Popular Music, Critique and Manic Street Preachers Mathijs Peters, 2020-07-29 This book explores the ways in which popular music can criticise political social and economic structures through the lens of alternate rock band Manic Street Preachers Unlike most recent work on popular music Peters concentrates largely on lyrical content to defend the provocative claim that the Welsh band pushes the critical message shaped in their lyrics to the forefront Their music this suggests along with sleeve art body art video clips clothes interviews and performances serves to emphasise this critical message and the primary role played by the band's lyrics Blending the disciplines of popular music studies culture studies and philosophy Peters confronts the ideas of German philosopher and social critic Theodor W Adorno with the entire catalogue of Manic Street Preachers from their 1988 single Suicide Alley to their 2018 album Resistance is Futile Although Adorno argues that popular music is unable to resist the standardising machinery of consumption culture Peters paradoxically uses his ideas to show that Manic Street Preachers releases shape critical models with which to formulate social and political critique This notion of the critical model enables Peters to argue that the catalogue of Manic Street Preachers critically addresses a wide range of themes from totalitarianism to Holocaust representation postmodern temporality to Europeanism and from Nietzsche's ideas about self overcoming to reflections on digimodernism and post truth politics The book therefore persuasively shows that Manic Street Preacher lyrics constitute an intertextual network of links between diverse cultural and political phenomena encouraging listeners to critically reflect on the structures that shape our lives The United States and the People's Republic of China United States. Committee on International Relations, 1978 **From Revolutionary Cadres to Party Technocrats in Socialist China** Hong Yung Lee, 2024-06-04 Using a wide variety of previously unavailable sources Hong Yung Lee offers a theoretical and historical perspective on China's ruling elite examining their politics and the bureaucratic system in which they participate. He traces the evolution of these cadres from the guerrilla fighters who first joined the communist movement and founded the new regime in 1949 to the technocratic specialists who wield power today. In the revolution communist leaders built a peasant-based party organization whose members were largely recruited from uneducated poor peasants and hired laborers. Even after they became the founders of a new regime their rural orientation and revolutionary experiences continued to affect the political process. Lee shows how the requirements of modernization compelled the state to replace the revolutionary cadres with bureaucratic technocrats. Selected from the postliberation generation the new leaders are more committed to problem solving than to socialism. Despite uncertainties in the immediate future this elite transformation signifies an end to modern China's revolutionary era. Lee argues that it seems only a matter of time before China will have a bureaucratic authoritarian regime led by technocrats possessing a managerial perspective and a pragmatic economic orientation. Single Stage to Orbit Andrew J. Butrica, 2004-12-01 Winner of the Michael C. Robinson Prize for Historical Analysis given by the National Council on Public History. While the glories and tragedies of the space shuttle make headlines and move the nation, the story of the shuttle forms an inseparable part of a lesser-known but no less important drama: the search for a reusable single stage to orbit rocket. Here an award-winning student of space science, Andrew J. Butrica, examines the long and tangled history of this ambitious concept from its first glimmerings in the 1920s when technicians dismissed it as unfeasible to its highly expensive heyday in the midst of the Cold War when conservative-backed government programs struggled to produce an operational flight vehicle. Butrica finds a blending of far-sighted engineering and heavy-handed politics. To the first and oldest idea—that of the reusable rocket-powered single stage to orbit vehicle—planners who belonged to what President Eisenhower referred to as the military-industrial complex added experimental X-1 aircraft-like capabilities and eventually a faster, cheaper, smaller managerial approach. **Single Stage to Orbit** traces the interplay of technology, corporate interest, and politics, a combination that well served the conservative space agenda and ultimately triumphed not in the realization of inexpensive, reliable space transport but in a vision of space militarization and commercialization that would appear settled United States policy in the early twenty-first century.

Artistic and Intellectual Practices in Contemporary China Carol Yinghua Lu, 2025-01-20 This edited volume is the first internationally available English translation of key lectures and essays delivered at Beijing's Inside Out Art Museum over the past decade.

The book elevates a chorus of voices from domestic and international intellectuals artists curators and historians in a dialogue that reframes Chinese art from 1949 to the present Part I offers critical academic complications of the story of Chinese art from the 1950s to the present as one singularly defined and stifled by political revolution It traces important continuities and early examples of contemporary art practice to the Party s birth and consolidation of power from the 1920s onwards It relates the formation of contemporary art to the historical course of intellectual practice in China from 1949 Part II proposes China as an issue requiring historical interrogation rather than an inviolable entity It questions the efficacy of Asia as a term presents case studies of independent publishers that challenged tightly crafted historical narratives and wraps up with incisive reflections on the challenges confronting creatives and historians in China today With chapters ranging from peer reviewed scholarship to cuttingly humorous personal anecdotes its contributing authors give rare first hand accounts of navigating pertinent historical and current situations including censorship China s ill liberalism and COVID 19 This book offers readers an ear to heretofore closed door conversations in leading modern and contemporary art spaces

Music as Mao's Weapon Lei X. Ouyang, 2022-01-25 A Choice Outstanding Academic Title for 2022 China s Cultural Revolution 1966 1976 produced propaganda music that still stirs unease and at times evokes nostalgia Lei X Ouyang uses selections from revolutionary songbooks to untangle the complex interactions between memory trauma and generational imprinting among those who survived the period of extremes Interviews combine with ethnographic fieldwork and surveys to explore both the Cultural Revolution s effect on those who lived through it as children and contemporary remembrance of the music created to serve the Maoist regime As Ouyang shows the weaponization of music served an ideological revolution but also revolutionized the senses She examines essential questions raised by this phenomenon including What did the revolutionization look sound and feel like What does it take for individuals and groups to engage with such music And what is the impact of such an experience over time Perceptive and provocative *Music as Mao s Weapon* is an insightful look at the exploitation and manipulation of the arts under authoritarianism

China's Reforms and Reformers Alfred K. Ho, 2004-04-30 Ever since the death of Mao China has undergone a transformation almost as radical as the Communist Revolution that Mao instigated This book tells the stories of the many difficult economic political and social struggles that have taken place in post Maoist China Using both Chinese and non Chinese sources Alfred K Ho unravels the complexities of life in China during the past generation As Ho explains contemporary Chinese are seeking to find solutions to their problems that reflect their own cultural values As such reform in China cannot be seen solely as an effort to emulate the West especially the free market and democratic United States Rather Ho places current efforts at reform as part of a prolonged and continual process by Chinese to deal with their internal problems as well as the challenges and opportunities they face as a result of greater contact with the outside world
