Embodiment Clinical Critical And Cultural Perspectives:

Embodiment: Clinical, Critical And Cultural Perspectives On Health And Illness MacLachlan, Malcolm, 2004-09-01 This is the first book to explore the idea of embodiment across a wide range of clinical contexts Adopting a critical and cultural perspective the book stresses the importance of understanding people through their lived experiences and constructions of their own body The book Challenges both the mind body dichotomy and the biopsychosocial model Examines the clinical significance of people s experience of being a body through a broad range of health and illness experiences in particular when the body is distressed diseased disordered disabled or dismembered Provides insight into the physical and emotional experiences of individuals through its empathetic style Drawing a parallel with innovative work on neural plasticity the author illustrates how we are now in an age of body plasticity where our body boundaries are becoming increasingly ambiguous allowing more degrees of freedom and offering more opportunities than ever before to overcome physical limitations From anorexia to amputation Botox to body dysmorphic disorder phantom limbs to acute and chronic pain the book considers a broad range of bodily experiences Drawing on research from diverse areas including health and clinical psychology neuroscience medicine nursing anthropology philosophy and sociology this book is essential reading for students across all these disciplines *Embodiment: Clinical, Critical and Cultural Perspectives on Health and Illness* Malcolm MacLachlan, 2004-09-16 This is the first book to explore the idea of embodiment across a wide range of clinical contexts Adopting a critical and cultural perspective the book stresses the importance of understanding people through their lived experiences and constructions of their own body The book Challenges both the mind body dichotomy and the biopsychosocial model Examines the clinical significance of people s experience of being a body through a broad range of health and illness experiences in particular when the body is distressed diseased disordered disabled or dismembered Provides insight into the physical and emotional experiences of individuals through its empathetic style Drawing a parallel with innovative work on neural plasticity the author illustrates how we are now in an age of body plasticity where our body boundaries are becoming increasingly ambiguous allowing more degrees of freedom and offering more opportunities than ever before to overcome physical limitations From anorexia to amputation Botox to body dysmorphic disorder phantom limbs to acute and chronic pain the book considers a broad range of bodily experiences Drawing on research from diverse areas including health and clinical psychology neuroscience medicine nursing anthropology philosophy and sociology this book is essential reading for students across all these disciplines Phantom Limbs and Body Integrity Identity Disorder Monika Loewy, 2019-11-21 Phantom Limbs and Body Integrity Identity Disorder discusses the conditions of Phantom Limb Syndrome and Body Integrity Identity Disorder together for the first time exploring examples from literature film and psychoanalysis to re ground theories of the body in material experience The book outlines the ways in which PLS and BIID involve a feeling of rupture underlined by a desire for wholeness using the metaphor of the mirror box a therapeutic device that alleviates

phantom limb pain to examine how fiction is fundamentally linked to our physical and psychical realities Using diverse examples from theoretical and fictional works including thinkers such as Sigmund Freud Jacques Lacan Maurice Blanchot D W Winnicott and Georges Perec and films by Powell and Pressburger and Quentin Tarantino each chapter offers a detailed exploration of the mind body relationship and experiences of fragmentation bodily ownership and symbolic reconstitution By tracing these concepts the monograph demonstrates ways in which fiction can enable us to understand the psychosomatic conditions of PLS and BIID more thoroughly while providing new ways of reading psychoanalysis literary theory and fictional works The first book to analyse BIID in relation to PLS *Phantom Limbs and Body Integrity Identity Disorder* will be essential reading for academics and literary readers interested in the body psychoanalysis English literature literary theory film and disability *The Body Within* Renée van de Vall, Robert Zwijnenberg, 2009 The central question of this interdisciplinary volume is whether present day medical visualisation techniques like ultrasound endoscopy CT MRI and PET scans mark a significant shift in the historical and cultural construction and experience of bodily interiority ***Folk Illusions*** K. Brandon Barker, Claiborne Rice, 2019-04-22 Wiggling a pencil so that it looks like it is made of rubber stealing your niece's nose and listening for the sounds of the ocean in a conch shell these are examples of folk illusions youthful play forms that trade on perceptual oddities In this groundbreaking study K Brandon Barker and Claiborne Rice argue that these easily overlooked instances of children's folklore offer an important avenue for studying perception and cognition in the contexts of social and embodied development Folk illusions are traditionalized verbal and or physical actions that are performed with the intention of creating a phantasm for one or more participants Using a cross disciplinary approach that combines the ethnographic methods of folklore with the empirical data of neuroscience cognitive science and psychology Barker and Rice catalogue over eighty discrete folk illusions while exploring the complexities of embodied perception Taken together as a genre of folklore folk illusions show that people starting from a young age possess an awareness of the illusory tendencies of perceptual processes as well as an awareness that the distinctions between illusion and reality are always communally formed

