The Emergence of Entrepreneurship Policy David M. Hart, 2003-10-27 This volume seeks to catalyze the emergence of a novel field of policy studies entrepreneurship policy Practical experience and academic research both point to the central role of entrepreneurs in the process of economic growth and to the importance of public policy in creating the conditions under which entrepreneurial companies can flourish The contributors who hail from the disciplines of economics geography history law management and political science seek to crystallize key findings and to stimulate debate about future opportunities for policy makers and researchers in this area The chapters include surveys of the economic social and cultural contexts for US entrepreneurship policy assessments of regional efforts to link knowledge producers to new enterprises explorations of policies that aim to foster entrepreneurship in under represented communities detailed analyses of three key industries biotechnology e commerce and telecommunications and considerations of challenges in policy implementation

Entrepreneurship, Geography, and American Economic Growth Zoltan J. Acs, Catherine Armington, 2006-06-19 The spillovers in knowledge among largely college educated workers were among the key reasons for the impressive degree of economic growth and spread of entrepreneurship in the United States during the 1990s Prior industrial policies in the 1970s and 1980s did not advance growth because these were based on outmoded large manufacturing models Zoltan Acs and Catherine Armington use a knowledge spillover theory of entrepreneurship to explain new firm formation rates in regional economies during the 1990s period and beyond The fastest growing regions are those that have the highest rates of new firm formation and which are not dominated by large businesses The authors of this text also find support for the thesis that knowledge spillovers move across industries and are not confined within a single industry As a result they suggest regional policies to encourage and sustain growth should focus on entrepreneurship among other factors

Entrepreneurship Part III: My Startup Patri K. Venuvinod, 2011-11-06 In recent times Technology T Innovation I and Entrepreneurship E have become matters of critical importance to the economic and competitive success of nations firms and startups Yet a depressingly large number of people politicians bureaucrats businessmen engineers academics are still locked up in the isms and managerial mindsets of the last century One reason is the paucity of academic books addressing TIE issues in a manner empathetic to the concerns of developed as well as developing societies This book is the third and final part of a new textbook trilogy that seeks to fill this gap A special feature is the inclusion of comparative insights derived by the author during his academic pursuits in India the UK Hong Kong China and the USA Part I examined TIE interactions from the perspectives of the world and nation building Part II focused on issues of importance to individual firms Part III this book does the same from the perspective of a startup *Analysis of the German EXIST-II-Program and Its Transferability to*

Mexico Claudia Erika Gutiérrez Díaz, 2013 The promotion of entrepreneurship in higher education appears in the political spectrum as a new economic policy arena In this field policy blanks and new kinds of problems need to be addressed Scholars agree that many of the current structures and models in higher education do not fit the necessary requirements for the development of entrepreneurship training New perspectives in this field can be gained through an analysis of the feasibility of a policy transfer of the German EXIST II Program to Mexico This program was developed to address the entrepreneurial potential within higher educational institutions through the coordination of entrepreneurial efforts carried out by regional national and supranational actors An empirical analysis of the objectives regulations actors and governance personnel staff financial resources beneficiaries and output of the program as well as a comparative study of Germany versus Mexico in this book demonstrates under what conditions the transfer of know how from Germany specifically from the EXIST II Program to universities in Mexico could be implemented The research offers alternatives to improve the current ongoing initiatives in Mexico **ENTREPRENEURSHIP DEVELOPMENT - ECONOMIC AND SOCIAL ISSUES** Dr. Sharda

Gangwar, 2015-01-01 An entrepreneur is one of the important segments of economic growth as well as social growth Basically an entrepreneur is a person who is responsible for setting up a business or an enterprise in a society for social growth Infact he is one who has the initiative skill for innovation and who looks for high achievements He is a catalytic agent of change and works for the good of the society According to Peter F Ducker Effective entrepreneurship is not making speeches or being liked entrepreneurship is defined by results not attributes That means he puts up new Greenfield projects that actually creates wealth opens up employment opportunities and fosters other sectors An entrepreneur is one of the most important inputs in the economic development of a country or regions within the country Entrepreneurship development is getting a position of great importance for tackling ever growing problem of unemployment due to rapid population growth

The Creative Class Goes Global Charlotta Mellander, Richard Florida, Bjørn T. Asheim, Meric Gertler, 2013-11-07 The

whole landscape of research in urban studies was revolutionized by the publication of Richard Florida's *The Rise of the Creative Class* in 2002 and his subsequent book entitled *The Flight of the Creative Class* has helped to maintain a decade long explosion of interest in the field. While these two books examine the creative class in the context of the United States, research has emerged which investigates the creative class worldwide. This book brings together detailed studies of the creative class in cities across the globe, examining the impact of the creative class on growth and development. The countries covered include the United Kingdom, the Netherlands, Germany, Australia, China, Japan, and Canada, in addition to the United States. Taken together, the contributions deepen our understanding of the creative class and the various factors that affect regional development, highlighting the similarities and differences between the creative class and economic development across countries. This book will be of great interest to scholars of economic geography, regional economics, urban sociology, and cultural policy, as well as policy makers involved in urban development.

