Meyer, 2002-09-19 The sudden destruction of Pompeii Herculaneum and the surrounding Campanian countryside following the eruption of Vesuvius in AD 79 preserved the remarkable evidence that has made possible this reconstruction of the natural history of the local environment Following the prototype of Pliny the Elder's Natural History various aspects of the natural history of Pompeii are discussed and analyzed by a team of eminent scientists many of whom have collaborated with Jashemski during her years of excavation of several gardens in the Vesuvian area This volume brings together the work of geologists soil specialists paleobotanists botanists palaeontologists biologists chemists dendrochronologists ichthyologists zoologists ornithologists mammalogists herpetologists entomologists and archaeologists affording a thorough picture of the landscape flora and fauna of the ancient sites The detailed and rigorously scientific catalogues which are copiously illustrated provide a checklist of the flora and fauna upon which future generations of scholars can continue to build

**Intentions in Architecture** Christian Norberg-Schulz, 1968-09-15 The chief focus of the book is on the symbolic and linguistic The purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the designer insofar as architecture is an art Norberg Schulz is a practicing architect his buildings stand in several countries and he elucidates the nature of architectural reality with a practiced eye and from a practical viewpoint Although the methods and theory that his book develops are uncompromisingly rigorous and tightly formed they are everywhere related to actual building through specific examples and through the use of over 100 photographs The structure that Norberg Schulz has fashioned is surely one of the most impressive intellectual edifices that any architect has ever produced The materials that are organically worked into it include Gestalt psychology the mechanics of perception information theory modern analytic philosophy and in particular linguistic analysis and the general theory of signs and symbols The result however is not an eclectic hodge podge all these materials have their place and purpose none is applied extraneously for show or purely decorative effect And all this divergent material had to be joined according to plan within formal bounds in order to produce a theory with equally divergent applications one that can treat not only of the aesthetics of architecture but equally well of its social psychological and cultural effects The chief focus of the book is on the symbolic and linguistic The purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the designer insofar as architecture is an art

**Ghost Images** Tom Ruffles, 2015-03-07 The possibility of life after death is a significant theme in cinema in which ghosts return to the world of the living to wrap up unfinished business console their survivors visit lovers or just enjoy a well wreaked scaring This work focuses on film depictions of survival after death from meetings with the ghost of Elvis to AIDS related ghosts apparitions hauntings mediumship representations of heaven angels near death experiences possession poltergeists and all the other

ways in which the living interact with the dead on screen The work opens with a historical perspective which outlines the development of pre cinematic technology for projecting phantoms and discusses the use of these skills in early ghost cinema English language sound films are then examined thematically with topics ranging from the expiation of sins to hungry ghosts Six of the most significant films *Dead of Night* *A Matter of Life and Death* *The Innocents* *The Haunting* *The Shining* and *Jacob's Ladder* are given a detailed analysis A conclusion filmography and bibliography follow

**Interdisciplinary Explorations of Postmortem Interaction** Estella Weiss-Krejci, Sebastian Becker, Philip Schwyzer, 2022-06-23 In the present as in the past the dead have been deployed to promote visions of identity as well as ostensibly wider human values Through a series of case studies from ancient Egypt through prehistoric historic and present day Europe this book discusses what is constant and what is locally and historically specific in our ways of interacting with the remains of the dead their objects and monuments Postmortem interaction encompasses not only funerary rituals and intergenerational engagement with forebears but also concerns encounters with the dead who died centuries and millennia ago Drawing from a variety of disciplines such as archaeology bioarchaeology literary studies ancient Egyptian philology and sociocultural anthropology this volume provides an interdisciplinary account of the ways in which the dead are able to transcend temporal distances and engender social relationships Until quite recently literary sciences and archaeology were generally regarded as incommensurable in their aims methodologies and source material Although archaeologists and literary critics have been increasingly willing to borrow concepts and terminology from the other discipline this book is one examples of a genuinely collaborative endeavor This is an open access book
