Artists of the Floating World Rob Burton, 2007 This work analyzes the fiction of four contemporary multicultural writers who render a floating world in which cultures converge or collide in unexpected exciting and dangerous ways The novels and short stories of Kazuo Ishiguro Bessie Head Bharati Mukherjee and Salman Rushdie explore a literal and metaphorical floating world adapted from the Japanese concept of ukiyo a still point between briefly held earthly pleasures and spiritual immutability where the characters like their authors are poised between conflicting worlds cultures and traditions The manner in which these four authors articulate such a floating experience Burton argues enriches our understanding and appreciation of the increasingly interconnected world around us

Picturing the Floating World Julie Nelson Davis, 2021-08-31 Today we think of ukiyo e the pictures of the floating world as masterpieces of Japanese art highly prized throughout the world Yet it is often said that ukiyo e were little appreciated in their own time and were even used as packing material for ceramics In *Picturing the Floating World* Julie Nelson Davis debunks this myth and demonstrates that ukiyo e was thoroughly appreciated as a field of artistic production worthy of connoisseurship and canonization by its contemporaries Putting these images back into their dynamic context she shows how consumers critics and makers produced and sold appraised and collected and described and recorded ukiyo e She recovers this multilayered world of pictures in which some were made for a commercial market backed by savvy entrepreneurs looking for new ways to make a profit while others were produced for private coterie and high ranking connoisseurs seeking to enrich their cultural capital The book opens with an analysis of period documents to establish the terms of appraisal brought to ukiyo e in late

eighteenth century Japan mapping the evolution of the genre from a century earlier and the development of its typologies and the creation of a canon of makers both of which have defined the field ever since Organized around divisions of major technological and aesthetic developments the book reveals how artistic practice and commercial enterprise were intertwined throughout ukiyo e s history from its earliest imagery through the twentieth century The depiction of particular subjects in and for the floating world of urban Edo and the process of negotiating this within the larger field of publishing are examined to further ground ukiyo e as material culture as commodities in a mercantile economy Picturing the Floating World offers a new approach a critical yet accessible analysis of the genre as it was developed in its social cultural and political milieu The book introduces students collectors and enthusiasts to ukiyo e as a genre under construction in its own time while contributing to our understanding of early modern visual production *Pictures of the Floating World* Amy Lowell,1919

Intergenerational Complexes in Analytical Psychology Samuel L. Kimbles, 2021-04-12

Intergenerational Complexes in Analytical Psychology The *Suffering of Ghosts* draws attention to human suffering and how it relates to unacknowledged and unrecognized traumatic cultural histories that continue to haunt us in the present. The book shows the many ways that our internal lives are organized and patterned by both racial, ethnic and national identities and personal experiences. This book shows how the cultural unconscious with its multiple group dynamics, identities, nationalities, seething differences of conflicts, polarizations and individual personalities are organized by cultural complexes and narrated by archetypal story formations which the author calls phantom narratives. The emotional dynamics generated constitute potential transitional spaces or holding containers that allow us to work with these issues psychologically at both the individual and group levels, offering opportunities for healing. The chapters of the book provide numerous examples of the applications of these terms to natural and cultural catastrophes as well as expressions as uncanny phenomena.

Intergenerational Complexes in Analytical Psychology is essential reading for analytical psychologists, Jungian psychotherapists and other professionals seeking to understand the impact of intergenerational trauma on individuals and groups. It is also relevant to the work of academics and scholars of Jungian studies, sociology, trauma studies, politics and social justice.

Voegelinian Readings of Modern Literature Charles R. Embry, 2011-05-16

The work of renowned thinker Eric Voegelin is largely rooted in his literary sensibility. Voegelin's contributions to the field of philosophy grew from the depths of his knowledge of history's most important texts from ancient to modern times. Many of the concepts he emphasized, such as participatory experience and symbolization in philosophy, have long been significant to literary criticism as well as philosophical study. Voegelin himself even ventured into the field of criticism, publishing a critical examination of Henry James's *The Turn of the Screw* in 1971. Since it is so strongly influenced by the written record of man's search for meaning, Voegelinian thought makes an ideal framework for the study of twentieth-century literature. For *Voegelinian Readings of Modern Literature*, scholar Charles R. Embry has collected essays that consider particular pieces of literature in light of the philosopher's work. These essays supply a theoretical grounding for the reading of novels, poems and plays and reveal how the Voegelinian perspective exposes the existential and philosophical dimensions of the literary works themselves. As a unit, this collection of essays shows how modern pieces of literature can symbolize their creators' participation in the human search for the truth of existence, just as myths, philosophical works and religious texts always have. Voegelin's primary concern as a philosopher was to expose the roots of the disturbances of the modern era: religious conflict, imperialism, war, so that the sources of order leading to meaning are revealed. The openness of Voegelinian thought and the many ways he considered the levels of reality generate intriguing themes for literary criticism. In these essays, noted Voegelin scholars focus

on American and European literary artists from the 1700s through the late twentieth century including Emily Dickinson Henrik Ibsen Thomas Carlyle D H Lawrence Marcel Proust and Hermann Broch While the intersection of the work of Eric Voegelin and literature has been a part of Voegelin scholarship for decades this book explores that relationship in an extended form Through a broad collection of thoughtful essays Voegelinian Readings of Modern Literature reveals how much Voegelin did to break down the barriers between literature and philosophy and makes an engaging contribution to Voegelin scholarship
