Flight 901 to Erebus Ken Hickson, 1980 Beretter detaljeret om havariundersøgelsen efter den flyulykke der fandt sted den 28 november 1979 hvor en DC 10 fra Air New Zealand forulykkede på Antarktis **Air New Zealand Flight 901 and Polar Whiteout** Mila Zinkova, 2019-03-15 Scientific Essay from the year 2019 in the subject Geography Earth Science Regional Geography grade 10 0 language English abstract On 28 November 1979 on a sightseeing flight to Antarctica the Air New Zealand Flight 901 crashed on the slopes of Mount Erebus All 237 passengers and 20 crewmembers perished on the impact Two investigations that followed both agreed that due to the Polar Whiteout the crewmembers of Flight 901 had not seen the mountain This article offers a discussion on whiteouts in general and in regards to the accident It explores other phenomena that could have led to the tragedy namely spatial disorientation illusions **Judgment on Erebus** Joey Sheehan, 2024-09-26 Judgment on Erebus is narrative nonfiction at its most compelling and unsettling Commanded by one of Air New Zealand's most meticulous and cautious pilots a sightseeing airliner inexplicably crashes into an active Antarctic volcano in broad daylight causing the world's fourth worst aviation disaster The New Zealand government's Office of Air Accidents Investigation soon publishes an official report attributing the disaster to pilot error Skeptical and aroused public demands an independent official inquiry Realizing that he badly needs a second investigator to confirm the first one's findings an imperious Prime Minister selects for the post a distinguished High Court judge he believes will be a team player After conducting his own extensive inquiry into the crash though Justice Peter Mahon reaches a verdict on the cause's of and culpability for the devastating loss of life on Mt Erebus that is totally incompatible with the government's earlier in-house report All hell breaks loose One of the two official investigators must be gravely mistaken or lying but which one and why Years of political legal and judicial pyrotechnics commence to answer that question Meanwhile a stricken nation mourns its 257 dead Sheehan takes a fresh look at Mahon's evidence for concluding that the national airline itself was responsible for the tragic loss of life which the government immediately tried to cover up with a well organized multi-tentacled multi-phased and aggressive attempt to pin the accident on the well respected dead pilots She also movingly relates what befell the judge after an enraged Prime Minister turned on him This twist gives a superb political and legal thriller its moral center a Goliath against David struggle over the truth Antarctica: Earth's Own Ice World Michael Carroll, Rosaly Lopes, 2018-05-16 In 2016 scientist Rosaly Lopes and artist Michael Carroll teamed up as fellows of the National Science Foundation to travel to Mount Erebus the world's southernmost active volcano in Antarctica The logistics of getting there and complex operations of Antarctica's McMurdo Station echo the kinds of strategies that future explorers will undertake as they set up settlements on Mars and beyond This exciting popular level book explores the arduous environment of Antarctica and how it is similar to other icy worlds in the Solar System The bulk of this story delves into Antarctica's infrastructure exploration and remote camps culminating on the summit of Erebus There the authors explored the caves and ice towers on the volcano's flanks

taking photographs and generating original art depicting scenes in Antarctica and terrestrial analogs on other planets and moons Readers will see an intimate side of Mount Erebus and Antarctica while surveying the region's history exploration geology and volcanology which includes research funded by the National Science Foundation's United States Antarctic Programs Richly illustrated with photographs and stunning paintings showcasing the beauty of the harsh continent the book captures the spirit and splendor of the authors journey to Erebus      The Emerging Politics of Antarctica Anne-Marie Brady, 2013 This book examines the post Cold War challenges facing Antarctic governance It seeks to understand the interests of new players in Antarctic affairs such as China India Korea and Malaysia and how other key players such as Russia and the USA or claimant states such as New Zealand or France are coping in the new global order Antarctica is the world's fifth largest continent and its territories are claimed by seven different states Since 1961 Antarctica has been managed under the Antarctic Treaty System ATS a regime which according to its critics by the terms of its membership effectively excludes most of the nations of the world This book examines the post Cold War challenges facing Antarctic governance and is organized thematically into three sections Part 1 considers the role of Antarctic politics in the current post Cold War post colonial era and the impact this new political environment is having on the ATS Part 2 looks at the competing foreign policy objectives of a representative range of countries with Antarctic activities Part 3 examines issues that have the potential to destabilise the order of the Antarctic Treaty System such as unrestricted tourism and new advances in science and technology The Emerging Politics of Antarctica will be of interest to students and scholars of international politics polar studies and foreign policy studies      *Australia's Worst Disasters* Malcolm Brown, 2010-11-01 Graphic accounts of Australia's worst disasters historical as well as events of recent years From the Ash Wednesday bushfires of 1983 to the implosion of the Royal Canberra Hospital in 1997 and from the shocking Granville railway crash in 1977 to the Sea King helicopter crash of 2005 Australia's history has been punctuated by incidents of disaster and tragedy that have shocked us all Sometimes warning signs were not read or were ignored sometimes human error was to blame These graphic and compelling accounts by veteran Sydney Morning Herald journalist Malcolm Brown and other award winning journalists tell us far more than simply what happened they provide unique insights into the impact of these events on the lives of innocent people And interspersed with stories of death and destruction are heart warming accounts of courage grace and just plain good luck

