and economic growth into development that would gradually become more sustainable Topothesia Ameeth Vijay, 2023-05-02 SHORTLISTED 2024 MSA FIRST BOOK PRIZE Topothesia reads urban planning as a mode of speculative fiction one inextricably linked to histories of British colonialism and liberalism through a particular understanding of place The book focuses on town planning from the late nineteenth century to the present day showing how the contemporary geography of Britain sharply unequal and marked by racial division continues ideologies of place established in colonial contexts Specifically planning allows for the speculative construction of future places that are both utopian in their ability to resolve political disagreement and at the same tantalizingly realizable able to be produced in concrete reality This speculative imaginary I argue is only possible within the ideological framework of colonialism and the history of empire within which it developed Topothesia refers to a rhetorical device employing the vivid depiction of an often imaginary place This device Vijay shows helps us understand urban planning as a narrative genre one that even in its most mundane documents is compelled to produce elaborate fantasies of future places The book examines specific planning movements over time to understand the form and the stakes of their speculative worlds In building these worlds the book shows planners continually coopted literary critiques of the present and reveries of the future retaining literature's aesthetics while eschewing its politics At the same time Vijay shows writers and artists have dwelled within and against these colonial imaginaries to seek other means of representing place Managing America's Cities Roger L. Kemp, 2014-01-10 This work describes the operations of a typical municipal government and examines the many productivity trends that are occurring in city halls across America Much of the focus is on the increasing need for planning in city government to ensure that productivity goals are met It thoroughly examines the roles of the council manager and clerk in promoting increased productivity It then looks at such municipal departments as legal finance fire human services library police and public works demonstrating proven techniques and structures in each that improve service Instructors considering this book for use in a course may request an examination copy here **Towards A Liveable And Sustainable Urban Environment: Eco-cities In East Asia** Liang Fook Lye, Gang Chen, 2010-06-17 With cities rapidly encroaching onto surrounding lands the notion of eco city proposes an innovative yet pragmatic approach to designing building and operating cities in a way that the destructive impact of human urban activity upon nature will be significantly reduced This book comprises of papers from a workshop organized by the East Asian Institute on Eco cities in East Asia on 27 February 2009 in Singapore Contributed by scholars officials and environmental specialists from Japan China Malaysia Indonesia Thailand and the Philippines the papers focus on how individual governments in these countries undertake eco city projects The book also highlights best practices that are useful to policy makers and anyone else who seeks to learn from the experiences of other countries in order to reduce their ecological footprints **Architectural Record**, 1998-04 Developing Living Cities Kallidaikurichi Seetharam, Belinda K. Joga, Iwan Ismaun, 2011 On the needs of greenbelts in the city planning in Indonesia Emotional Cities Joseph Ben Prestel, 2017 Emotional Cities offers an innovative account of the history of cities in the second half of the nineteenth century Analyzing debates about emotions and urban change it questions the assumed dissimilarity of the history of European and Middle Eastern cities during this period The author shows that between 1860 and 1910 contemporaries in both Berlin and Cairo began to negotiate the transformation of the urban realm in terms of emotions Looking at the ways in which a variety of urban dwellers from psychologists to bar maids framed recent changes in terms of their effect on love honor or disgust the book reveals striking parallels between the histories of the two cities By combining urban history and the history of emotions Prestel proposes a new perspective on the emergence of different yet comparable cities at the end of the nineteenth century