Transport Economics Cameron Elliott Gordon, 2025-08-08 This book takes an interdisciplinary institutional and historically informed approach to the economics of transport providing a more nuanced and complete understanding of human transport choices individually and collectively and the related choice of location including the formation of cities The first principles of standard economic theory referred to here as the core model are systematically analysed with a particular focus on the strengths and weaknesses of the simplifying assumptions used The economic dynamics of modern transport systems are explored in light of theory and practice covering such topics as the role of incentives technological change and economic growth and the enabling role that transport plays in productivity Many historical and present day examples are provided to explore the real world nuance and subtlety that crops up repeatedly in transport activity using additional disciplinary lenses such as planning engineering psychology and sociology Overall the book examines the implications of the

unique particularities of human beings including the quirks of their psychologies and physical bodies for transport planning development and implementation A focus is kept on the real world policy complications that arise so frequently in the transport arena The book while aimed at university students will also appeal with its holistic thoughtful approach to researchers interested in transport urban planning and its effective delivery Policy makers and practitioners seeking a broad overview of the field beyond their specialisations will also enjoy this book

The Psychology Of Appearance Rumsey, Nichola, Harcourt, Diana, 2005-11-01 This book is an overview of current understanding of appearance related concerns and distress in the general population and among those with acquired or congenital disfigurements such as burns clefts of the lip and or palate scarring and acne Exploring the psychosocial factors which are protective and those which exacerbate distress The Psychology of Appearance offers a vision of a comprehensive approach to support and intervention and addresses the following questions

Health Communication: Theory and Practice Dianne Berry, 2006-10-16 Why is effective communication important in health and what does this involve What issues arise when communicating with particular populations or in difficult circumstances How can the communication skills of health professionals be improved Effective health communication is now recognised to be a critical aspect of healthcare at both the individual and wider public level Good communication is associated with positive health outcomes whereas poor communication is associated with a number of negative outcomes This book assesses current research and practice in the area and provides some practical guidance for those involved in communicating health information It draws on material from several disciplines including health medicine psychology sociology linguistics pharmacy statistics and business and management The book examines The importance of effective communication in health Basic concepts and processes in communication Communication theories and models Communicating with particular groups and in difficult circumstances Ethical issues Communicating with the wider public and health promotion Communication skills training Health Communication is key reading for students and researchers who need to understand the factors that contribute to effective communication in health as well as for health professionals who need to communicate effectively with patients and others It provides a thorough and up to date evidence based overview of this important topic examining the theoretical and practical aspects of health communication for those whose work involves communication with patients relatives and other carers

Health Promotion: A Psychosocial Approach Christine Stephens, 2008-10-16 Stephens important and timely book

provides an urgently needed and insightful synthesis of the previously fragmented field of community health psychology A wide range of case material from both rich and poor countries is framed within a skilfully articulated set of debates around core issues of theory practice research and ethics This text should be compulsory reading for all practitioners and students of health promotion Professor Catherine Campbell Health Community and Development Group London School of Economics Can the health of individuals be improved through community health programmes How can community health promotion programmes be more effective How is health awareness measured and evaluated In recent years health promoters have focused their attention not just on individual lifestyle change but on daily social and physical conditions that surround the individual They are now looking towards lifestyle change based on community or socially based interventions This book argues for the importance of theoretical explanations that inform investigations of the social context of daily life the social relations that affect opportunities for healthy lives and the needs of communities Examining theories from a critical and values oriented perspective it looks at current theories of health and health promotion and discusses why health inequalities exist The book includes a practical grounding using examples of community health promotion practice such as community arts and local community models based on material and research from Britain New Zealand Canada the USA and South America The media s role in health promotion is also investigated drawing on current media theory and examining media representation and the public s interpretative response Issues surrounding the evaluation of health promotion programmes are also discussed Health Promotion A Psychosocial Approach provides a critical and theoretical basis for practice in social and community approaches to health promotion It is key reading for postgraduate students of health psychology or community psychology as well as qualified practitioners in public health areas who are developing theory based community programmes

