Emergence And Development Of Svo Patterning In Latin And French:

The Emergence and Development of SVO Patterning in Latin and French Brigitte L. M. Bauer, 1995 This book analyzes in terms of branching the pervasive reorganization of Latin syntactic and morphological structures in the development from Latin to French a shift can be observed from the archaic left branching structures which Latin inherited from Proto Indo European to modern right branching equivalents Brigitte L M Bauer presents a detailed analysis of this development based on the theoretical discussion and definition of branching and head Subsequently she relates the diachronic shift to psycholinguistic evidence arguing that the difficulty of left branching complex structures as reflected in their painstaking and delayed acquisition accounts for the extensive typological shift from left to right branching that took place in Latin French and the other Indo European languages The author uses data from child language acquisition studies to support her thought provoking claim

The Emergence and Development of SVO Patterning in Latin and French Brigitte Louise Maria Bauer, 2023 This treatise argues that there has been an evolution in Romance syntax and morphology from left branching structures subject object verb to right branching structures subject verb object It uses data from child language acquisition studies to back up this claim

The Emergence and Development of SVO Patterning in Latin and French Brigitte L. M. Bauer, 1995-03-23 This book analyzes in terms of branching the pervasive reorganization of Latin syntactic and morphological structures in the development from Latin to French a shift can be observed from the archaic left branching structures which Latin inherited from Proto Indo European to modern right branching equivalents Brigitte Bauer presents a detailed analysis of this development based on the theoretical discussion and definition of branching and head Subsequently she relates the diachronic shift to psycholinguistic evidence arguing that the difficulty of LB complex structures as reflected in their painstaking and delayed acquisition accounts for the extensive typological shift from left to right branching that took place in Latin French and the other Indo European languages

Complex Sentences, Grammaticalization, Typology Philip Baldi, Pierluigi Cuzzolin, 2011-10-27 New Perspectives on Historical Latin Syntax Complex Sentences Grammaticalization Typology is the fourth in a set of four volumes dealing with the long term evolution of Latin syntax roughly from the 4th century BCE up to the 6th century CE As in the other volumes the non technical style and extensive illustration with classical examples makes the content readable and immediately useful to the widest audience

The MIHI EST construction Mihaela Iliaia, 2023-12-18 This book examines the Romanian mihi est construction Mi e foame fric me dat is hunger fear I am hungry afraid While it disappeared from all other Romance languages to be replaced with a habeo structure the mihi est pattern is in Romanian the most common way of expressing psychological or physiological states By means of synchronic and diachronic corpus studies the book investigates the status of the core arguments of the mihi est structure i e the dative experiencer and the nominative state noun as well as its evolution throughout the centuries The data analysis reveals that the dative experiencer syntactically behaves like nominative subjects whereas the state noun shows predicate behavior As for the

evolution of the mihi est structure the analysis shows a certain tendency toward innovation since in present day Romanian it can coerce nouns coming from other semantic fields into the construction's psychological or physiological interpretation Could this be another unique trait of Romanian which causes it to seemingly go against the tendency of most Romance languages toward canonical marking of core arguments

Handbook of Comparative and Historical Indo-European Linguistics Jared Klein, Brian Joseph, Matthias Fritz, 2018-06-11 This book presents the most comprehensive coverage of the field of Indo-European Linguistics in a century focusing on the entire Indo-European family and treating each major branch and most minor languages The collaborative work of 120 scholars from 22 countries Handbook of Comparative and Historical Indo-European Linguistics combines the exhaustive coverage of an encyclopedia with the in-depth treatment of individual monographic studies

Grammaticalization Jürgen Klausenburger, 2000-03-15 In this monograph various aspects of the morphosyntactic evolution of the Romance languages are shown to interact in a theory of grammaticalization The study argues for the incorporation and subordination of inflectional morphology within a grammaticalization continuum constituting but a portion of the latter Parameters of natural morphology are seen as principles of grammaticalization but the reverse is also true rendering grammaticalization and natural morphology indistinguishable In the context of this theoretical framework Chapter 2 deals with Latin French and Italian verbal inflection focusing on universal and system-dependent parameters of natural morphology In Chapter 3 a theory of grammaticalization is built on divergent elements including not only grammaticalization studies proper but also the perception-production line of inquiry and typology and branching issues permitting the phasing out of the traditional synthesis-analysis cycle Chapter 4 touches on nominal inflection in particular that of Old French and Rumanian the most revealing histories in the Romance domain Chapter 5 finally thoroughly discusses extant theoretical questions in grammaticalization prominently featuring the relevance of invisible hand explanations and the crucial role played by unidirectionality This study will be of interest to specialists in Romance and historical linguistics as well as morphological theory

