**Village** Mobo C. F. Gao,2007-07-31 Gao Village in Jiangxi province is where the author was born and raised His account is in every sense one from the inside Although written as an academic work it does not eschew personal stories and experiences relevant to the themes addressed the village before and after land reform the commune system the dismantling of the communes and the unfolding impact of the market economy including growing villager migratory patterns toward urban areas from the late 1980s onward *Gao Village Revisited* Mobo C F Gao,2019-01-30 The personal stories of the Gao villagers demonstrate and are related to changes in China This is a close study of Gao Village twenty years after the author an anthropologist and native of Gao village wrote his original ethnography Gao Village It combines ethnographic analysis personal vignettes and a number of fascinating stories which presents a convincing yet complex picture of how Gao villagers interact with the outside world With his sympathetic and insider s approach the author argues that rural Chinese display great entrepreneurship and inner strength of selfimprovement they are active contributors to China s economic boom

*The World of Soy* Christine M. Du Bois,Chee Beng Tan,Sidney Wilfred Mintz,2008 **Radicalism, Revolution, and Reform in Modern China** Catherine Lynch,Robert B. Marks,Paul G. Pickowicz,2011-03-31 This volume illuminates the relationship of China s radical past to its reformist present as China makes a way forward through very differently conceived and contested visions of the future In the context of early twenty first century problems and the failures of global capitalism is China s history of revolutionary socialism an aberration that is soon to be forgotten or can it serve as a resource for creating a more fully human and radically democratic China with implications for all of us Ranging from the early years of China s revolutionary twentieth century to the present the essays collected here look at the past and present of China with a view toward better understanding the ideas ideals and people who have dared to imagine radical transformation of their worlds and to assess the conceptual political and social limitations of these visions and their implementations The volume s chapters focus on these issues from a range of vantage points representing a spectrum of current scholarship The first half of the book brings new insights to understanding how early twentieth century intellectuals interpreted ideas that allowed them to break with China s past and to envision new paths to a modern future It treats of Chen Duxiu a founder of the Communist party Mao Zedong and Mao in relation to the non Communist Liang Shuming and with the Dalai Lama With continuing threads of nation and nationalities of peasants utopias and dystopias linking the chapters the book s second half looks broadly at the consequences of the implementations of radical ideas at the same time critiquing our accepted frameworks of analysis Moving up to the present the book investigates the effects of the reforms since the 1980s on long term

environmental degradation and on the emergence of a capitalist rural economy It gives an unsparing view into contemporary rural China through independent films The book concludes with an analysis of the unshakable persistence of the shibboleth the rise of China in popul Redeveloping China's Villages in the Twenty-First Century Lior Rosenberg, 2024-01-16

Implementing national policies is a crucial function of the local Chinese bureaucracy and an indispensable part of Beijing's overall state capacity Yet the specifics of how and why local officials interpret and implement such policies have so far escaped detailed attention In Redeveloping China's Villages in the Twenty First Century Lior Rosenberg fills this gap by examining the national Village Redevelopment Program one of China's most significant policies of recent decades to promote rural change Based on Rosenberg's on site research Redeveloping China's Villages in the Twenty First Century investigates the Village Redevelopment Program's implementation in both the industrialised county of Chenggu in Shandong province and the predominantly agricultural county of Beian in Anhui province At the book's heart is a puzzle the program was supposed to prioritise poorer villages but in both Chenggu and Beian despite being carried out in surprisingly divergent ways it has subsidised improved infrastructure and services in already industrialised and prosperous villages while leaving behind poorer ones In explaining this outcome Rosenberg elaborates on the larger economic political and social environment in which Chinese local officials operate as well as the pressures they face from above He analyses the dual role played by higher level authorities as both policy enablers and thwarts in a system that sanctifies commandism but where the distinction between principals and agents is blurred Rural Women in Urban China Tamara Jacka, 2014-12-18 Based on in depth

ethnographic research and using an approach that seeks to understand how migration is experienced by the migrants themselves this is a fascinating study of the experiences of women in rural China who joined the vast migration to Beijing and other cities at the end of the twentieth century It focuses on the experiences of rural urban migrants the particular ways in which they talk about those experiences and how those experiences affect their sense of identity Through first hand accounts of actual migrant workers the author provides valuable insights into how rural women negotiate rural urban experiences how they respond to migration and life in the city and how that experience shapes their world view values and relations with others The book makes a major contribution to our understanding of the relationship between gender and social change and of the ways in which globalization and modernity are experienced at the most personal level **Modern Chinese Religion**

