**Greywolf** Mary G. Montgomery, 2007-10 In a world of Vietnam psychedelics and the back to earth movement Maria VonSanden struggles with her own awkward identity She feels older than her peers yet at sixteen is still quite innocent when it comes to relationships In fact the opposite sex scares her until she meets Christopher an ordinary teacher or so he seems Underneath his cheerful outgoing personality lies a labyrinth of dark secrets that Maria is determined to discover Together they struggle to free themselves from the constraints of their culture and their personal lives uncovering hidden mysteries and a forbidden love that changes her life forever And his *Optimization Algorithms in Machine Learning* Debashish Das, Ali Safaa Sadiq, Seyedali Mirjalili, 2025-05-20 This book explores the development of several new learning algorithms that utilize recent optimization techniques and meta heuristics It addresses well known models such as particle swarm optimization genetic algorithm ant colony optimization evolutionary strategy population based incremental learning and grey wolf optimizer for training neural networks Additionally the book examines the challenges associated with these processes in detail This volume will serve as a valuable reference for individuals in both academia and industry *Wild Horses, Wild Wolves* Maureen Enns, 2013 Established in 1967 the Ghost River Wilderness Area located along the eastern slopes of the

Rocky Mountains in southern Alberta is one of only three provincially designated wilderness areas in the province. As such, it is supposed to have the strictest form of government protection available in Canada, with development, motorised transportation and recreational activities either tightly controlled or altogether forbidden. This has not been the case, however. Using a stunning combination of drawn and painted images, conventional and remote photography using hidden cameras activated by heat or motion, and traditional stories told by Peigan and Stoney Nakoda people, Enns invites the reader to join her as she untangles old myths regarding Alberta's heritage and reveals some uncomfortable realities facing the province in the 21st century. The wild horses, wolves, moose, deer and bears profiled in this book have had little contact with humankind. As communities, developers and governments struggle to understand the affects of conservation, recreation and development in sacred places, it is becoming more and more difficult to keep the wild in wild animals. This project is a passionate plea for understanding, conservation and action.

*Encyclopedia of Television Film Directors* Jerry Roberts, 2009-06-05. From live productions of the 1950s like *Requiem for a Heavyweight* to big budget mini series like *Band of Brothers*, long form television programs have been helmed by some of the most creative and accomplished names in directing. *Encyclopedia of Television Film Directors* brings attention to the directors of these productions, citing every director of stand alone long form television programs, made for TV movies, movie length pilots, mini series and feature length anthology programs, as well as drama, comedy and musical specials of more than 60 minutes. Each of the nearly 2,000 entries provides a brief career sketch of the director, his or her notable works, awards and a filmography. Many entries also provide brief discussions of key shows, movies and other productions. Appendixes include Emmy Awards, DGA Awards and other accolades, as well as a list of anthology programs. A much needed reference that celebrates these often neglected artists, *Encyclopedia of Television Film Directors* is an indispensable resource for anyone interested in the history of the medium.
