Flexible Innovation Jorge Niosi, Maryse Bergeron, Nathalie Hade, Michèle Sawchuck, 1995 Basing his study on in depth interviews with more than 130 companies across Canada Jorge Niosi analyses the scope of collaborative research activities both domestic and international in the fields of biotechnology electronics advanced materials and manufacturing of transportation equipment He describes successful patterns of collaboration obstacles and limitations and the role of public policy universities and government laboratories in technological alliances He compares Canadian partnerships and public policy with similar patterns in the United States Europe and Japan

Canada's National System of Innovation Jorge Niosi, 2000-04-18 Niosi looks at the history of Canada's National System of Innovation NSI particularly during the post war period illuminating the fact that during and after World War II over 30 research universities 150 government laboratories and dozens of government policies aimed at nurturing innovation in private firms academia and government organizations were developed He uses data obtained through questionnaire responses from all the large research and development organizations in Canada to analyse Canada's domestic system of innovation finding increasing collaboration between universities government laboratories and private firms He concludes that Canada has been quite successful in creating a national system of innovation and that the federal government through its initiatives and innovative techniques has been the main factor in the creation of this system

Innovation Systems in a Global Context Robert Anderson, Theodore Cohn, Chad Day, 1998-10-23 Focusing on North America *Innovation Systems in a Global Context* examines the nature of existing systems of innovation in the United States Canada and Mexico the conceptual questions surrounding the analysis of such systems trends towards the creation of supranational systems in East Asia Europe and North America and some of the ecological cultural economic and social problems confronting these large scale systems

Innovation Systems in a Global Context Robert S. Anderson, 1998 The integration of national economies in a global economic system has become a central feature of contemporary political social economic and cultural life However the mechanisms of such integration are not well understood In this collection of essays leading scholars in the area of evolutionary economics clarify the structure of innovation systems and discuss the role played by technological innovation in fostering economic growth and international integration

Innovation and Knowledge Creation in an Open Economy John R. Baldwin, Petr Hanel, 2003-07-03 This study of innovation its intensity the sources used for knowledge creation and its impacts is based on a

comprehensive survey of innovation of Canadian manufacturing firms Attention is paid to the different actors in the system who both compete with and complement one another The study investigates how innovation regimes differ across size of firm and across industries Owing to the high degree of foreign investment in Canada special attention is paid to the performance of foreign owned firms The innovation regime of Canadian innovators is compared with results of studies of other industrialized countries The picture of a typical innovator is a firm that combines internal resources and external contacts to develop a set of complementary strategies The study finds that innovating firms depend not only on R D but also on ideas and technology from various other sources both internal and external to the firm

Multinational Enterprises, Innovative Strategies and Systems of Innovation John Cantwell, José Molero, 2003-01-01 This volume explores the extent to which multinational enterprises MNEs are decentralizing the creation of new technological capabilities to various countries The book contends that technological strategies and innovation activities undertaken by firms are a critical part of the increasing internationalization of economic activity and that MNEs are the main actors for these changes It goes on to explain that MNEs must now effectively manage new technological assets in order to cope with the extensive changes in the nature of international competition

Innovation Systems, Policy and Management Jorge Niosi, 2018-08-02 Innovation is a systemic phenomenon in which institutions such as firms government entities and public policy incentives interact in complex ways Targeting specific sectors of an economy in order to improve the competitiveness and capabilities of domestic firms interventionist innovation policies can result in the structural transformation of host economies Numerous examples exist of such policies working successfully in emerging economies and they can be applied to any economic sector although they are commonly associated with highly innovative industries such as ICT biotechnology and nanotechnology Innovation Systems Policy and Management describes how institutions and markets can best be structured in order to promote innovation in key economic sectors Bringing together some of the leading figures in industrial policy and the economics of innovation and entrepreneurship this book encourages the reader to think in terms of systems and business dynamics when analysing innovation behaviour providing an approach useful to policy makers business leaders and scholars of evolutionary economics

The Globalization of Corporate R & D Prasada Reddy, 2000-08-24 In this study Prasada Reddy addresses several fundamental questions What are the driving forces behind this phenomenon Why are these new trends mainly visible among companies dealing with new science based technologies such as electronics or new materials And what are the implications of this trend for host countries The book presents important new research material in the form of detailed case studies of India and Singapore and offers an evolutionary theoretical basis for comprehending the processes at work As a result the book illuminates our understanding of both the behaviour of transnational corporations and the broader processes of globalization Globalization of Corporate R D will be of interest to those working in the fields of development studies economics or international business Jacket

