The Flight of Winged Wolf Heather Hughes-Calero, 1991 **The Biomechanics of Insect Flight** Robert Dudley, 2018-06-05 From the rain forests of Borneo to the tenements of Manhattan winged insects are a conspicuous and abundant feature of life on earth Here Robert Dudley presents the first comprehensive explanation of how insects fly The author relates the biomechanics of flight to insect ecology and evolution in a major new work of synthesis The book begins with an overview of insect flight biomechanics Dudley explains insect morphology wing motions aerodynamics flight energetics and flight metabolism within a modern phylogenetic setting Drawing on biomechanical principles he describes and evaluates flight behavior and the limits to flight performance The author then takes the next step by developing evolutionary explanations of insect flight He analyzes the origins of flight in insects the roles of natural and sexual selection in determining how insects fly and the relationship between flight and insect size pollination predation dispersal and migration Dudley ranges widely from basic aerodynamics to muscle physiology and swarming behavior but his focus is the explanation of functional design from evolutionary and ecological perspectives The importance of flight in the lives of insects has long been recognized but never systematically evaluated This book addresses that shortcoming Robert Dudley provides an introduction to insect flight that will be welcomed by students and researchers in biomechanics entomology evolution ecology and behavior *A Lonely Kind of War* Marshall Harrison, 2010-12-15 From retired Air Force pilot Marshall Harrison comes a remarkable memoir of aerial warfare in Vietnam In his third combat tour Harrison found himself converted from the high performance world of jets to the awkward looking OV 10 Bronco and assigned as a FAC forward air controller A captivating tale of valor brotherhood and patriotism unravels in the pages of *A Lonely Kind of War* Forward Air Controller Vietnam a posthumous release by this published author through Xlibris Harrison is a born story teller There is excitement suspense and humor in this account of the life of a FAC They were a small group of dedicated pilots flying lightly armed prop driven aircrafts in South Vietnam Considered to be the eyes and ears of the attack aircraft their job was to fly low and slow find fix and direct airstrikes against an elusive enemy concealed by the heavy rainforest and jungles an area the FACs referred to as the Green Square The flying scenes are riveting learning to fly the maneuverable Bronco clearing in the fast movers to drop massive 750 lb bombs without causing injury to the friendlies and conducting covert operation into Cambodia over the fence with the mad men in the green beanies On one of these secret missions he is shot down and spends a harrowing night in the jungle FACs lived with the troops in the field and flew from unimproved airstrips they virtually controlled the aerial battlefields of South Vietnam Their losses were staggering and they usually died alone **Tales of the Flying Tigers** Daniel Ford, 2016-04-22 What God abandoned these defended And saved the sum of things for pay In the bleak winter of 1941 1942 no American or British force could stem the tide in Southeast Asia as the Philippines Thailand Malaya and Singapore fell to the victorious Japanese Only in Burma was there a ray of hope There over beleaguered Rangoon a few
