The Magic Snow Globe

John was in his room playing when he heard a noise coming from the inside of his desk. John was worried but decided to walk over to his desk. He heard a song playing that had very soft piano sounds. He opened the drawer to his desk and found a tiny snow globe inside. It was addictive because John had never seen that snow globe before. What could it be doing in his desk drawer? Inside the snow globe was a small snowman and an elf. John looked at the snow globe then set it down. John went to walk away and go back to playing his games. All of a sudden, John heard the snow globe talk. It said, "Come over here! I have a special surprise for you!" John was frightened and unsure. He walked over and he glanced at the snowman inside the snow globe. The snowman wanted to give John a special gift.

John asked the snowman, "What gift do you have for me?" The snowman said, "This is a magical snow globe. It can take you any place in this world. So, where would you like to go?" John wasn't so sure if the snowman was telling the truth or not. He didn't believe in magic, but then again, there was a talking snowman in front of him. John thought that he was dreaming, but in fact he was not. John told the snowman that he wanted to be inside the snow globe. John wanted to see what it was like. So, the snowman worked up his magic and brought John inside of the snow globe. There was nothing to do, no people to see, and no food anywhere in sight. John was not having the best of times. The snowman was friendly and showed John around the snow globe. John felt sad for the snowman because it looked so lonely inside of the snow globe. John couldn't believe anyone would want to live all alone. John had an idea though. What if the snowman came back to live with him?

Snakes

Did you know there are over 3,000 species of snakes in the world? That is a lot of snakes! Snakes live in every single continent except for Antarctica. Some snakes live in ponds, on land, in forests, and even in your backyard. Snakes are long, slimy reptiles that have no legs. They have smooth, scaly skin. Sometimes snakes have patterns on them and sometimes they are a solid color. Snakes can be anywhere from one foot to thirty feet long. (3000) The biggest snake in the world is known as the Boa Constrictor. This snake can be up to 300 pounds. There are no more than 100 species of snakes in the world. Each type of snake has its own name.

Every snake is either one or the other. Venomous snakes can be very dangerous. They can bite humans and even kill them. There are many different types of snakes in the world. These types of snakes are called venomous or poisonous. Most of the time, snakes are harmless. They are all over the world. The venom all snakes have is to kill their prey. It is not to hurt humans. Snakes are not dangerous to humans. They are just a part of the world. Snakes are not dangerous to humans. They are just a part of the world. Snakes are not dangerous to humans. They are just a part of the world.

Even though the snakes that are venomous are dangerous, they are not dangerous to humans. They are just a part of the world. Snakes are not dangerous to humans. They are just a part of the world. Snakes are not dangerous to humans. They are just a part of the world. Snakes are not dangerous to humans. They are just a part of the world. Snakes are not dangerous to humans. They are just a part of the world.