Complementary Medicine And Health Psychology van Wersch, Anna, Forshaw, Mark, Cartwright, Tina, 2009-10-01 The authors explore the relationship between health psychology and CAM and look at how an understanding of one can be used to inform the other

Prostheses in Antiquity Jane Draycott, 2018-09-03 Today a prosthesis is an artificial device that replaces a missing body part generally designed and assembled according to the individual s appearance and functional needs with a view to being both as unobtrusive and as useful as possible In classical antiquity however this was not necessarily the case The ancient literary and documentary evidence for prostheses and prosthesis use is contradictory and the bioarchaeological and archaeological evidence is enigmatic but discretion and utility were not necessarily priorities So when how and why did individuals utilise them This volume the first to explore prostheses and prosthesis use in classical antiquity seeks to answer these questions and will be of interest to academics and students with specialist interests in classical archaeology ancient history and history especially those engaged in studies of healing medical and surgical practices or impairment and disability in past societies

Culture and Health Malcolm MacLachlan, 2006-05-01 Most Western health professionals practice in multicultural societies The influence of culture on illness health and rehabilitation is

therefore very important Despite this most lower level health psychology texts skim over these differences and assume our traditional biomedical approach will be appropriate for all In this completely revised and updated edition of a groundbreaking book Malcolm MacLachlan redresses the balance by showing how social and cultural aspects interact with the purely physical from assessment and treatment all the way through to effects on rehabilitation

Different Voices Paola Partenza,Özlem Karadağ,Emanuela Ettorre,2022-12-12 The concept of the human has been broadly re visited and modified and the term posthuman has now become a term of continuous inquiry Gender representations play s a critical role in works of literature culture and art and focusing on gender is crucial to uncovering the anthropocentrism or androcentrism that may underlie the work and the times to which it belongs While maintaining a solid literary emphasis the ten chapters included in this volume focus on feminist debates about women technology and the body on gender representation and the posthuman on post gender figurations on gender and trans post humanism biotechnology biopolitics bioethics on feminist posthumanism on animals the human machine and ecological posthumanism The aim of the volume is to analyse how useful these concepts may be for thinking about the subject its definition and identity in a changing society

Psychology and the Classics Jeroen Lauwers,Hedwig Schwall,Jan Opsomer,2018-06-25 While the field of classics has informed and influenced the early developments of the field of psychology these two disciplines presently enjoy fewer fruitful cross fertilizations than one would expect This book shows how the study of classics can help psychologists anchor their scientific findings in a historical literary and philosophical framework while insights of contemporary psychology offer new hermeneutic methods and explanations to classicists This book is the first to date to offer a wide ranging overview of the possibilities of marrying contemporary trends in psychology and classical studies Advocating a critical dialogue between both disciplines it offers novel reflections on psychotherapy ancient philosophy social psychology literature and its theory historiography psychoanalysis tragedy the philosophy of mind linguistics and reception With twenty contributions by specialists in different fields it promotes the combination of classical and psychological perspectives and demonstrates the methods and rewards of such an endeavour through concrete case studies This pioneering book is thus intended for all readers who seek inspiration for their readings research or therapeutic practice

