Flora Europaea Notulae Systematicae Ad F:

Flora Europaea Notulae Systematicae Ad Floram Europaeam Spectantes Vernon Hilton Heywood, 1961 **Flora Europaea: Psilotaceae to Platanaceae** T. G. Tutin, 1993-04-22 The Flora Europaea presents a synthesis of all the national and regional Floras of Europe *The Biology of Island Floras* David Bramwell, Juli Caujapé-Castells, 2011-07-21 Oceanic islands offer biologists unparalleled opportunities to study evolutionary processes and ecological phenomena However human activity threatens to alter or destroy many of these fragile ecosystems with recent estimates suggesting that nearly half of the world's insular endemics are threatened with extinction Bringing together researchers from around the world this book illustrates how modern research methods and new concepts have challenged accepted theories and changed our understanding of island flora Particular attention is given to the impact of molecular studies and the insights that they provide into topics such as colonisation radiation diversification and hybridisation Examples are drawn from around the world including the Hawaiian archipelago Galapagos Islands Madagascar and the Macronesian region Conservation issues are also highlighted with coverage of alien species and the role of ex situ conservation providing valuable information that will aid the formulation of management strategies and genetic rescue programmes **Descriptive Taxonomy** Mark F. Watson, Chris H. C. Lyal, Colin A. Pendry, 2015-01-08 In an age when biodiversity is being lost at an unprecedented rate it is vital that floristic and faunistic information is up to date reliable and easily accessible for the formulation of effective conservation strategies Electronic data management and communication are transforming descriptive taxonomy radically enhancing both the collection and dissemination of crucial data on biodiversity This volume is written by scientists at the forefront of current developments of floras and faunas along with specialists from applied user groups The chapters review novel methods of research development and dissemination which aim to maximise the relevance and impact of data Regional case studies are used to illustrate the outputs and impacts of taxonomic research Integrated approaches are presented which have the capacity to accelerate the production of floras and faunas and to better serve the needs of a widening audience
