Supper at Emmaus Glenn W. Olsen,2016 Supper at Emmaus traces various important intellectual topics from the ancient world to the modern period Generally as in its treatment of the question of whether the long standing contrast between cyclical and linear views of history is helpful it introduces important thinkers who have considered the question A preoccupation of the book is the appearance and reappearance across the centuries of patterns used to organize temporal and cultural experience After an opening essay on transcendental truth and cultural relativism the second chapter traces a distinction common in historical writings during the past two centuries between an alleged ancient classical cyclic view of time and history used to describe the claimed repetitiveness of and similarities between historical events nothing is new under the sun and a contrasting Jewish Christian linear view sometimes described as providential in that it moves through a series of unique events to some end intended by God In the latter history is about something the education of the human race or the redemption of humankind As in each of the remaining essays the book then attempts to draw out the limitations of what the current consensus on this topic has become It does this for such things as our current understanding of religious toleration humanism natural law and teleology Some of the essays such as those on debate about Augustine s understanding of marriage or the concluding illustrated essay on the baroque city of Lecce are published for the first time Others are based on previously published contributions to the scholarly literature though generally each of these chapters concludes with a postscript that engages with current scholarly debate on the subject

eventually with bipedalism and which created an imbalance between the larger proprioceptive field and its brain and made the atrophied body extend itself technically in geometric fields gradually covering the planet along with its fears with disastrous consequences that are unleashing an unprecedented type of mass extinction and species suicide The reply to this crisis which is urgently due if we are to reduce even slightly the collapse coming up over the next decades is in recovering a lost sensorimotor plasticity which is also cognitive affective and relational plasticity through developing movement techne for cultivating Body Intelligence BI reversing and taking elsewhere the failed evolution culminating in AI stepping down from humanist supremacist pedestals undoing our dependency upon unsustainable killing machines of sedentary consumerism that impoverish experience stopping the reproduction of a species that has become plague by reversing heteronormative reproductive dogmas till we reach preagricultural population levels and recovering the joys of moving with the world in symbiotic mutation towards unprecedented evolutionary variations this is our cosmic responsibility for all life on Earth The book's structure expresses Enfranchisement Theory with regard to how processes of becoming have a triple movement an incipency unfolding the field Part I a condensation expansion where the field acquires full consistency Part II and a resonance or memory of the field relating to other fields Part III Part II subtitled Revolution Technologies includes Books 4 5 and 6 and is by far the longest volume elaborating in depth the book's proposals in a triple movement It first exposes the technologies of variation in nature Book 4 followed by the technologies of reduction in the Algoricene Book 5 and finally the possibilities for overcoming the reductive fold Book 6 Book 4 proposes a swarming chaomology as theory of orgiastic evolution culminating in the concept of metabiosis life as indeterminate symbiotic mutation Book 5 diagnoses the regimes that have formatted movement and presents the theory of the Algoricene or Age of Extinctions and Algorithms It exposes a kinetic ontology genealogy and dynamics of power An interlude discusses post trans and metahumanism and a second part of the book unfolds a radical critique of the Planetary Holocaust Book 6 unfolds metaformance aesthetics and metahuman politics including the theory of metaformativity the ontotacking pragmatics and a choral Dionysian ontology where the author also discusses at length his own techniques and art projects involving a radical challenge to human supremacism to face the extinction challenge now threatening all life on Earth toward an Earth liberation and regeneration **Black**

history comparative religion and other scholarly disciplines Moreover they show that a central concern of humanists of all races is preservation and promotion of what humanist philosopher Paul Kurtz calls the common moral decencies shared by most religious and ethical systems At a time when faith based organizations are favored politically especially within the black community this timely collection of essays shows that humanism with its emphasis on reason free inquiry moral decency and justice offers much to the challenges facing African Americans
