Embryos Ethics And Womens Rights Exploring The New Reproductive Technologies:

Embryos, Ethics, and Women's Rights, 1987 *Embryos, Ethics and Women's Rights*, 1988 **The Other Machine**

Dion Farquhar, 2014-04-23 With technological advances in reproduction no longer confined to the laboratory or involving only the isolated individual women and men are increasingly resorting to a variety of technologies unheard of a few decades ago to assist them in becoming parents The public at large and feminists as a group are confused and divided over how to view these technologies and over what positions to take on the moral and legal dilemmas they give rise to Farquhar argues that two perspectives have tended to dominate feminist discussions of these issues She labels these fundamental feminism and market liberalism By linking a theoretical approach with a practical set of issues Farquhar's *The Other Machine* provides a rigorous analysis of contemporary feminist debates Issues in Reproductive Technology Helen B. Holmes, 1994-08 A remarkable collection of scholarly essays philosophical discussions and ethical arguments concerning reproductive choices Choice It seems as if every week there is a new case involving reproductive technologies that raises provocative often painful questions What policies should be followed by centers that preserve human embryos Are such innovations as Norplant improvements over established methods of contraception Should RU 486 be available in the U S Is prenatal diagnosis an ethically acceptable step to limiting the number of disabled people These are just some of the vital questions explored in this timely work which offers incisive analysis of the plethora of issues raised by advances in reproductive medicine The book's major sections cover abortion contraception cryopreservation of gametes and embryos surrogate motherhood and psychosocial issues of in vitro fertilization In each section introductory essays by recognized authorities such as Elizabeth Bartholet and Andrea L. Bonnickson are followed by critical articles by professionals in such fields as women's health medicine biology sociology politics and philosophy In assessing a technology the authors present well argued analyses of problems created by that technology including views from advocates and practitioners that raise attendant ethical and practical issues *Living the Changes* Joan Turner, 1990-12-01 *Living the Changes* explores the nature and extent of women's changing realities The contributors include writers artists academics street kids and social workers and range in age from nine to seventy three Their topics reflect the diversity and complexity of the concerns of contemporary women birthing and aging body image culture drugs violence sexual abuse prostitution reproductive technology and spirituality *Posthuman Bodies* Judith M. Halberstam, Ira Livingston, 1995-12-22 will draw a wide readership from the ranks of literary critics film scholars science studies scholars and the growing legion of literature and science researchers It should be among the essentials in a posthumanist toolbox Richard Doyle Automatic teller machines castrati lesbians *The Terminator* all participate in the profound technological representation sexual and theoretical changes in which bodies are implicated *Posthuman Bodies* addresses new interfaces between humans and technology that are radically altering the experience of our own and others bodies **Assessing Genetic Risks** Institute of Medicine, Committee on Assessing Genetic Risks, 1994-02-01 Raising

hopes for disease treatment and prevention but also the specter of discrimination and designer genes genetic testing is potentially one of the most socially explosive developments of our time This book presents a current assessment of this rapidly evolving field offering principles for actions and research and recommendations on key issues in genetic testing and screening Advantages of early genetic knowledge are balanced with issues associated with such knowledge availability of treatment privacy and discrimination personal decision making public health objectives cost and more Among the important issues covered Quality control in genetic testing Appropriate roles for public agencies private health practitioners and laboratories Value neutral education and counseling for persons considering testing Use of test results in insurance employment and other settings *Feminist Cultural Studies of Science and Technology* Maureen McNeil, 2008-01-15

Feminist Cultural Studies of Science and Technology challenges the assumption that science is simply what scientists do say or write it shows the multiple and dispersed makings of science and technology in everyday life and popular culture This first major guide and review of the new field of feminist cultural studies of science and technology provides readers with an accessible introduction to its theories and methods Documenting and analyzing the recent explosion of research which has appeared under the rubric of cultural studies of science and technology it examines the distinctive features of the cultural turn in science studies and traces the contribution feminist scholarship has made to this development Interrogating the theoretical and methodological features it evaluates the significance of this distinctive body of research in the context of concern about public attitudes to science and contentious debates about public understanding of and engagement with science

Women and Social Policy Mary Kember, Clare Ungerson, 1997-09-19 It is ten years since the first edition of this well established text was published The second edition contains an almost entirely new selection of readings to bring the publication up to date and to develop themes that are likely to remain topical into the late 1990s and beyond Where possible and relevant much of the material has a comparative particularly European perspective The book is an essential text for students and teachers of social policy and women s studies

Applications of Feminist Legal Theory to Women's Lives D. Kelly Weisberg, Ronnie J Steinberg, 2009 This book the second of two volumes examines the pressing issues that affect women pornography prostitution battery rape pay equity sexual harassment motherhood abortion adoption new reproductive technologies and considers them through the lens of feminist legal theory It features more than sixty articles by well known legal scholars and feminists The contributions are arranged thematically and include an introduction and comprehensive literature review by the editor *Applications of Feminist Legal Theory to Women's Lives* will be a valuable text for students a resource for scholars and policy makers and a useful introduction for general readers

