Revelation Seena Fazel, John Danesh, 2002 **A Concise Encyclopedia of the Baha'i Faith** Peter Smith, 2013-10-01 Written by a well known author in the field of Baha i studies this is a comprehensive and accessible encyclopedia to the youngest of the world religions Regarded as the second most widespread faith after Christianity with adherents in almost every country around the globe the Baha i faith is nevertheless unfamiliar to many here Dr Smith traces the origins and development of the religion from 19th century Iran to the modern day introducing its central figures and major historical events combining breadth with a readable yet concise style he provides a balanced overview of Baha i scriptures doctrines and practices social teachings and organization This reference work presents a clear and knowledgeable view of a fascinating new religion **The Changing Face of Religion and Human Rights** Clemens Nathan, 2009-06-02 Clemens N Nathan has devoted a lifetime to the pursuit of Human Rights to understanding and reflecting upon the concept of Human Rights to participating in and sometimes helping to create organisations and mechanisms for the protection and promotion of Human Rights to helping those who have been denied their Human Rights and to encouraging and supporting research into and scholarship on Human Rights All this has been achieved by a man who has had no formal training in the field but who has become a recognised expert through his extensive reading through working with leading exponents and by drawing upon his lively intellect his wealth of culture and his knowledge of history philosophy and religions This volume published under the auspices of the Raoul Wallenberg Institute of Human Rights and Humanitarian Law offers insight into the challenging relationship between religion and human rights **Baha'i and Globalisation** Annika Hvithamar, Margit Warburg, Morten Warmind, 2005-12-01 Globalisation has become a buzzword that typically refers to the intensifying integration of the world economy especially as midwifed by technological advances It also implies a growing political and cultural sense that all

humanity is globally interdependent There have always been individuals of course who have advocated such awareness one of them being the founder of the Baha i faith who formulated a spiritual equivalent as the religion s central doctrine in the late 19th century Ye are the fruits of one tree and the leaves of one branch Its emphasis on global unification made Baha i an obvious candidate for a case study on new religions and globalisation The chapters in this volume fall into two sections diachronic and synchronic The first part is organised chronologically beginning with the emergence of the globalist tendency in the messianic vision of Babism the precursor to Baha i and concluding with an analytic history of its leaders changing attitudes to international politics The second part considers a variety of global themes in contemporary Baha i practice including global thought in Baha i writings the impact of the internet and the triumphalist and secular strains in Baha i identity Though five million members make it one of the world s most successful new religions Baha i has attracted little scholarly attention Most of the academics concentrating on Baha i have contributed to this volume which will appeal not only to students of modern religious movements but to anyone interested in the ways religions can adapt to and embrace the modern world

Experience on the Edge: Theorizing Liminality Brady Wagoner, Tania Zittoun, 2021-10-19 Liminality has become a key concept within the social sciences with a growing number of publications devoted to it in recent years The concept is needed to address those aspects of human experience and social life that fall outside of ordered structures In contrast to the clearly defined roles and routines that define so much of industrial work and economic life it highlights spaces of transition indefiniteness ambiguity play and creativity Thus it is an indispensable concept and a necessary counterweight to the overemphasis on structural influences on human behavior This book aims to use the concept of liminality to develop a culturally and experientially sensitive psychology This is accomplished by first setting out an original theoretical framework focused on understanding the liminal sources of cultural experience and

second an application of concept to a number of different domains such as tourism pilgrimage aesthetics children's play art therapy and medical diagnosis Finally all these domains are then brought together in a concluding commentary chapter that puts them in relation to an overarching theoretical framework This book will be useful for graduate students and researchers in cultural psychology critical psychology psychosocial psychology developmental psychology health psychology anthropology and the social sciences cultural studies among others