Joseph Smith, Jesus, and Satanic Opposition Professor Douglas J. Davies,2013-06-28 This book explores Mormon theology in new ways from a scholarly non Mormon perspective Bringing Jesus and Satan into relationship with Joseph Smith the founding prophet Douglas Davies shows how the Mormon Plan of Salvation can be equated with mainstream Christianity s doctrine of the Trinity as a driving force of the faith Exploring how Jesus has been understood by Mormons his many Mormon identities are described in this book he is the Jehovah of the Bible our Elder Brother and Father probably also a husband he visited the dead and is also the antagonist of Satan Lucifer This book offers a way into the Mormon problem of evil understood as apostasy from pre mortal times to today Three images reveal the wider problem of evil in Mormonism Jesus pre mortal encounter with Lucifer in a

heavenly council deciding on the Plan of Salvation Jesus Christ's great suffering engagement with evil in Gethsemane and Joseph Smith's First Vision of the divine when he was almost destroyed by an evil force Douglas Davies well known for his previous accounts of Mormon life and thought shows how renewed Mormon interest in theological questions of belief can be understood against the background of Mormon church organization and its growing presence on the world stage of Christianity

Psychoprosthetics Pamela Gallagher, Deirdre Desmond, Malcolm MacLachlan, 2007-11-29 Psychoprosthetics is defined as the study of psychological aspects of prosthetic use and of rehabilitative processes in those conditions that require the use of prosthetic devices Psychoprosthetics State of the Knowledge brings together into one easily accessible volume the most recent and exciting research and knowledge in this new field

The Theology of Death Douglas Davies, 2008-07-31 The first part of the book is grounded in biblical issues and in historical and philosophical theology It seeks to establish several schemes of death theology related for example to early Christianity's Jewish cultural milieu to belief in Christ's resurrection and to Christology to issues of millennial belief and to an emergent liturgical practice The rise of notions of the soul in relation to medieval thought and practice and the place of death in reformation theology are both covered as is the role of the nineteenth and twentieth century Finally the rise of biblical theology is considered especially in the twentieth century The second part of the book takes up several contemporary models of the theology of death The first pursues a traditional acceptance of an otherworldly afterlife the second explores worldly analysis of eternal life as a quality of contemporary existence devoid of any future state The third develops the worldly model and considers a wider sense of self as a part of an ecological view of the world as a divine creation and explores the meaning of birth life and death amidst a divine environment The Theology of Death aims to offer some sharply defined schemes to focus thought in a Christian environment in which death hell and heaven have almost lost their place The topic of hope is a key element and the book explores the birth and fostering of hope within Christian traditions

Mors Britannica Douglas J. Davies, 2015-11-12 A people's lifestyle is one thing their death style another The proximity or distance between such styles says much about a society not least in Britain today Mors Britannica takes up this style issue in a society where cultural changes involve distinctions between traditional religion secularisation and emergent forms of spirituality all of which involve emotions where fear longing and a sense of loss rise in waves when death marks the root embodiment of our humanity These world orientations evident in older and newer ritual practices engage death in the hope and desire that love relationships community and human identity be not rendered meaningless Yet both emotions and ritual have an uneasiness to them because death is a slippery topic as the twenty first century gets under way in Britain In this work Douglas J Davies draws from a largely anthropological sociological perspective with consideration of history literature philosophy psychology and theology to provide a window into British life and insights into the foundation links between individuals and society across the spectrum of traditionally religious views through to humanist and secular alternatives He considers memorial sites from

churchyards to roadside memorials forms of corporeal disposal from cremation to composting and death rites in a range of religious and secular traditions

Health Psychology Antonia C. Lyons, Kerry Chamberlain, 2006-02-16 This textbook aims to provide students with a stimulating alternative to the textbooks currently available by placing the discipline within the context of the social world and encouraging them to question some of the assumptions and values underlying much current research A comprehensive survey of the discipline is provided framed within a lifespan approach and emphasising social cultural factors such as gender ethnicity and social economic status All major topics are covered including health behaviours health promotion coping strategies stress biomedical and biopsychosocial models of health and illness chronic illnesses psychoneuroimmunology disability pain and patient provider communication Each topic is situated within its social and cultural context and constantly linked back to real world experience Chapters include valuable features such as research updates learning objectives and recommended readings This book will be an invaluable resource for students of health psychology across a range of disciplines including psychology anthropology and health studies