Brown Bodies, White Babies Laura Harrison, 2016-09-20 *Brown Bodies White Babies* focuses on the practice of cross racial gestational surrogacy in which a woman through in vitro fertilization using the sperm and egg of intended parents or donors carries a pregnancy for intended parents of a different race Focusing on the racial differences between parents and surrogates this book is interested

in how reproductive technologies intersect with race particularly when brown bodies produce white babies While the potential of reproductive technologies is far from pre determined the ways in which these technologies are currently deployed often serve the interests of dominant groups through the creation of white middle class heteronormative families Laura Harrison providing an important understanding of the work of women of color as surrogates connects this labor to the history of racialized reproduction in the United States Cross racial surrogacy is one end of a continuum in which dominant groups rely on the reproductive potential of nonwhite women whose own reproductive desires have been historically thwarted and even demonized *Brown Bodies White Babies* provides an interdisciplinary analysis that includes legal cases of contested surrogacy historical examples of surrogacy as a form of racialized reproductive labor the role of genetics in the assisted reproduction industry and the recent turn toward reproductive tourism Joining the ongoing feminist debates surrounding reproduction motherhood race and the body *Brown Bodies White Babies* ultimately critiques the new potentials for parenthood that put the very contours of kinship into question

The Dream of the Perfect Child Joan Rothschild, 2005 A feminist critique of bioethics and attitudes toward reproductive technologies

Bioethics Marcus Düwell, 2013 This book is a philosophically oriented introduction to bioethics It offers the reader an overview of key current debates in bioethics in the areas including organ retrieval stem cell research justice in healthcare and issues in environmental ethics including issues surrounding food and agriculture The book also seeks to go beyond describing the issues in order to provide the reader with the methodological and theoretical tools for a more comprehensive understanding of bioethical debates The book investigates the theoretical foundations and normative implications of bioethical debates and situates the areas of ethics into their philosophical context

Living With Contradictions Alison M Jaggar, 2018-03-08 This book explores some of the moral and public policy issues that divide Western especially North American feminists as the twentieth century ends and the twenty first century begins It represents an in house discussion among feminists and their social ethics

Quest for Conception Marcia C. Inhorn, 1994-08 In *Quest for Conception* Marcia C Inhorn portrays the poignant struggles of poor urban Egyptian women and their attempts to overcome infertility The author draws upon fifteen months of fieldwork in urban Egypt to present moving stories of infertile Muslim women whose tumultuous medical pilgrimages have yet to produce the desired pregnancies Inhorn examines the devastating impact of infertility on the lives of these women who are threatened with divorce by their husbands harassed by their husbands families and ostracized by neighbors

Exchanging Human Bodily Material: Rethinking Bodies and Markets Klaus Hoeyer, 2013-01-05 This book addresses the debate usually tagged as being about markets in human body parts which is antagonistically divided into pro market and anti market positions The author provides a set of propositions about how to approach this and shows a way out of the concrete impasse of it Assumptions about markets and bodies that characterize this debate are analyzed and described while the author argues that these assumptions are in fact constitutive for exchanges of human bodily material but in unacknowledged ways It is

concluded that what we need is a different analytical approach to better understand the mechanisms at play when organizations exchange organs tissues and cells for use in transplantation and fertility medicine *Determining Legal Parentage* Yehezkel Margalit, 2019-04-25 The last few decades have witnessed dramatic changes affecting the institutions of family and parenthood If in the past the classic family was defined sociologically as a pair of heterosexual parents living together under one roof along with their children different sociological changes have led to a rapid and extreme transformation in the definitions of family marital relations parenthood and the relationship between parents and children Dr Yehezkel Margalit explores whether and to what extent there is room legally and ethically for the use of modern contractual devices and doctrines to privately regulate the establishment of legal parentage This book offers intentional parenthood as the most appropriate and flexible normative doctrine for resolving the dilemmas which have surfaced in the field of determining legal parentage By using the certainty of contract law determining the legal status of parenthood will be seen as the best method to sort out ambiguities and assure both parental and children rights *Embodied Progress* Sarah Franklin, 2022-10-12 This new edition of Sarah Franklin's classic monograph on the development of in vitro fertilisation IVF includes two entirely new chapters reflecting on the relevance of the book's findings in the context of the past two decades and providing a state of the art review of the field today Over the past 25 years both the assisted conception industry and the academic field of reproductive studies have grown enormously IVF in particular is belatedly becoming recognised as one of the most influential technologies of the twentieth and twenty first centuries with a far reaching set of implications that have to date been underestimated understudied and under reported This pioneering text was the first to explore the emergence of commercial IVF in the United Kingdom where the technique was originally developed During the 1980s the British Parliament devised a unique system of comprehensive national regulation of assisted reproduction amidst fractious public and media debate over IVF and embryo research Franklin chronicles these developments and explores their significance in relation to classic anthropological debates about the meanings of kinship gender and the biological facts of parenthood Drawing on extensive personal interviews with women and couples undergoing IVF as well as ethnographic fieldwork in early IVF clinics the book explores the unique demands of the IVF technique In richly detailed chapters it documents the topsy turvy world of IVF and how the experience of undergoing IVF changes its users in ways they had not anticipated Franklin argues that such experiences reveal a crucial feature of translational biomedical procedures more widely namely that these are hope technologies that paradoxically generate new uncertainties and risks in the very space of their supposed resolution The final chapter closely engages with the hope technology concept as well as the idea of having to try and uses these frames to link contemporary reproductive studies to core sociological and anthropological arguments about economy society and technology In the context of rapid fertility decline and huge growth in the fertility industry this volume is even more relevant today than when it was first published at the dawn of what Franklin calls the era of iFertility *Embodied Progress* is an

