**Architecture, Liberty and Civic Order** Carroll William Westfall, 2016-03-09 This book brings to light central topics that are neglected in current histories and theories of architecture and urbanism These include the role of imitation in earlier centuries and its potential role in present practice the necessary relationship between architecture urbanism and the rural districts and their counterpart in the civil order that builds and uses what is built The narrative traces

two models for the practice of architecture One follows the ancient model in which the architect renders his service to serve the interests of others it survives and is dominant in modernism The other first formulated in the fifteenth century by Leon Battista Alberti has the architect use his talent in coordination with others to contribute to the common good of a republican civil order that seeks to protect its own liberty and that of its citizens Palladio practiced this way and so did Thomas Jefferson when he founded a uniquely American architecture the counterpart to the nation s founding This narrative gives particular emphasis to the contrasting developments in architecture on the opposite sides of the English Channel The book presents the value for clients and architects today and in the future of drawing on history and tradition It stresses the importance indeed the urgency of restoring traditional practices so that we can build just beautiful and sustainable cities and rural districts that will once again assist citizens in living not only abundantly but also well as they pursue their happiness **Textual**

*Reforming Reformation* Thomas F. Mayer, 2016-12-05 The Reformation used to be singular a unique event that happened within a tidily circumscribed period of time in a tightly constrained area and largely because of a single individual Few students of early modern Europe would now accept this view Offering a broad overview of current scholarly thinking this collection undertakes a fundamental rethinking of the many and varied meanings

of the term concept and label reformation particularly with regard to the Catholic Church Accepting the idea of the Reformation as a process or set of processes that cropped up just about anywhere Europeans might be found the volume explores the consequences of this through an interdisciplinary approach with contributions from literature art history theology and history By examining a single topic from multiple interdisciplinary perspectives the volume avoids inadvertently reinforcing disciplinary logic a common result of the way knowledge has been institutionalized and compartmentalized in research universities over the last century The result of this is a much more nuanced view of Catholic Reformation and once that extends consideration much further both chronologically geographically and politically than is often accepted As such the volume will prove essential reading to anyone interested in early modern religious history *Giorgio Vasari* Liana De Girolami Cheney, 2025-03-04 This book presents Giorgio Vasari as an intellectual painter and philosopher a rarely explored perspective in existing scholarship It provides a fresh understanding of how Giorgio Vasari influenced the portrayal of successful artists in 16th century Italy His extensive education in classical studies humanism and art and his unparalleled intellectual curiosity enthusiasm and creative prowess enabled him to formulate a bold and assertive viewpoint on art and its history With the support of humanists fellow artists and the patronage of his era Vasari transformed the artist's role Artists came to be perceived as divinely inspired creators of images that convey profound moral and intellectual messages Their status was elevated from mere artisans to creators whose work brings beauty to the world and makes enduring contributions to cultural heritage

Matt Kavalier      **Gender, Honor, and Charity in Late Renaissance Florence** Philip Gavitt, 2011-08-22 This book examines the important social role of charitable institutions for women and children in late Renaissance Florence. Wars, social unrest, disease, and growing economic inequality on the Italian peninsula displaced hundreds of thousands of families during this period. In order to handle the social crises generated by war, competition for social position, and the abandonment of children, a series of private and public initiatives expanded existing charitable institutions and founded new ones. Philip Gavitt's research reveals the important role played by lineage ideology among Florence's elites in the use and manipulation of these charitable institutions in the often futile pursuit of economic and social stability. Considering families of all social levels, he argues that the pursuit of family wealth and prestige often worked at cross purposes with the survival of the very families it was supposed to preserve.