ICIE 2016 Proceedings of the 4th International Conference on Innovation and

Entrepreneurship Dr Kenneth A. Grant and Dr Sean Wise, 2016 **Innovation and Employment** Charles Edquist, Leif Hommen, Maureen D. McKelvey, 2001-01-01 This book is an important addition to what can be broadly referred to as the national systems of innovation NSI approach The particular contribution of the book is in the examination of the employment effects of innovation something only indirectly considered hitherto It is a thorough integration of existing knowledge on the key employment implications of innovation Rachel Parker Labour and Industry This is a highly readable non technical book a highly clear and well argued book that should be useful for policymakers and higher education alike It brings together much of the most recent and useful literature in the area of innovation employment and related public policy It is an opportune addition to the existing documentation on the subject Journal of Economics Zeitschrift f r National konomie Which kinds of growth lead to increased employment and which do not This is one of the questions that this important volume attempts to answer The book explores the complex relationships between innovation growth and employment that are vital for both research into and policy for the creation of jobs Politicians claiming that more rapid growth would remedy unemployment do not usually specify what kind of growth is meant Is it for example economic GDP or productivity growth Growing concern over jobless growth requires both policymakers and researchers to make such distinctions and to clarify their employment implications The authors initially address their theoretical approach to and conceptualization of innovation and employment where the distinction between process and product innovations and between high tech and low tech goods and services are central They go on to address the relationship between innovation and employment using empirical material to analyse the effects that different kinds of innovations have upon job creation and destruction Finally the volume summarizes the findings and addresses conclusions as well as policy implications This book will be of great interest to those involved in research and policy in the fields of macroeconomics economic growth and employment industrial economics and innovation

Multinationals and Industrial Competitiveness John H. Dunning, Rajneesh Narula, 2005-01-01 This book provides an excellent overview of the changing relationship between multinationals and economic development as globalization has taken off and substantially altered the conditions for catching up as opposed to falling behind The authors move very effectively between the discussion of concepts that are crucial to understanding such changes and various empirical evidence on foreign direct investment trade inter firm relationships institutional settings and competitiveness John Cantwell Rutgers University US The globalisation of the world economy has undermined many of the old certainties regarding foreign direct investment flows Dunning and Narula use the concepts of alliance capitalism and technological evolution to analyse recent trends in international business They identify the challenges to government policymakers from regional integration and the consequent intensification of political competition to attract high technology investment This masterful and incisive analysis brings great clarity to perplexing issues and delineates a cogent industrial policy agenda for a globalised economy Mark Casson University of Reading UK This book offers an important contribution to the contemporary debate on the role of

multinational enterprises MNEs in economic development in an increasingly globalizing knowledge intensive and alliance based world economy Each of the chapters touches upon critical issues now facing the global economy They also address the growing importance of innovative activities of firms in promoting economic development and industrial restructuring as well as the role of FDI and cooperative agreements in furthering this goal Emphasis is placed on the increasingly significant role of national governments in promoting the intellectual capital of their indigenous resources and capabilities and of inter firm collaborative alliances Globalization and technological advances are reconfiguring the ingredients of the competitiveness of firms and nation states They are emphasizing the increasingly important role of both private and social institutions as determinants of the success of corporations and of the economic development of societies Covering a range of issues from economic development alliance capitalism government policies regional integration and industrial development this authoritative book will greatly appeal to academics and economists especially those interested in international business and management

Strategic alignment of innovation to business Frances Fortuin, 2023-08-28 This book addresses the crucial question for innovative prospector companies of how to bridge the gap between exploration and exploitation Whereas exploration deals with the search for new ideas and opportunities exploitation is about incrementally moving the performance bar a little bit higher Finding the right balance between exploration and exploitation is essential for the long term survival in today's highly dynamic business environments In a cross industry study of ten large multinational prospector companies which are world leaders in their respective industries it was discovered that the industry clockspeed the length between the subsequent product generations plays an essential role in bridging this gap The product generation life cycle PGLC typically ranged from just several months in short life cycle industries SLCIs such as electronics and the mobile phone industry to more than 10 years in long life cycle industries LLCIs such as aerospace and pharmaceuticals Our data indicate that companies operating in SLCIs face major problems in maintaining the long term knowledge base of their firms whereas companies in LLCIs tend to have problems in aligning their innovation strategy to the short term business needs To investigate the dynamics of strategic alignment in one of the LLCI companies a multinational supplier of industrial components a six year longitudinal study was conducted Here our data indicate that finding a funding structure that effectively balances exploration and exploitation combined with regular structured feedback between the exploration and exploitation function is needed to maintain long term strategic alignment CTOs and innovation managers can use this book by first establishing the industry clockspeeds in their respective industries or product ranges and then benchmark their innovation processes to those of the first class SLCI or LLCI prospector companies included in this book

