Florida Modern Residential Architecture 1945 1970:

Florida Modern Jan Hochstim, 2004 This volume documents the best examples of Florida's residential architecture era which took place between 1941 and 1966 Many homes incorporate verandas porches and raised floors to open out to tropical vegetation and more importantly cooling breezes **It Happened By Design: The Life and Work of Arthur Q. Davis**, In 1947 a time in which few New Orleans based architects were designing modern architecture Arthur Q Davis b 1920 and his partner Nathaniel C Curtis established their practice in the city The Curtis and Davis firm is best known for designing the city's iconic Louisiana Superdome and such modernist landmarks as New Orleans's Rivergate Exhibition Center the Hyatt Regency and Marriott hotels and the Milton K Latter Library Davis has designed public and private works commissioned throughout the United States as well as in Saudi Arabia Germany Egypt the Netherlands and the United Kingdom Davis's firm has received more than fifty awards for design excellence and at age thirty eight Davis was made the youngest Fellow of the American Institute of Architects It Happened by Design provides an affecting and thorough narrative of Davis's life and achievements After serving in the Navy during World War II Davis graduated from Harvard University's School of Design on the G I Bill studying with Bauhaus school founder Walter Gropius In this book Davis explains how he fused Creole and Beaux Arts ideas together filtering those concepts through modernist aesthetics to create new forms while preserving the old The book shows Davis challenging the architectural status quo during the Cold War and beyond Whether discussing the politics of building in postwar Berlin Vodou masters in the Caribbean or struggles to modernize the skyline of his beloved New Orleans Davis crafts a narrative with wit and insight An introductory essay by J Richard Gruber places Davis's work in the context of American architecture and provides a thorough summation of the architect's oeuvre *Modern in the Middle* Susan Benjamin, Michelangelo Sabatino, 2020-09-01 The first survey of the classic twentieth century houses that defined American Midwestern modernism Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence *Modern in the Middle* Chicago Houses 1929 75 explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schweikher Harry Weese Keck Keck and William Pereira From the bold early example of the Battledock House by Henry Dubin 1930 to John Vinci and Lawrence Kenny's gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They also reveal how residential clients typically middle class professionals progressive in their thinking helped to trailblaze

modern architecture in America Though reflecting different approaches to site space structure and materials the examples in Modern in the Middle reveal an abundance of astonishing houses that have never been collected into one study until now

Architecture, 1890-1970 Joseph M. Siry,2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history Metropolis ,2005 **Book Review Index** ,2006