Manual of Romance Morphosyntax and Syntax Andreas Dufter, Elisabeth Stark, 2017-09-25 This volume offers theoretically informed surveys of topics that have figured prominently in morphosyntactic and syntactic research into Romance languages and dialects We define syntax as being the linguistic component that assembles linguistic units such as roots or functional morphemes into grammatical sentences and morphosyntax as being an umbrella term for all morphological relations between these linguistic units which either trigger morphological marking e.g. explicit case morphemes or are related to ordering issues e.g. subjects precede finite verbs whenever there is number agreement between them All 24 chapters adopt a comparative perspective on these two fields of research highlighting cross-linguistic grammatical similarities and differences within the Romance language family In addition many chapters address issues related to variation observable within individual Romance languages and grammatical change from Latin to Romance

Nominal Apposition in Indo-European Brigitte L. M. Bauer, 2017-05-08 Nominal apposition the combining of two

equivalent nouns has been a neglected topic in linguistics despite its prominence in syntax and morphology in some languages This book presents an extensive comparative and diachronic analysis of nominal apposition in Indo European examining its occurrence characteristics and functions in early languages identifying parallels with similar phenomena elsewhere and tracing its evolution in Latin Romance

Variation and Change in Gallo-Romance Grammar Sam Wolfe,Martin Maiden,2020 This volume offers a wide range of case studies on variation and change in the Gallo Romance sub family It draws on a wealth of data from standard and non standard varieties and adopts a variety of theoretical and conceptual approaches including traditional philology sociolinguistics formal syntax and discourse pragmatics

Expletive and Referential Subject Pronouns in Medieval French Michael Zimmermann,2014-09-12 Medieval French usually analyzed as a null subject language differs considerably from modern Romance null subject languages such as Spanish in the availability of non expressed subject pronouns specifically it shows characteristics reminiscent of non null rather than null subject languages such as the expression of expletive subject pronouns The central goal of this book is to put forward an account of these differences On the basis of the analysis of an extensive newly established data corpus the development of the expression of both expletive and referential subject pronouns until the 17th c is determined Following a thorough discussion of previous approaches an alternative approach is presented which builds on the analysis of Medieval French as a non null subject language The non expression of subject pronouns licit in specific contexts in non null subject languages is shown to be restricted to configurations generally involving left peripheral focalization These configurations and concomitantly non expressed subject pronouns are finally argued to be eventually lost for good in the wake of the initial observation by 17th c writers of pertinent instructions campaigned for in highly influential works of language use

The Noun Phrase in Romance and Germanic Petra Sleeman,Harry Perridon,2011-02-16 One of the recurrent questions in historical linguistics is to what extent languages can borrow grammar from other languages It seems for instance hardly likely that each average European language developed a definite article all by itself without any influence from neighbouring languages It is on the other hand by no means clear what exactly was borrowed since the way in which definiteness is expressed differs greatly among the various Germanic and Romance languages and dialects One of the main aims of this volume is to shed some light on the question of what is similar and what is different in the structure of the noun phrase of the various Romance and Germanic languages and dialects and what causes this similarity or difference

Language Change and Functional Explanations Jadranka Gvozdanovic,2011-04-20 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its

synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language

TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

Verb Second in Medieval Romance Sam Wolfe, 2019 This volume provides the first book length study of the controversial topic of Verb Second and related properties in a range of Medieval Romance varieties The findings have widespread implications for the understanding of both the key typological property of Verb Second and the development of Latin into the modern Romance languages

