,1983 **The Economics of Defense Industry** Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis

Switzerland and South Africa 1948-1994 Georg Kreis,2007 While other states imposed economic sanctions on the apartheid regime of South Africa Swiss authorities long adhered to the position that South Africa is a state like any other Swiss big business corporations saw an attractive trade partner in South Africa in part they also profited from the boycotts of others Additionally some political forces sympathised openly with the regime in Pretoria Encouraged by the debate concerning Swiss policy and activity during the Second World War in 1997 the order was given to initiate a historical study of Swiss behaviour towards the apartheid regime Thus this report commissioned by the Swiss parliament and the Federal Council and passed over to the Swiss National Science Foundation for execution came into being It unites the results of ten

different research projects The report identifies the most important players involved in fashioning relations with South Africa it explains the legal situation in which these persons acted and it describes the thought processes that led to the actions The longest chapter deals with the attitudes and the areas of activity in the economic sector Here the trade with loans gold diamonds and war materials is paramount Other chapters are concerned with questions that are not primarily economic in nature such as political declarations the illusion of being in the role of a mediator contacts in sports and culture and after 1986 the beginning of support for the black majority U.S. Military Involvement in Southern Africa, 1978 Book contains selected contributions to a meeting of ACAS scholars Amherst Massachusetts April 1978 *Congressional Record* United States.
