

# The Public Policy Process For Elite Approach

- In the elite explanation of the policy process, the active elites are subject to very little direct influence from the mass or even from the understructure of governmental officials. The mass is politically apathetic and impotent and this large proportion of the population passively accepts whatever policies are imposed upon them. The members of the understructure follow the elite's directives because they believe that their survival in positions of authority depends on the power and support of the elite. 9

Marketing Public Policy Basskaran Nair, 2018-02-21 Policy analysts and policy planners should start from the premise that obstacles uncertainties and surprises are important features of policy making All public policies should be treated as complex problems from the outset Complexity theorists start from the premise that complex policies are ill defined and ambiguous There is often little consensus about what the problem is let alone how to resolve it Into the complexity of the wicked problem fray Marketing Public Policy introduces the role of communication scholars and practitioners whose models and practices focus on people processes opinions and behaviour as causes of organisational complexity Communication practice s role is to provide ideas on how to navigate diagnose and interpret issues with a view to persuading the public to change its behaviour or opinions From the case studies presented in this book we see that despite rationally excellent macro and micro planning of policies to win the hearts and minds of citizens public policies still deteriorate into hurts and minefields The case studies are drawn from China Indonesia India the USA the UK and Europe to show that policy making is always a complex issue in any country whatever the political structure whether democracy or communism      *Political Economy of Malaysia's Industrial Policy* Firdausi Suffian, 2021-02-22 This book examines the national automotive policy in Malaysia to help readers gain an understanding of the country s industrial policy making processes Addressing a gap in analysis of the political economy of the national automotive policy the research presented combines the new institutional theory and the developmental state approach to provide new insights into elite policymakers measures to shield domestic automotive enterprises from pro market reforms The formation of the national car project marks a turning point for Malaysia s industrial development as a country which it envisions will lead to it becoming a major player in the global automotive market However the domestic institutional factors embedded in ethno economic interests and patronage constrain national car makers limiting their potential to grow and instead causing a slowdown in the industry Allowing readers to understand the background to Malaysia s heavy industrialisation programme and the birth of its national car projects this book critically discusses the significance of institutional context in policy outcomes and highlights how institutions and policies have impact