Globalization and Technology Rajneesh Narula, 2015-03-03 In this book Rajneesh Narula examines the interdependence of globalization and technological innovation at two levels first between locations by examining the role of cross border initiatives in the innovation process second between corporate entities by studying the dynamics of inter firm R but knowledge creation

suffers from inertia and remains concentrated in a few locations Draws on a wide variety of data at the firm and national level in the sphere of R D and technological innovation Spells out important lessons for both policy makers and managers on industrial policy as well as the organisation of research and development by firms *The Economic and Social Dynamics of Biotechnology* John de la Mothe, Jorge Niosi, 2012-12-06 Biotechnology the integrated use of biochemistry microbiology and chemical engineering for the technological application of the capabilities of microbes and cultured tissue cells is quickly becoming pervasive and challenging rapidly developing both new techniques and industries The Economic and Social Dynamics of Biotechnology a joint project between Statistics Canada the Program of Research on Innovation Management and Economy PRIME at the University of Ottawa and CIRANO at the University of Quebec in Montreal brings together economic social and statistical views on the dynamics of this set of emerging technologies It examines the costs as well as the benefits the challenges as well as the choices of the rapidly expanding science based world of biodiversity biopharmaceuticals and bioinformatics and it provides suggestions for future work and research This project fits into an ongoing research program at Statistics Canada to develop meaningful indicators for science technology and innovation in a technology intensive economy This book tells the story of the inner workings of innovation systems technological systems and competence blocs in the production use and diffusion of knowledge **Global Change and Intellectual Property**

Agencies G. Bruce Doern, 1999 Global change affects all areas of public policy and crucial aspects of governing institutions National and international intellectual property IP agencies are increasingly at the fulcrum of such change but are among the least well examined of governing and policy realms Among the oldest agencies of government they are moving from a long era of contented obscurity to that of increasing political and economic exposure and controversy This is the first book to examine IP agencies in the context of this transformation Taking a basic institutional perspective the book examines the changes in and relationships among four national and international IP agencies the patent offices of the US UK Canada and Australia the World Intellectual Property Office the European Patent Office and the World Trade Organization Focusing on the 1990s the book traces institutional changes that centre on the core trade off in intellectual property policy between protection and dissemination of intellectual property These are examined in relation to the two broad clusters of interests that operate around the protection versus dissemination functions The former is dominated by big business and the IP professions and the latter by much more dispersed and emerging interests **Canadian Books in Print. Author and Title Index**, 1975 **Sociological Abstracts** Leo P. Chall, 1998 *Current Sociology*, 2001 Vols 1 4 contain v 1 4 of

International bibliography of sociology *Asleep at the Switch* Bruce Smardon, 2014-11-01 Since 1960 Canadian industry has lagged behind other advanced capitalist economies in its level of commitment to research and development *Asleep at the Switch* explains the reasons for this underperformance despite a series of federal measures to spur technological innovation in Canada Bruce Smardon argues that the underlying issue in Canada's longstanding failure to innovate is structural and can

be traced to the rapid diffusion of American Fordist practices into the manufacturing sector of the early twentieth century. Under the influence of Fordism, Canadian industry came to depend heavily on outside sources of new technology, particularly from the United States. Though this initially brought in substantial foreign capital and led to rapid economic development, the resulting branch plant industrial structure led to the prioritization of business interests over transformative and innovative industrial strategies. This situation was exacerbated in the early 1960s by the Glassco framework, which assumed that the best way for the federal state to foster domestic technological capacity was to fund private sector research and collaborative strategies with private capital. Remarkably, and with few results, federal programs and measures continued to emphasize a market-oriented approach. Asleep at the Switch details the ongoing attempts by the federal government to increase the level of innovation in Canadian industry but shows why these efforts have failed to alter the pattern of technological dependency.