Reported Speech Theo Janssen, Wim van der Wurff, 1996-09-24 In sentences containing reported speech thought or perception it is possible to distinguish different voices or views associated with different discourse roles They originate in two different clauses one clause signals a reporting situation and the other a reported situation This volume examines the methods used for combining these two types of clauses in a range of languages In each of the contributions the focus is on the forms and functions of verbs topics dealt with include the meaning of tense mood and aspect and their interaction in the various types of reported speech the speech act status of reported utterances correlations between reporting verbs and verbs in reported clauses and the conjunctions introducing them and possible intra systemic and cross linguistic correlations of these properties The articles concentrate on the Slavic languages Russian Bulgarian Macedonian Serbian Croatian and Slovene the Romance languages Latin Old and Modern French and Spanish the Germanic languages Swedish German Dutch and English the Indo Iranian language Bengali and Mandarin Chinese

Motives for Language Change Raymond Hickey, 2003-01-16 This specially commissioned volume considers the processes involved in language change and the issues of how they can be modelled and studied The way languages change offers an insight into the nature of language itself its internal organisation and how it is acquired and used Accordingly the phenomenon of language change has been approached from a variety of perspectives by linguists of many different orientations This book originally published in 2003 brings together an international team of leading figures from different areas of linguistics to re examine some of the central issues in this field and also to discuss new proposals The volume is arranged into sections including grammaticalisation the typological perspective the social context of language change and contact based explanations It seeks to cover the subject as a whole bearing in mind its relevance for the general analysis of language and will appeal to a broad international readership

Latin Embedded Clauses Lieven Jozef Maria Danckaert, 2012 This monograph is one of the first studies that approaches Latin syntax from a formal perspective combining detailed corpus based description with formal theoretical analysis The empirical focus is word order in embedded clauses with special attention to clauses in which one or more constituents surface to the left of a subordinating conjunction It is proposed that two such types of left peripheral fronting should be distinguished The proposed analyses shed light not only on

the clausal left periphery but also on the overall structure of the Latin clause The study is couched in the framework of generative grammar but since a thorough introduction is provided no special background in formal syntax is required Major topics touched upon are word order information structure locality and the syntax of pied piping The book covers both synchronic and diachronic topics of Latin syntax and is of interest for classical philologists historical linguists and formal syntacticians

Grammaticalization and Pragmatics: Facts, Approaches, Theoretical Issues Corinne Rossari, Claudia Ricci, Adriana Spiridon, 2012-11-02 The studies collected in this volume deal with pragmatic factors involved in the evolution of grammatical or lexical forms or in the emergence of complex syntactic structures in various languages Dutch French Italian Portuguese Romanian Serbian and Spanish They are set against the theoretical framework of grammaticalization The main methodological tools are cross linguistic contrastive analysis and diachronic perspective The two main issues that emerge from these studies are the place of pragmatic factors in language change input output or setting frame of the process and the existence or otherwise of a prevailing mechanism for explaining change phenomena

The Genitive Anne Carlier, Jean-Christophe Verstraete, 2013-07-17 This volume the fifth in the series Case and Grammatical Relations across Languages is devoted to genitive constructions in a range of Indo European languages Russian French Romanian German and Swedish as well as Finnish Bantu languages and Northern Akhvakh Northeast Caucasian Definitions of genitives typically start out from the notion of an inflectional marker often suffixal that marks dependency relations of a noun phrase with respect to another noun phrase and conveys possessive meaning The contributions in this volume demonstrate a huge range of variation in genitives semantically from possessive meaning to generalized dependency morphologically from affixes to different types of clitics and syntactically from adnominal uses to argument relations and adjunct uses The volume contains both general surveys of genitives and case studies of the semantics pragmatics and historical development of specific genitive constructions It will be of interest to scholars and students in syntax semantics morphology typology and historical linguistics

Historical Linguistics, 1997 Monika S. Schmid, Jennifer R. Austin, Dieter Stein, 1998-01-01 This volume presents a selection from the papers given at the 13th International Conference on Historical Linguistics It offers a window on the current state of the art in historical linguistics the papers cover a wide range of different languages different language families and different approaches to the study of linguistic change ranging from optimality theory theories of grammaticalization and the invisible hand treatments of language contact and creolization to the linguistic consequences of political correctness Among the languages under discussion are Akkadian Catalan Dutch Finnish Japanese Sranan Western Malayo Polynesian Yiddish and a variety of Romance and Native American languages
