Technologies of the Gendered Body Anne Marie Balsamo, 1996 This book looks at the representation of the body in culture from a feminist perspective Subjects covered include bodybuilding cosmetic surgery and cyberculture *Arts and Power* Lisa Gaupp, Alenka Barber-Kersovan, Volker Kirchberg, 2022-09-05 The focus on concepts of power and domination in societal structures has characterized sociology since its beginnings Max Weber s definition of power as imposing one s will on others is still relevant to explaining processes in the arts whether their production imagination communication distribution critique or consumption

Domination in the arts is exercised by internal and external rulers through institutionalized social structures and through beliefs about their legitimacy achieved by defining and shaping art tastes The complexity of how the arts relate to power arises from the complexity of the policies of artistic production distribution and consumption policies which serve to facilitate or hinder an aesthetic object from reaching its intended public Curators critics and collectors employ a variety of forms of cultural and artistic communication to mirror and shape the dominant social economic and political conditions Arts and Power Policies in and by the Arts brings together diverse voices who position the societal functions of art in fields of domination and power of structure and agency whether they are used to impose hegemonic totalitarian or unjust goals or to pursue social purposes fostering equal rights and grassroots democracy The contributions in this volume are exploratory steps towards what we believe can be a more systematic empirically and theoretically founded sociological debate on the arts and power And they are an invitation to take further steps

Forthcoming Books Rose Arny,1990 Building Bodies Pamela L. Moore,1997 Building Bodies is an exciting collection of articles that strive toward constructing theoretical models in which power bodies discourse and subjectivity interact in a space we can call the built body a dynamic politicized and biological site Contributors discuss the complex relationship between body building and masculinity between the built body and the racialized body representations of women body builders in print and in film and homoeroticism in body building Linked by their focus on the sport and practice of body building the authors in this volume challenge both the way their various disciplines media studies literary criticism gender studies film and sociology have gone about studying bodies and existing assumptions about the complex relationship between power subjectivity society and flesh Body building in practice in representation and in the cultural imagination serves as an launching point because the sport and practice provide ready challenges to existing assumptions about the built body
