Emergency Ophthalmology:

Handbook of Emergency Ophthalmology Brit Long, Alex Koyfman, 2018-06-21 This book provides emergency physicians with an easy to use guide for diagnosing and treating ophthalmologic conditions in the emergency department. Ophthalmologic complaints are very common but many emergency physicians are not as confident as they would like to be when evaluating and managing these conditions. This book answers that need by giving step by step instructions on how to diagnose and treat common eye conditions including glaucoma, infections, neuro ophthalmologic conditions and trauma. For each disorder, the book discusses presentation, symptoms, physical examination techniques, lab and imaging findings, differential diagnoses, treatment guidelines and referral suggestions. The text is filled with images that clearly present these common ophthalmologic complaints and conditions and guide the emergency physician to an accurate and swift diagnosis. *Handbook of Emergency Ophthalmology* is an essential resource for emergency physicians, residents, medical students, nurses and other healthcare workers who evaluate and manage patients with ophthalmologic conditions. **Emergency**

Ophthalmology Madyan Nasim Qureshi, 2014-12-18 *Emergency Ophthalmology* provides a concise systematic overview of ophthalmology for students, emergency medicine clinicians, trainee ophthalmologists, general practitioners and speciality nurses. It includes details on history and examination and all aspects of assessment, diagnosis and immediate management of ophthalmic diseases and conditions. This practical guide is an essential resource when assessing ophthalmic patients in an acute setting. **Practical Emergency Ophthalmology Handbook** Amy-lee Shirodkar, Gwyn Samuel Williams, 2019-11-20

This handbook is designed to help shape the thought processes of the eye clinician or trainee and guide them toward the right decision making pathway in emergency ophthalmology situations. Chapters are titled by the way cases present to eye casualty rather than condition, along with an algorithmic approach on what clinical and laboratory investigations to carry out. There is also guidance on how to perform simple procedures. It is aimed at trainees, general ophthalmologists and those with an interest from allied specialties including specialist nurses and professions such as optometrists and emergency medicine doctors. Key Features: Stresses safe and practical navigation of common eye symptoms presented in an emergency setting. Provides guidance on differential diagnosis and includes useful decision making flowcharts. Emphasizes how to approach the eye casualty patient. Shows what can be expected at each stage of the eye injury patient encounter. Presents information appropriate for the entire multi disciplinary eye casualty team. **Emergency, Acute and Rapid Access Ophthalmology**

Josephine Duvall-Young, 2018-10-03 This book provides a concise and practical overview of hospital based emergency, urgent and primary care service in Ophthalmology. Specialist consultants who wish to broaden their knowledge of the various ophthalmic conditions seen in clinical emergencies will find this book to be a useful go to guide. Advice is given on establishing an ophthalmic emergency and primary care service and a series of chapters cover the management of emergency eye conditions. *Emergency Acute and Rapid Access Ophthalmology* is a must read for all ophthalmic professionals.

Written by an international team of ophthalmic practitioners this authoritative book is a vital resource not only for ophthalmic professionals but for any healthcare professional who cares for patients with eye problems. In the ten years since the first edition was published practice has moved on as has the evidence for practice. This second edition draws on the passion and goodwill of the original team of authors complemented by other colleagues to fully revise and update the text in line with new findings, new practice and new and exciting treatments. The book is broadly divided into three sections. The first section considers the structure and function of the eye as well as the basic principles of ophthalmology and eye examination. The second section considers patient care in diverse settings as well as work related issues and patient education. It also includes two entirely new chapters on eye banking and global eye health. The third section takes a systematic approach to patient care working from the front to the back of the eye discussing some of the common disorders affecting each structure such as the lens or cornea or group of structures such as the eyelids or lacrimal drainage system. The book concludes with a very useful glossary of ophthalmic terms. Some aspects of practice discussed in the text are of necessity UK based but these are clearly indicated and wherever possible principles rather than specifics are addressed and readers are directed to local policies and interpretations. The first edition of this book became a core text for ophthalmic nursing in particular and for the education of ophthalmic nurses across the world. This new edition will provide a comprehensive up to date evidence based resource for all ophthalmic healthcare professionals. Contents include: Physiology of vision, Optics, Pharmacology, Examination of the eye, Visual impairment, Patient education, Work and the eye, Care of the adult ophthalmic patient in an inpatient setting, The care of the child undergoing ophthalmic treatment, Developments in day care surgery for ophthalmic patients, Ophthalmic theatre nursing, The care of patients presenting with acute problems, Eye banking, Global eye health, The eyelids and lacrimal drainage system, The conjunctiva, The cornea, The sclera, The lens, The uveal tract, The angle and aqueous, The retina and vitreous, The orbit and extraocular muscles, Visual and pupillary pathways and neuro ophthalmology, The eye and systemic disease.
