Flexible Query Answering Systems:

Flexible Query Answering Systems Troels Andreassen, Henning Christiansen, Henrik Legind Larsen, 2012-12-06 Flexible Query Answering Systems is an edited collection of contributed chapters. It focuses on developing computer systems capable of transforming a query into an answer with useful information. The emphasis is on problems associated with high level intelligent answering systems. The coverage is multidisciplinary with chapters by authors from information science, logic, fuzzy systems, databases, artificial intelligence, and knowledge representation. Each contribution represents a theory involving flexibility in query answering and each addresses specific answering problems. Coverage includes topics such as fuzzy sets in flexible querying, non standard database interactions, metareasoning and agents, and many others. Contributions for this volume were written by leading researchers from their respective subject areas including Patrick Bosc, Bernadette Bouchon Meunier, Amihai Motro, Henri Prade, and Ron Yager among others. Flexible Query Answering Systems is a timely contribution for researchers working on high level query mechanism systems. *Flexible Query Answering Systems* Alfredo Cuzzocrea, Sergio Greco, Henrik Legind Larsen, Domenico Saccà, Troels Andreassen, Henning Christiansen, 2019-09-11 This book constitutes the refereed proceedings of the 13th International Conference on Flexible Query Answering Systems FQAS 2019 held in Amantea, Italy, in July 2019. The 27 full papers and 10 short papers presented were carefully reviewed and selected from 43 submissions. The papers present emerging research trends with a special focus on flexible querying and analytics for smart cities and smart societies in the age of big data. They are organized in the following topical sections: flexible database management and querying, ontologies and knowledge bases, social networks and social media, argumentation based query answering, data mining and knowledge discovery, advanced flexible query answering methodologies and techniques, flexible query answering methods and techniques, flexible intelligent information oriented and network oriented approaches, big data veracity and soft computing, flexibility in tools and systems, and miscellanea.

Flexible Query Answering Systems Troels Andreassen, Amihai Motro, Henning Christiansen, Henrik Legind Larsen, 2003-06-30 This volume constitutes the proceedings of the Fifth International Conference on Flexible Query Answering Systems FQAS 2002 held in Copenhagen, Denmark, on October 27-29, 2002. FQAS is the premier conference for researchers and practitioners concerned with the vital task of providing easy, flexible, and intuitive access to information for every type of need. This multidisciplinary conference draws on several research areas including databases, information retrieval, knowledge representation, soft computing, multimedia, and human computer interaction. Previous FQAS events were held in 1994, 1996, 1998, and 2000. The overall theme of the FQAS conferences is innovative query systems, media, and providing easy, flexible, and intuitive access to information. Such systems are intended to facilitate retrieval from information repositories such as databases, libraries, and the World Wide Web. These repositories are typically equipped with standard query systems which are often inadequate, and the focus of FQAS is the development of query systems that are more expressive, informative, cooperative, and

productive These proceedings contain 29 original papers that relate to the topic of users posing queries and systems producing answers The papers cover the elds tabase Management Information Retrieval Domain Modeling Knowledge presentation and Ontologies Knowledge Discovery and Data Mining Arti cial Intelligence Classical and Non classical Logics Computational Linguistics and Natural Language Processing Multimedia Information Systems and Human Computer Interaction We wish to thank the contributors for their excellent papers and the referees publisher and sponsors for their e ort Special thanks also to the invited sp kers members of the Advisory Board and members of the Program Committee They made the success of FQAS 2002 possible