*Paradise Reforged* James Belich, 2002-02-28 *Paradise Reforged* picks up where *Making Peoples* left off taking the story of the New Zealanders from the 1880s to the end of the twentieth century It begins with the search for Better Britain and ends by analyzing the modern Maori resurgence the new Pakeha consciousness and the implications of a reinterpreted past for New Zealand's future Along the way the book deals with subjects ranging from sport and sex to childhood and popular culture Critics hailed *Making Peoples* as brilliant and the most ambitious book yet written on New Zealand's past *Paradise Reforged* its successor adopts a similarly incisive original sweep across the New Zealand historical landscape in confronting

the myths of the past That some of its themes are uncomfortably close to the present makes the result all the more fascinating

Air Disasters Jay Hawkins,2011-12-15 Looks at the science of air crashes and disasters highlighting such major instances as 9 11 and TWA Flight 800

*Aviation Visual Perception* Randy Gibb,Rob Gray,Lauren Scharff,2016-04-15 Vision is the dominant sense used by pilots and visual misperception has been identified as the primary contributing factor in numerous aviation mishaps resulting in hundreds of fatalities and major resource loss Despite physiological limitations for sensing and perceiving their aviation environment pilots can often make the required visual judgments with a high degree of accuracy and precision At the same time however visual illusions and misjudgments have been cited as the probable cause of numerous aviation accidents and in spite of technological and instructional efforts to remedy some of the problems associated with visual perception in aviation mishaps of this type continue to occur Clearly understanding the role of visual perception in aviation is key to improving pilot performance and reducing aviation mishaps This book is the first dedicated to the role of visual perception in aviation and it provides a comprehensive single source document encompassing all aspects of aviation visual perception Thus this book includes the foundations of visual and vestibular sensation and perception how visual perceptual abilities are assessed in pilots the pilot s perspective of visual flying a summary of human factors research on the visual guidance of flying examples of specific visual and vestibular illusions and misperceptions mishap analyses from military commercial and general aviation and finally how this knowledge is being used to better understand visual perception in aviation s next generation *Aviation Visual Perception Research Misperception and Mishaps* is intended to be used for instruction in academia as a resource for human factors researchers design engineers and for instruction and training in the pilot community

**The Trivia Lover's Guide to the World** Gary Fuller,2012-08-16 Gary Fuller s entertaining and engaging guide enhances geographic know how with good old fashioned fun using trivia to open up new worlds of knowledge for all readers Often dismissed as unimportant trivia here highlights issues that are far from trivial pondering for example what peaceful country requires citizens to keep guns in their homes what continent contains at least 75 percent of the world s fresh water and why aren t New York Los Angeles Chicago and Philadelphia the capitals of their respective states An inveterate traveler and geographer extraordinaire Fuller provides extensive background clear illustrations and thorough explanations for each intriguing question carefully grounding the text in practical geographic concepts Both enjoyable and enlightening this book challenges today s global generation to truly get to know their world

Spatial Disorientation in Aviation Fred H. Previc,William R. Ercoline,2004 The first book to cover the entire spectrum of spatial disorientation in flight This book examines the long history of spatial disorientation in flight describes the movements of aircraft in mathematical detail and explains how these movements can conspire to fool human sensory systems It also examines the visual mechanisms that contribute to perceptions of self motion describes the contribution of psychological factors to spatial disorientation and defines the types of visual and nonvisual illusions pilots experience in flight

