[The Poetics of Natural History](#) Christoph Irmscher, 2019-09-08 Winner of the 2000 American Studies Network Prize and the Literature and Language Award from the Association of American Publishers Inc Early American naturalists assembled dazzling collections of native flora and fauna from John Bartram s botanical garden in Philadelphia and the artful display of animals in Charles Willson Peale s museum to P T Barnum s American Museum infamously characterized by Henry James as halls of humbug Yet physical collections were only one of the myriad ways that these naturalists captured catalogued and commemorated America s rich biodiversity They also turned to writing and art from John Edward Holbrook s forays into the fascinating world of herpetology to John James Audubon s masterful portraits of American birds In this groundbreaking now classic book Christoph Irmscher argues that early American natural historians developed a distinctly poetic sensibility that allowed them to imagine themselves as part of and not apart from their environment He also demonstrates what happens to such inclusiveness in the hands of Harvard scientist turned Amazonian explorer Louis Agassiz whose racist pseudoscience

appalled his student William James This expanded full color edition of *The Poetics of Natural History* features a preface and art from award winning artist Rosamond Purcell and invites the reader to be fully immersed in an era when the boundaries between literature art and science became fluid

Viewpoints in Biography Katherine Tappert, 1921 **"Keep the Damned Women Out"** Nancy Weiss Malkiel, 2018-05-29 A groundbreaking history of how elite colleges and universities in America and Britain finally went coed As the tumultuous decade of the 1960s ended a number of very traditional very conservative highly prestigious colleges and universities in the United States and the United Kingdom decided to go coed seemingly all at once in a remarkably brief span of time Coeducation met with fierce resistance As one alumnus put it in a letter to his alma mater Keep the damned women out Focusing on the complexities of institutional decision making this book tells the story of this momentous era in higher education revealing how coeducation was achieved not by organized efforts of women activists but through strategic decisions made by powerful men In America Ivy League schools like Harvard Yale Princeton and Dartmouth began to admit women in Britain several of the men s colleges at Cambridge and Oxford did the same What prompted such fundamental change How was coeducation accomplished in the face of such strong opposition How well was it implemented Nancy Weiss Malkiel explains that elite institutions embarked on coeducation not as a moral imperative but as a self interested means of maintaining a first rate applicant pool She explores the challenges of planning for the academic and non academic lives of newly admitted women and shows how with the exception of Mary Ingraham Bunting at Radcliffe every decision maker leading the charge for coeducation was male Drawing on unprecedented archival research *Keep the Damned Women Out* is a breathtaking work of scholarship that is certain to be the definitive book on the subject

Meyers, 2012-11-08 In 1908 a remarkable direction in community learning began in Boston and spread across the country becoming the Open Forum lecture movement These locally planned trans denominational lectures followed by periods for questions were characterized as the striking of mind upon mind This study recovers the movement and shows what can be applied to our time George W Coleman brought a deep commitment to free speech in developing the Forum and Mary Caroline Crawford was essential in implementing it Understanding this initiative broadens our awareness of personal and community courage and democratic planning We can regain this informed reflective respectful approach and achieve an America to be a democracy in the making

Entangled Knowledge Klaus Hock, Gesa Mackenthun, 2012 The

intimate relationship between global European expansion since the early modern period and the concurrent beginnings of the scientific revolution has long been acknowledged. The contributions in this volume approach the entanglement of science and cultural encounters many of them in colonial settings from a variety of perspectives. Historical and historiographical survey essays sketch a transcultural history of knowledge and conduct a critical dialogue between the recent academic fields of Postcolonial Studies and Science; a series of case studies explores the topos of Europe's great inventions, the scientific exploitation of culturally unfamiliar people and objects, the representation of indigenous cultures in discourses of geographical exploration as well as non-European scientific practices. *Entangled Knowledges* also refers to the critical practices of scholarship; various essays investigate scholarship's own failures in self-reflexivity arising from an uncritical appropriation of cultural stereotypes and colonial myths of which the discourse of Orientalism in historiography and residual racist assumptions in modern genetics serve as examples. The volume thus contributes to the study of cultural and colonial relations as well as to the history of science and scholarship.