**II: 1850 - 2015 (2 vols.)** , 2015-10-20 The last of four two volume sets on the key periods of paradigm shift in Chinese religious and cultural history this book examines the transformation of values in China since 1850 in the secular realms of economics science medicine aesthetics media and gender and in each of the major religions Confucianism Buddhism Daoism Christianity as well as in Marxist discourse The nation and science are the values invoked most frequently with the market and democracy a distant second As in previous periods of fundamental change in Chinese history rationalization and secularization have played central roles but interiorization nearly disappears as a driving force Also in continuity with the

past the state insists on an exclusive right to define and adjudicate orthodoxy Contributors include Daniel H Bays S bastien Billioud Adam Yuet Chau Na Chen Philip Clart Walter B Davis Arif Dirlik Thomas David DuBois Lizhu Fan David Faure Melissa Wei Tsing Inouye Ji Zhe Xiaofei Kang Eric I Karchmer Andr Lalibert Angela Ki Che Leung Xun Liu Richard Madsen David Ownby Ellen Oxfeld Volker Scheid Grace Yen Shen Michael Szonyi Wang Chien ch uan Xue Yu *Organizing Rural China — Rural China Organizing* Ane Bislev, Stig Thogersen, 2012-04-05 During the early 1980s China embarked on what can be seen as one of the world s largest social experiments ever Decollectivization meant much more than the reorganization of agricultural production into family based farming It signaled significant changes to rural social relations when privatization marketization and increased geographical mobility started tearing apart the economic and social institutions that had structured collective village life under Mao The focus of this book is on how rural society has been reorganized in the 21st century The first chapters outline the basic organizational structure of rural China and can be used as an introduction to the topic in a classroom setting They show how the state and its social scientists draw up plans to overcome the perceived lack of rural social organization and discuss the often problem ridden implementation of their ideas The second section presents case studies of institutions that organize key aspects of rural life Boarding schools where rural children learn to accept organizational hierarchies lineage organizations carving out new roles for themselves dragonhead enterprises expected to organize agricultural production and support rural development and several others The book is of theoretical interest because of its focus on the re embedding or reintegration of individuals into new types of collectivities which are less predetermined by tradition and habit and more a matter of at least perceived individual choice Most chapters are based on extensive fieldwork and contain vivid examples from daily life which will make the book attractive to anyone who wants to understand how Chinese villagers experience the extraordinary social changes they are going through **Village China Under Socialism and Reform** Huaiyin Li, 2009-03-12 Village China Under Socialism and Reform offers a comprehensive account of rural life after the communist revolution detailing villager involvement in political campaigns since the 1950s agricultural production under the collective system family farming and non agricultural economy in the reform and everyday life in the family and community Li s rich examination draws on original documents from local agricultural collectives newly accessible government archives and his own fieldwork in Qin village of Jiangsu province to highlight the continuities in rural transformation Firmly disagreeing with those who claim that recent developments in rural China represent a radical break with pre reform sociopolitical practices and patterns of production Li instead draws a clear history connecting the current situation to ecological social and institutional changes that have persisted from the collective era Peri-Urban China Li Tian, Yan Guo, 2019-04-02 The urban rural relationship in China is key to a sustainable global future This book is particularly interested in peri urbanization in China the process by which fringe areas of cities develop Recent institutional change has helped clarify property rights over collective land facilitating peri urban area development Chapters in this book explore how

rural industrialization has changed the landscape and rules about land use in peri urban areas It looks at the role of rural industrialization and provides a detailed exploration of peri urbanization theory policy and its evolution in China Leading discussions find out how fragmented bottom up industrialization urbanization and lax governance have led to a series of social and environmental problems The progress in redevelopment of peri urban areas was initially slow due to the spatial lock in effect This book offers practical solutions to environmental issues and explains how policymakers have the potential to redevelop a future collaborative inclusive and sustainable approach to peri urban areas This in depth approach to urbanization will be useful to academics in urban planning and governmental organizations It will also be advantageous to NGOs and professionals involved in urban planning public administration as well as land use work in China and other developing countries

