prehospital professionals for the field      **The Internet for Physicians** Roger P. Smith, 2006-04-12 Like the Internet itself interest in computing both local and distant has grown exponentially The rapidly changing role of the Internet has resulted in three very different editions of The Internet for Physicians The first edition attempted to introduce the concept of information transfer and communication and point the way toward a tool of the future The second edition attempted to assuage trepidation in the use of this emerging tool and suggest the why and wherefore of being connected The needs that drove those goals have almost completely disappeared As a result the bulk of this edition is more focused on the medical aspect of the Internet and its use and less on the nuts and bolts of connecting and communication through the Web It has been revamped reorganized and expanded to include 30% more content and 90 new illustrations New to the third edition is an entire section dedicated to Medicine and the Web with chapters discussing patient education and information what your patients are seeing on the web finding quality resources including clinical trial and evidence based medicine sites how to search and use PubMed telemedicine continuing medical education medical literature and informatics applications of on line journals and submissions and much more      *RAPID Pediatric Emergency Care (Revised Reprint) - CD-ROM PDA Software Powered by Skyscape* Barbara Aehlert, 2007-03-09 Get quick and easy access to essential facts and clinical information for pediatric emergencies at the tap of a stylus RAPID Pediatric Emergency Care Revised Edition CD ROM PDA Software contains the full contents of the pocket reference for instant access on your PDA anywhere you need it Powered by Skyscape this software offers extensive cross linking and search capabilities that let you find and use the information the way that works best for you Access important pediatric emergency information in charts algorithms guidelines procedures and tables Discover many helpful illustrations and the handy alphabetical listing of commonly used medications Sections include growth development patient assessment respiratory conditions cardiac conditions fluids medications trauma burns selected conditions abuse death special needs and the newly born PDA Software Powered by Skyscape lets you quickly find the information you need and use it the way you want Use integrated cross reference linking to connect instantly with all other Skyscape titles on your PDA Move within topics with a single touch using smARTabs™ Customize how you want information displayed Take notes when and where you need to with the annotation function Use this software on both Palm OS handhelds and Pocket PC Windows CE operating systems      The Multimedia and CD-ROM Directory, 1998      **Manual of Simulation in Healthcare** Richard H. Riley, 2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide Simulation and skills centres have become established to integrate simulation into mainstream education in all medical nursing and paramedical fields Borrowing from the experience and methodologies of industries that are using simulation medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation Simulation has been used to

enhance the educational experience in a diverse range of fields therefore a wide variety of disciplines are represented The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development and promotion Section two deals with simulators and related training devices that are required to equip a stand alone or institution based centre The features strengths and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements There is a guide to producing scenarios and medical props that can enhance the training experience The third section covers adult education and it reviews the steps required to develop courses that comply with best practice in medical education Teaching skills facilitating problem based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education The manual concludes with guides for the major specialties that use simulation including military paediatrics CPR and medical response teams obstetrics and anesthesia