essential read for all social science academics and students with an interest in the burgeoning new field of reproductive studies. It is also a valuable resource for practitioners working in the fields of reproductive health, biomedicine and policy.

Australian Women's Health Lenore Manderson, 1998. Australian Women's Health: Innovations in Social Science and Community Research contains a compilation of studies that investigate the status of women's physical and mental health in Australia. The studies in this book will help researchers and practitioners from any country benefit from the methodological approaches used to ask questions of policy, program and epidemiological interests. From *Australian Women's Health* you will learn ways to discover the different needs of women depending on their age, race and economic situation; if these needs are being met; and how politics affect women's health care issues. *Australian Women's Health* offers suggestions for further research and gives you insight into Australian health policies, the social aspects of women's health and women's health care costs, in particular for women in minority communities. Furthermore, this book investigates issues that affect women based on their occupation, cultural background and roles in society. This information will help you understand the diverse needs and health care concerns of Australian women. The studies in *Australian Women's Health* identify current problems and offer future suggestions on how to improve women's health care, including evaluating the positive and negative aspects of women's health centers, WHCs, in order to offer or improve important services to women and maintain government funding; conducting a follow-up survey in conjunction with the Women's Health Australia (WHA) study to learn more about health service utilization; eating disorders; violence; social support; and health care for widowers and services available for treating emotional distress; increasing communication between generations to teach younger women about sexually transmitted diseases; early pregnancy; cervical cancer; and available health services treating the emotional and physical medical needs unique to refugee women and how treatment can be improved; examining the special concerns and health care issues of women in caravan parks or trailer parks such as drug and alcohol abuse, domestic violence, contraceptive practices and chronic illnesses; addressing how women perceive stress to be a causal factor of heart disease and angina, high blood pressure, ulcers, asthma and muscular pain; contributing factors to mental illness such as domestic violence and sexual abuse; teaching medical students about domestic violence and how to detect abuse in their patients' lives. *Australian Women's Health* offers you proven reasons why special attention to women's health needs are important by examining women's own theories about health and its determinants. You will receive information, suggestions and first-hand accounts from women as to their needs and concerns that will help you shape the future direction of women's health care. **Teaching Gender, Teaching**

Women's Health Lenore Manderson, 2003-10-02. Examine the importance of gender in health care training facilities and medicine. *Teaching Gender, Teaching Women's Health* presents case studies from Sweden, South Africa, Australia and the United States that illustrate the importance of gender education for health care workers. Each study includes tips and strategies that can help you expand your professional perspective to include gender-related social understandings of health.

and illness The case studies in this book highlight innovations that include changes in curricula or in the content of specific courses as well as new methodology and pedagogical approaches These innovations are designed to support women in their training to be health professionals enhance the quality of health care for women and transgender patients and support research programs and studies that adopt a gender perspective You will learn more about the Women s and Gender Studies Program provided at the Yale University School of Medicine its history pedagogical approaches and the response it has received Idaho State University and its clinical medical anthropology course utilizing a gendered perspective to encourage students to think about the social aspects of illness the medical faculty of G teborg University Sweden and its efforts to determine the impact created by its decision to include a gender issues perspective in its curricula the University of Queensland and the University of Melbourne the introduction of the Gynecology Teaching Associate program in Australia the University of Witwatersrand South Africa and its Women s Health Project which provides a variety of gender and health training courses for health professionals Monash University located in Melbourne Australia which teaches a curriculum unit entitled Gender Issues for Rural Doctors Teaching Gender Teaching Women s Health also offers you recent research about a commonly overlooked issue the inclusion of lesbian health in medical education programs Each case study is well referenced and several include tables and statistics that support their findings This book is vital to medical school faculty health practitioners medical students and women s health advocates