**Migration in the 21st Century** Pauline Gardiner Barber, Winnie Lem, 2012-08-21 This edited collection focuses on global migration in its inter regional international and transnational variants and argues that contemporary migration scholarship is significantly advanced both within anthropology and beyond it when ethnography is theoretically engaged to grapple with the social consequences and asymmetries of twenty first century capitalism s global modalities Drawn from settings across the globe case studies explore the nuanced formations of class and power within particular migration flows while addressing the complex analytics of a contemporary critical political economy of migration Subjects include global migrants as capitalists entrepreneurs and cosmopolitans as well as workers and immigrants who are subject to varying degrees of precariousness under intensified competition for profits within contemporary global economies By re addressing the question of the relationship between changes in global capitalism and migration the book aims for a timely intervention into the debates on migration which have come to be one of the most contentious emotionally fraught issues in North America and Europe

**China Briefing 2000** Tyrene White, 2000 Reflections on China s 20th century transformation Contributors explore developments over the 1997 1999 period and place them in a wider historical perspective by examining where China has travelled what has changed and how much the century s enduring themes and prospects for the future The chapters in this latest edition of China Briefing reflect broadly on China s transformation in the twentieth century The authors not only examine developments in China over the 1997 1999 period but also place these events in a wider historical perspective by addressing the following questions Where has China traveled over the course of the century To what extent has it been transformed and how What are the enduring themes or points of continuity even during a century of great change and transformation And what are China s prospects for the future

**Eating Bitterness** Kimberley Ens Manning, Felix Wemheuer, 2011-01-01 When the Chinese Communist Party assumed power Mao Zedong declared that not even one person shall die of hunger A little over a decade later China was in the midst of the most devastating famine in modern history Between 1957 and 1962 the years commonly associated with Mao s Great Leap Forward some 30 million peasants died of starvation and exhaustion Rather than exploring why party leaders stumbled so

badly in their attempts to modernize China the contributors to this landmark collection draw on newly available sources to show how men and women in rural and urban settings experienced the changes during this period *Eating Bitterness* lifts the curtain of officially propagated images of mass mobilization to expose the uneven and deeply contested nature of state society relations in Maoist China It also illuminates the role that history writing and memory have played in shaping narratives of the recent past

**Rise of the Red Engineers** Joel Andreas, 2009-03-10 *Rise of the Red Engineers* explains the tumultuous origins of the class of technocratic officials who rule China today In a fascinating account author Joel Andreas chronicles how two mutually hostile groups the poorly educated peasant revolutionaries who seized power in 1949 and China's old educated elite coalesced to form a new dominant class After dispossessing the country's propertied classes Mao and the Communist Party took radical measures to eliminate class distinctions based on education aggravating antagonisms between the new political and old cultural elites Ultimately however Mao's attacks on both groups during the Cultural Revolution spurred inter elite unity paving the way after his death for the consolidation of a new class that combined their political and cultural resources This story is told through a case study of Tsinghua University which as China's premier school of technology was at the epicenter of these conflicts and became the party's preferred training

ground for technocrats including many of China's current leaders      The Changing Face of China John Gittings, 2006-07-06  
Where is China heading in the 21st century Can its Communist Party survive or is it being challenged by growing inequality and unrest Will the US and China cooperate or compete in a dangerous future Will China's economic boom be brought to a halt by environmental catastrophe In this highly readable account John Gittings provides the essential information to help answer these vital questions for the world In the 60 years since Mao Zedong took the road to victory China has undergone not one but two revolutions The first swept away the old corrupt society and sought to build a spotless new socialism behind closed doors the second since Mao's death has focused on an economic agenda which accepts the goals of global capitalism From Mao to the global market Gittings charts this complex but epic tale and concludes with some hard questions for the future
