'Girl Power' Dawn Currie, Deirdre M. Kelly, Shauna Pomerantz, 2009 Girl Power Girls Reinventing Girlhood examines the identity practices of girls who have grown up in the context of girl power culture The book asks whether and which girls have benefited from this feminist inspired movement Can girls truly become anything they want as suggested by those who claim that the traditional mandate of femininity compliance to male interests is a thing of the past To address such questions the authors distinguish between girlhood as a cultural ideal and girls as the embodied agents through which girlhood becomes a social accomplishment The book identifies significant issues for parents and teachers of girls and offers suggestions for critical social literacy as a classroom practice that recognizes the ways popular culture mediates young people s understanding of gender Girl Power will be of interest to researchers of contemporary gender identities as well as educational professionals and adult girl advocates It is relevant for students in gender studies and teacher education courses as well as graduate student researchers

Gamma Ed Bankson, 2023-08-22 Fifty light years away from our planet and just under fifty years ago two rogue black holes collided The epic cosmological merger resulted in the creation of the most powerful force in the universe a gamma ray burst Releasing more energy in a few seconds than our own sun will in its entire ten billion year life span it fired away from the center of the newly formed black hole at the speed of light headed for Earth With only six months until its arrival no one is aware that all life is soon to be irradiated out of existence No one that is except for an amazingly gifted ten year old girl with a mild form of autism and her deceased twin brother Gamma Jean Proctor along with her brother Ray learned before his death that they possessed special abilities that enabled the twins to enter the world of subatomic particles by using the strength of their minds In this quantum world as they came to call it they were able to discover the impending doom that was fast approaching Earth and even began to devise a way to manipulate particles in that world in a way that could possibly divert the gamma ray burst Unfortunately Gamma s brother along with their father died in a tragic car accident before the twins could finalize their plan With time running out Gamma with the help of her dead brother who she was able to communicate with reached out with their special abilities to enlist the help of three strangers who possessed their own unique gifts It was hoped that the three strangers with training from the ten year old girl might be able to replace her lost brother in the twins plan to save all of humanity Noted psychiatrist John Tate movie star Jessie Mortenson and Princeton doctoral student Beta Whittmore were summoned to the home of Gamma Proctor by a revelation that was imparted to them in a way that they could perceive because of their uniqueness With the four gathered they quickly formed a tight bond as they undertook the seemingly impossible task of learning to act as one in the quantum world a task they would have to quickly master if humanity had any chance for survival