**Journeys to Antarctica**

Kalman Dubov, 2020-11-10 The continent of Antarctica shrouded in mist ice and frightful weather was a land of mystery for millennia Ancient and medieval cartographers and scientists pondered its reality considering the South Pole at the extreme of Earth the counterpart of the North Pole But it was only in the 17th and 18th centuries that brave captains piloting tiny ships by today's standards began plying these waters The myth of Terra Australis was soon debunked as the misty veil of ice and cold yielded its secrets Soon many explorers set themselves the task of mastering this secret and unknown land The story of such exploration is a fascinating tale of those who braved the ice and cold those who lived to tell the tale of their exploits and those who did not Today waters seas mountains and valleys are known by these hardy men and their feats of bravery The tale of exploration is also coupled with greed spurred by the advance of territorial claims over land and sea In this regard the British were foremost in this quest They were only halted by the adoption of the Antarctic Treaty System an international agreement that preserves and protects Antarctica from every mercantile endeavor at least until 2048 There are no human settlements on Antarctica save for research stations as scientist explorers further our collective understanding of the continent its flora and fauna its many water animals that come here and to understand the story hidden beneath hundreds of feet of solid ice Of greatest importance is the effect this continent has on the rest of the globe with its teeming billions and ecological effect the world has on this distant land This review discusses the explorers who first mapped the land and its waters who navigated these channels and so leading to the wider discovery of the continent itself The expansion of British interests in Antarctica was also spurred by the claim over the Falklands Islands resulting in the 1982 conflict between Britain and Argentina The Argentine invasion was repelled by British forces though Argentina continues to claim sovereignty over the islands For a time Britain declared sovereignty from the Falklands to the South Pole with overlapping claims from other countries None of these sovereignty claims however are recognized under the Antarctic Treaty Of special interest is the science applied to the continent which requires specialized training and expertise I review some of the science appreciating the dedication and determination of the men and women to understand this icy continent Speaking of women I was surprised to learn that women were forbidden from participating in exploration and scientific efforts based on nothing more than machismo men who decided this was no place for women The first women who pioneered and came to Antarctica faced a host of male dominated and demeaning attitudes until these attitudes changed I also explore a Jewish conundrum how to visit Antarctica either during its long summer or its dark winter and remain true to Jewish tradition That tradition mandates following laws that are time sensitive by the rhythm of day and night which do not apply in this remote region Ancient precedent is used to apply a modicum of reality to this remote region I then discuss my two visits to the continent once about Holland America's Prinsendam and the second aboard the Amsterdam While both journeys were memorable the second voyage was overshadowed by Covid 19 In fact the latter journey ended in late March just two months later when all passengers were required to disembark in Perth Australia and had to immediately return home Unless one is a

research scientist travel to Antarctica is commonly by cruise ship Even then the Antarctic mainland is not seen Instead the ship will visit various points in the Antarctic Peninsula a location that is closer to Ushuaia Argentina or Punta Arenas Chile These locations are Fin del Mundo the end of the earth the last human habitation before reaching the Antarctic land mass My visits were to the Peninsula with each trip lasting just four and one half days Combined these nine days remain memorable for the uniqueness as for their stark color extremes White and dark predominates here with few other colors marring the landscape If ever I had a bucket list these nine days filled the void of the only landmass on earth where extremes of ice and snow of dark colored penguins whales and seals contrasted with the icebergs and high granite peaks atop snow encrusted mountains I remain grateful for this incredible opportunity to visit this remote land cocooned aboard a large and warm vessel with fellow passengers seeking the see this remote and distant land I hope this review does justice to the beauty and cold silence of this remote land

Manni, S.I. Magalini, 2012-12-06 C Manni The focusing of general interest and of many disciplines on disaster medicine is an interesting and recent phenomenon in our society Disasters have by now left the historical and philosophical sphere and finally entered the operational arena Modern man in other words no longer accepts disasters in a passive and fatalistic manner but claims to be able to control them like so many other forces of nature The new approach is aimed at preventing containing and remedying the invariably tragic consequences of these events The role of medicine in this context is of fundamental importance and is characterized by two main aspects application of techniques of intervention appropriately and effectively and collaboration with the general organization assuming responsibility for the protection of health and the treatment of injuries Following a period of more or less chaotic growth during which sectionalism and empirical interests prevailed and localized aspects of this new discipline underwent considerable development a need is now felt to propose and realize a more comprehensive scientific approach It has become necessary to identify and to rationally analyze the individual components of this branch of medicine As in any analysis the recognition of the object of the research is of fundamental importance hence the title of this first round table Types and Events of Disaster
