The China Model and Global Political Economy Ming Wan, 2014-01-10 Since the beginning of China's phenomenal rise in the international system our knowledge of the country has grown rapidly But those who have debated the China issue in policy circles mostly focus on the implications of China's rise often without a firm understanding of why the country is rising in the first place Using an

analytical framework which links China's domestic political economy order and the global system this book helps us to understand China's rise and the China model more clearly Indeed unlike most other works that study the China model as a domestic political economy issue it adopts an explicit international comparative perspective comparing the Chinese model to others such as the Washington Consensus and the Japan model This comparison allows us to break down different components of the China model and to show that while the Chinese Communist Party leadership part of the model is unique other components such as export led growth strategy or packaged aid programs are not By focusing on the root cause of China's rise namely the loop between the evolving China model and an evolving global governance structure this book reveals the degree of compatibility between the country's profit driven domestic political economy system and the post war global economic order and in turn how and why China has been able to rise in the global system The China Model and Global Political Economy makes a key contribution to theories of international relations state development and modernization and as such will appeal to students and scholars of Chinese politics Chinese foreign policy international political economy development studies and international relations

of China's Infrastructure Development in Africa Tim Zajontz, 2023-11-23 This book sheds light on structural drivers that led to the Chinese omnipresence in African infrastructure markets and offers a strategic relational approach to the study of African agency in Sino African infrastructure encounters Case studies cover the Tanzania Zambia Railway Authority TAZARA Zambia's road sector as well as Tanzania's Bagamoyo port and Standard Gauge Railway It is shown that African state agency in the infrastructure sector is contingent upon dynamic state society relations and distinct political economic contexts and constraints The book problematises contradictions related to infrastructure debt the emergence of Sino African public private partnerships and the intensifying geopolitics cum geoeconomics of infrastructure across Africa The Global Political Economy of the Household in Asia J. Elias, S. Gunawardana, 2013-10-08 The household has traditionally been neglected in studies of Asian political economy While there is an emergent literature that looks at this relationship to date it is fragmented The contributors consider how the household economy has increasingly been incorporated into development planning and policy making within both states and multilateral development agencies They examine the social consequences of the tendency to view households as marketizable spaces and explore how the household economy relates to broader structures of industrial production in the region With case studies on Singapore Malaysia Sri Lanka India Japan South Korea Vietnam and China they provide a comprehensive picture of the centrality of the household economy to ongoing processes and struggles associated with the continuous economic transformation of the region **Global Political Economy** Nicola Phillips, 2023 With a unique emphasis on the big debates and questions that have the potential to affect all our lives a diverse range of viewpoints are presented to encourage and equip students to become active participants in the discussions that animate global political economy today **Global Political Leadership** Małgorzata Zachara-Szymańska, 2022-10-28 Global Political Leadership explores contemporary shifts in leadership and the related leadership crisis in the global world Globalization is now perceived as a threatening and hostile force with many of its advocates and political supporters turning away from it but its processes cannot be reversed New powers emerge old ones re emerge and uncertainty about the future global order is increasing This book tells the inside stories of global power games and asks important questions about the leadership crisis in the western world The author provides an interpretative framework for contemporary shifts within the western political sphere based on the concept of global leadership This framework presents the nature of the transformation caused by global processes as part of which force and coercion have ceased to be the main modus operandi of the international realm The issue of global political leadership has often been neglected in international relations literature while being widely exploited by managerial and organizational studies However all social organizations have gone global within the last several decades they are more interconnected and more dependent on global processes so the question of effective leadership strategies matching these new realities is highly necessary even or especially at a time when globalization is no longer seen as a leading political programme This book will be of great interest to students and scholars of global affairs politics and

international relations leadership and development and diplomatic studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
