Edward Elgar Christopher Grogan, 2020-12-02 The first full length study of the English composer's complex interaction with his physical environment and its new relevance in the 21st century More perhaps than any other composer Edward Elgar 1857-1934 has gained the status of an icon of locality his music seemingly inextricably linked to the English landscape in which he worked This the first full length study of Elgar's complex interaction with his physical environment explores how it is that such associations are formed and whether it is in any sense true that Elgar alchemized landscape into music It argues that Elgar stands at the apex of an English tradition going back to Blake in which creative artists in all media have identified and warned against the self harm of environmental degradation and that following a period in which these ideas were swept away by the swift but

shallow tide of Modernism in the decades after the First World War they have since resurfaced with a new relevance and urgency for twenty first century society Written with the non specialist in mind yet drawing on the rich resources of post millennial scholarship on Elgar as well as geographical studies of place the book also includes many new insights relating to such aspects of Elgar s output as his use of landscape typology in The Apostles and his encounter with Modernism in the late chamber music It also calls on the resources of contemporary social commentary poetry and especially English landscape art to place Elgar and his thought in the broader cultural milieu of his time A survey of recent recordings is included in the hope that listeners both familiar and unfamiliar with Elgar s music will feel inspired to embark on a voyage of re discovery of its endlessly rewarding treasures

Handbook of Research on Creative Cities and Advanced Models for Knowledge-Based Urban Development

Galaby, Aly Abdel Razek, Abdrabo, Amal Adel, 2020-10-09 Discussing global society entails discussing the predominant characteristics of knowledge based activities in all walks of life. Its main characteristics are based on creativity, innovation, freedom, and networking. The emergence of such a society poses several challenges to all disciplines of social sciences. Within such a context, sociologists must have practical encounters to the theoretical, methodological, and empirical challenges imposed within contemporary global society. In this vein, studying creative cities from an interdisciplinary perspective helps provide critical readings of the phenomenon and the different levels of the concept in reality. The Handbook of Research on Creative Cities and Advanced Models for Knowledge Based Urban Development provides global models and best practices of creative cities worldwide and illustrates different theoretical blueprints for the better understanding of contemporary global society. While defining key concepts of creative cities, global society, and creative class, the book also clarifies the main differences between hubs, parks, and precincts and their contributions to knowledge based development. Covering topics that include knowledge economy, social inclusion, and urban mobility, this comprehensive reference is ideal for sociologists, urban planners, designers, political scientists, economists, anthropologists, historians, policymakers, researchers, academicians, and students.

Understanding Urban Cycling Justin Spinney, 2020-10-28 Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling, the necessity for cycle specific infrastructure, and the embodied experiences of cycling. Based upon primary research in a variety of contexts such as London, Shanghai, and Taipei, this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation. It argues that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and bio political conduct which only results in solutions that prioritise those who are already mobile. Accordingly, the central argument of the book is not that the popularisation of cycling is inherently bad, but that the manner in which cycling is being popularised gives cause for social and environmental concern. Ultimately, the book argues that cycling has now become a vehicle for sustaining pro growth agendas rather than subverting them or shifting to sustainable, no growth, de growth, and less technologically driven visions of modernity. This book makes an innovative contribution to the fields of Cycling Studies, Mobilities, and Transport, and will be of interest to students and academics working in Human Geography, Transport Studies, Urban Studies, Urban Planning, Public Policy, Sociology, and Sustainability.
