## **Fleming Sandford:**

**Sir Sandford Fleming** Jean Murray Cole,2009-10-12 Sandford Fleming knew fame and many honours later in life but the path was not always easy His beginnings are revealed in these early diaries that record his thoughts as an eighteen year old leaving his family home in Scotland for Canada After unsuccessful attempts to get work as a surveyor he finally made important contacts in Toronto and through involvement with the Mechanics Institute and the Royal Canadian Institute became connected to the leading architects and engineers in the community His work on major projects including an ambitious plan for the Toronto Harbour and The Esplanade ultimately led to his first big railway appointment in 1852 Best known for his role in mapping the Canadian Pacific Railway he also designed Canada s first adhesive postage stamp the three penny Beaver was an early promoter of the Pacific cable and is recognized around the world as the inventor of Standard Time The recipient of many honours Fleming was knighted by Queen Victoria in 1897 **Sir Sandford Fleming** Doris Joyce

Unitt,Sandford Fleming,Andrew Osler,Edward McCoy,1968 **The Cosmic Time of Empire** Adam Barrows,2010-12-07 Combining original historical research with literary analysis Adam Barrows takes a provocative look at the creation of world standard time in 1884 and rethinks the significance of this remarkable moment in modernism for both the processes of imperialism and for modern literature As representatives from twenty four nations argued over adopting the Prime Meridian and thereby measuring time in relation to Greenwich England writers began experimenting with new ways of representing human temporality Barrows finds this experimentation in works as varied as Victorian adventure novels high modernist texts and South Asian novels including the work of James Joyce Virginia Woolf H Rider Haggard Bram Stoker Rudyard Kipling and Joseph Conrad Demonstrating the investment of modernist writing in the problems of geopolitics and in the public discourse of time Barrows argues that it is possible and productive to rethink the politics of modernism through the politics of time

J. Withers,2017-03-13 Charles Withers explains how the choice of Greenwich to mark 0 longitude solved problems of global measurement that had engaged geographers astronomers and mariners since ancient times This history is a testament to the power of maps the challenges of global measurement and the role of scientific authority in creating the modern world A *Cyclopaedia of Canadian Biography* George Maclean Rose,1886 Report Public Archives Canada,1903 **The Clocks Are Telling Lies** Scott Alan Johnston,2022-01-15 Until the nineteenth century all time was local time On foot or on

horseback it was impossible to travel fast enough to care that noon was a few minutes earlier or later from one town to the next The invention of railways and telegraphs however created a newly interconnected world where suddenly the time differences between cities mattered The Clocks Are Telling Lies is an exploration of why we tell time the way we do demonstrating that organizing a new global time system was no simple task Standard time envisioned by railway engineers such as Sandford Fleming clashed with universal time promoted by astronomers When both sides met in 1884 at the International Meridian Conference in Washington DC to debate the best way to organize time disagreement abounded If scientific and engineering experts could not agree how would the public Following some of the key players in the debate Scott Johnston reveals how people dealt with the contradictions in global timekeeping in surprising ways from zealots like Charles Piazzi Smyth who campaigned for the Great Pyramid to serve as the prime meridian to Maria Belville who sold the time door to door in Victorian London to Moravian town and other Indigenous communities that used timekeeping to fight for autonomy Drawing from a wide range of primary sources The Clocks Are Telling Lies offers a thought provoking narrative that centres people and politics rather than technology in the vibrant story of global time telling **Kelly's Handbook to the Upper Ten Thousand for 1878** ,1878 **Kelly's Handbook to the Upper Ten Thousand for ...** ,1878
