American Book Publishing Record R.R. Bowker Company, 1978 **Human Factors in Design and Control of Aircraft** ,1971 **Flying Magazine** ,1969-03 **Women Who Fly** Serinity Young, 2018-01-02 Flying women are a common motif in the world's myths and religions. Not necessarily winged, these women elicit reactions of fear, fascination, and ambivalence, and in so doing reveal much about the perceptions of female power and sexuality through the ages. The first book to systematically chronicle the figure of the flying woman in myth, literature, and art, *Women Who Fly* sheds new light on the ways in which women have both influenced and been understood by society and religious traditions around the world.

Transactions Society of Automotive Engineers, 1920 **Aerial Age Weekly** ,1922 **World War I Aviation** James Philip Noffsinger, 1997 This work contains annotated listings of books in French, German, and Italian, as well as a greatly expanded section of books in English covering the period from 1914 to 1994, which includes privately printed books and limited editions.

Wings of War David Fairbank White, Margaret Stanback White, 2022-12-06 The incredible untold story behind the rise of the P-51 Mustang, the World War II fighter plane that destroyed the Luftwaffe and made D-Day possible. Aviation buffs will cheer this high-flying saga. Publishers Weekly: A fascinating book about passion and innovation. Walter Isaacson: An essential book for those who appreciate tales of military bravery and also for all seeking understanding of decision making under pressure. A major contribution. E.J. Dionne Jr: When the P-51 Mustang began tearing across European skies in early 1944, the Allies had been losing the air war for years. Staggering numbers of bomber crews, both British and American, had been shot down and killed thanks to the Luftwaffe's superior fighter force. Not only did the air war appear grim, but any landing of troops in France was impossible while German fighters hunted overhead. But behind the scenes, a team of visionaries had begun to design a bold new type of airplane, one that could outrun and outmaneuver Germany's best. *Wings of War* is the incredible true story of the P-51 Mustang fighter and the unlikely crew of designers, engineers, test pilots, and army officers who brought it from the drafting table to the skies over World War II. This is hardly a straightforward tale of building an airplane; for years, the team was stymied by corruption within the defense industry and stonewalled by the Army Air Forces, who failed to understand the Mustang's potential. But when squadrons of Mustangs were finally unleashed over Hitler's empire, the Luftwaffe was decimated within months, clearing the skies for D-Day. A compelling character-focused narrative replete with innovation, determination, and bravery, *Wings of War* is the never-before-told story of the airplane that truly changed the course of World War II.

Flight and the Aircraft Engineer ,1910 **New York Magazine** ,1982-10-11 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea.