Food Security and Industrial Clustering in Northeast Asia Lily Kiminami, Toshihiko Nakamura, 2015-09-25. This book integrates diversified methodologies of area studies, regional economic development, regional science, and related fields to draw up a strategy for forming the regional food industrial cluster in Northeast Asia. This is done by assigning innovation to a core concept with the basic problem of food security as the horizontal axis and the areas of Northeast Asia as the vertical axis. Specifically, the principle of collaborative advantage as a key factor is extracted from case studies on food industrial clustering in each area. As a final objective, a practical policy recommendation is presented while the theorization of the industrial cluster is developed. Therefore, it is also a challenge to the old and new issue of food security which has been argued until now.

The Small Business Advocate, 1996-05. *Hybrid Entrepreneurship* Matthias Schulz, 2018-01-26. The preponderance of research regards entrepreneurial entry as a dichotomous choice between paid employment and entrepreneurship. Most classic models on the emergence of entrepreneurship either neglect or exclude the opportunity of engaging in both occupations at the same time. This view stands in contrast to increasing evidence that the majority of firm entry around the world occurs by individuals who simultaneously engage in paid employment and self employment, an entry mode which has been termed hybrid entrepreneurship. 58% of all start-ups in Sweden have been found to be started in hybrid entrepreneurship, and even in R & D pursuing start-ups in Germany, this type of business entry represents 27% of all entrants. Next to this high prevalence of hybrid entrepreneurs among entrepreneurs, there are at least three reasons why these hybrid entrepreneurs should receive more attention. First, as hybrid entrepreneurs are often better educated than pure entrepreneurs, their business ideas might be expected to result in more high growth ventures. Second, businesses run in pure entrepreneurship survive longer on average if they have been founded in hybrid entrepreneurship. Third, regardless of whether or not hybrid entrepreneurs generate greater economic impact than pure entrepreneurs, their relevance also emerges from their potential to evolve into valuable full-time businesses that otherwise would not have existed. This thesis therefore aims to advance research on hybrid

entrepreneurship by revealing its importance for policymaking and entrepreneurship research the various areas of research touched by it and its role in entrepreneurial exit processes Handbook of Research on Entrepreneurship Policies in Central and Eastern Europe Friederike Welter, David Smallbone, 2011 This unique Handbook explores the role of government in the development of entrepreneurship in countries where twenty years ago private enterprise was illegal or barely tolerated The expert contributors reveal that government policy is one of the key influences on the external environment in which businesses develop particularly in countries where it has been necessary to redefine the role of the state in relation to business development They outline how government policy can also act as an enabling and or a constraining force with respect to entrepreneurship development particularly in relation to institutional change and the development of a market based economy This Handbook includes up to date information and analysis as to how entrepreneurship policies have evolved in the wider Europe focusing on the challenges that arise in designing and implementing entrepreneurship policy The Handbook of Research on Entrepreneurship Policies in Central and Eastern Europe excellently covers different facets of entrepreneurship policies in Central and Eastern Europe and will prove invaluable for academics students and researchers of entrepreneurship and small business as well as policy studies Policy makers will also find plenty of key insights and relevant information in this important resource Urban Studies and Entrepreneurship Muhammad Naveed Iftikhar, Jonathan B. Justice, David B. Audretsch, 2019-05-02 This book attempts to advance critical knowledge and practices for fostering a variety of entrepreneurship at a city level The book aims to connect scholarship and policy practice in two disciplines Urban Studies and Entrepreneurship The book has included contributions from developed emerging and developing countries The chapters are clubbed under five main sections I Startups and Entrepreneurial Opportunities II Knowledge Spillover III Social and Bureaucratic Entrepreneurialism IV Demography and Informal Entrepreneurs V Perspectives from Emerging and Developing Economies In this regard the book explores a number of questions such as what are the important varieties of entrepreneurship how can they be observed and measured and how does each variety emerge and operate under various conditions of infrastructure and opportunity Which type s of entrepreneurship should a city prefer What can cities do to stimulate desirable forms of entrepreneurship or is it more of a spontaneous phenomenon Why do policies that enhance entrepreneurship in some contexts seem instead to promote crony capitalism and rent seeking in other contexts Should cities focus on growing their own entrepreneurs and entrepreneurial enterprises or on luring them from other cities and countries How can a collective action in a city promote or hinder entrepreneurship The contributions in the present volume address head on these questions at the intersection of urban studies economic theory and the practicalities of economic development and urban governance in a genuinely global range of places and applications **Tug of War** Jocelyn Wills, 2017-09-04 Selling Earth observation satellites on their abilities to predict and limit adverse environmental change politicians business leaders the media and technology enthusiasts have spent sixty years arguing that space exploration can create a more
