This dedicated text equips both aspiring and registered midwives with the foundational understanding of pathophysiology required to deliver the best patient care. An understanding of pathophysiology is paramount for the delivery of safe and effective care during the various stages of pregnancy, childbirth, and postpartum recovery. This understanding provides midwives with the insight to recognise and respond promptly to complications, fostering optimal outcomes for the mother and the newborn. Early recognition is pivotal, allowing for timely interventions that can significantly influence maternal and fetal well-being. A holistic approach to care is the cornerstone of midwifery, and an understanding of pathophysiology allows midwives to consider the physical, emotional, and social aspects of a woman's health. This holistic perspective contributes to a more comprehensive and person-centred model of care. This user-friendly introduction is not only a foundational text but also a practical resource for practicing midwives. Informed by the latest research and reflective of current best practices, this book stands as an indispensable tool for this indispensable profession. Tailored for both undergraduate and graduate midwifery students as well as registered midwives returning to practice, this resource is an invaluable asset in advancing pathophysiological knowledge within midwifery practice.

Transitioning the midwifery models of care World Health Organization, 2024-10-15. The *Transitioning to Midwifery Models of Care* Global Position Paper is a comprehensive document produced by the World Health Organization (WHO) Department of Maternal, Newborn, Child, and Adolescent Health and Ageing, under the Strategic Technical Advisory Group of Experts for Maternal, Newborn, Child, and Adolescent Health and Nutrition. STAGE, in collaboration with WHO technical departments, regional offices, and numerous stakeholders, is in the pursuit of providing high-quality health services to improve health and well-being for all in the context of Universal Health Coverage. Transitioning to midwifery models of care represents a cost-effective strategy to optimize outcomes for women and newborns with minimal use of unnecessary interventions. This position paper offers an international definition, describes the guiding principles of midwifery models of care, and reviews the advantages of adopting these models of care. It highlights the significant role and impact that midwives can have within health systems while recognizing the importance of collaborative and integrated care, where various professionals jointly contribute to providing high-quality maternal and newborn health services.
