Flippy The Dolphin:

Flippy the Dolphin Karen Higham, 1979 **Reel Nature** Gregg Mitman, 2012-09-01 Winner of the History of Science Society's Watson Davis and Helen Miles Davis Prize in the History of Science From the early exploits of Teddy Roosevelt in Africa to blockbuster films such as *March of the Penguins* Gregg Mitman's *Reel Nature* reveals how changing values scientific developments and new technologies have come to shape American encounters with wildlife on and off the big screen Whether crafted to elicit thrills or to educate audiences about the real life drama of threatened wildlife nature films then and now have had an enormous impact on how Americans see think about consume and struggle to protect animals across the globe For more information about the author go to <http://gmitman.com> **Hamlet's Castle** Gordon H. Mills, 2014-03-07 *Hamlet's Castle* is both a theoretical and a practical examination of the interactions that take place in a literary classroom The book traces the source of literature's power to the relationship between its illusional quality and its abstract meaning and relates these elements to the process by which a group typically an academic class forms a judgment about a literary work In focusing on the importance of the exchange of ideas by readers Gordon Mills reveals a new way of looking at literature as well as a different concept of the social function of the literary classroom and the possible application of this model to other human activities The three fundamental elements that constitute Mills's schema are the relationship between a reader and the illusional quality of literature the relationship between a reader and the meaning of a text and the concept of social experience within the environment of a text The roles of illusion and meaning in a text are explored in detail and are associated with areas outside literature including science and jurisprudence There is an examination of the way in which decisions are forced by peers upon one another during discussion of a literary work an exchange of opinion which is commonly a source of pleasure and insight sought for its own sake In the course of his study Mills shows that the act of apprehending a literary structure resembles that of apprehending a social structure From this relationship he derives the social function of the literary classroom In combining a theoretical analysis with the practical objective of determining what value can be found in the study of literature by groups of people Mills has produced a critical study of great significance *Hamlet's Castle* will change concepts about the purpose of teaching literature affect the way in which literature is taught and become involved in the continuing discussion of the relationship of literary studies to other disciplines **Super Special: Going Overboard!** Nancy Krulik, 2012-03-01 Ten years of switcheroos Happy anniversary Katie Kazoo With indoor mini golf a chance to swim with dolphins and her best friend Suzanne onboard Katie's cruise vacation sounds like an ocean of fun But of course the magic wind appears twice in this Super Special and blows everything off course Young readers love the black and white illustrations that bring this fun chapter book series to life **Dolphins** Susan Casey, 2018 A thrilling journey into the spiritual scientific and sometimes threatened world of dolphins Includes an 8 page photo insert explores the extraordinary world of dolphins in an interesting and accessible format that engages as well as entertains *Voices in the Ocean* Susan

Rozwadowski, 2018-10-15 Much of human experience can be distilled to saltwater tears sweat and an enduring connection to the sea In *Vast Expanses* Helen M. Rozwadowski weaves a cultural environmental and geopolitical history of that relationship a journey of tides and titanic forces reaching around the globe and across geological and evolutionary time Our ancient connections with the sea have developed and multiplied through industrialization and globalization a trajectory that runs counter to Western depictions of the ocean as a place remote from and immune to human influence Rozwadowski argues that knowledge about the oceans created through work and play scientific investigation and also through human ambitions for profiting from the sea has played a central role in defining our relationship with this vast trackless and opaque place It has helped us to exploit marine resources control ocean space extend imperial or national power and attempt to refashion the sea into a more tractable arena for human activity But while deepening knowledge of the ocean has animated and strengthened connections between people and the world's seas to understand this history we must address questions of how by whom and why knowledge of the ocean was created and used and how we create and use this knowledge today Only then can we forge a healthier relationship with our future sea
