**Boundary Spanners of Humanity** R. S. Zaharna, 2022 Written by a leading scholar of public diplomacy Boundary Spanners of Humanity introduces a pan human vision of communication that can revolutionize how we collaborate to solve global problems Never before has humanity enjoyed better technological capabilities for interconnection than today Ironically rather than benefiting from the global pool of human resources and intellectual wealth to solve shared problems nations are experiencing public discord and global divisions Boundary Spanners of Humanity tackles the challenge of how to enhance global collaboration by introducing three pan human logics of human communication and public diplomacy that can

transform how we view diversity in an interconnected world R S Zaharna begins by asking why the very tools needed for global collaboration communication and public diplomacy are undermining our efforts to work together Her research reveals how contemporary communication is based on a nineteenth century mindset of separateness that divided people into mutually exclusive cultural and national categories That mindset reinforces human divisions and erodes global collaboration In a radical break from conventional models Zaharna introduces a vision of humanity centered public diplomacy featuring three complementary logics of communication Zaharna s innovative approach stems from decade long interdisciplinary research that spans from ancient cosmologies to emerging neurobiology She draws on a rich array of global examples from ancient and indigenous precolonial diplomacies to spontaneous online communication during the Covid 19 pandemic to provide insights into overlooked aspects of emotion empathy spirituality and synchrony in how nations and people communicate in the global arena Ambitiously conceived this book will bring a new global understanding of how to conduct public diplomacy for the world s boundary spanners those who would find commonality among our many divisions and collaborate on humanity s shared global problems

**Fifth Dimensional Operations** Charles Heal, Robert J. Bunker, 2014-07-15 Examples of 5th dimensional practical applications derived from advanced weaponry which generates an invisible pain barrier and a video camera infrared attachment which allows for crossing the human sensing dimensional barrier and seeing into barricaded rooms *European Security Policy and Strategic Culture* Peter Schmidt, Benjamin Zyla, 2013-09-13 With the Lisbon Treaty in place and the European Union increasingly involved in international crisis management and stabilization operations in places near and far this volume revisits the trajectory of a European strategic culture Specifically it studies the usefulness of its application in a variety of circumstances including the EU's operations in Africa and the Balkans as well as joint operations with NATO and the United Nations The contributors find that strategic culture is a useful tool to explain and understand the EU's civilian and military operations not in the sense of a cause but as a European normative framework of preferences and constraints Accordingly classical notions of strategic culture in the field of international security must be adapted to highlight the specific character of Europe's strategic culture especially by taking the interaction with the United Nations and NATO into account Though at variance over the extent to which security and defence missions have demonstrated or promoted a shared strategic culture in Europe the authors reveal a growing sense that a cohesive strategic culture is critical in the EU's ambition of being a global actor Should Europe fail to nurture a shared strategic culture its actions will be based much more on flexibility than on cohesion This book was published as a special issue of Contemporary Security Policy
