Britons and their Battlefields Ian Atherton,2024-08-19 While much attention has been paid to the commemoration of conflict in the twentieth century this book is the first to consider conflict memory in the long term arguing that modern practices were not created out of the mud of the trenches but evolved from much longer practices From the fourteenth century to the present day this work analyses the changing commemoration and memories of British battlefields at home and overseas from Bannockburn 1314 to Bosworth 1485 to Basra 2003 9 Across these seven centuries there has been a series of recurring post battle rituals that have shaped and continue to shape memories of conflict Three distinct but overlapping periods of memory can be delineated In the later Middle Ages battlefields were consecrated by the burial of the fallen and often by the erection of a battlefield cross or chapel or chantry to pray for the dead The second phase began with the Protestant Reformation in the 1530s when pilgrimage and prayers for the dead were abolished and battlefield chantries were dissolved and many battlefield crosses were demolished Memories shifted from the dead to the living especially the bodies of surviving veterans who commemorated the conflict by their wounds and from soil and stone to print and ink The third phase began in the eighteenth century when antiquaries and others established new monuments on past battlefields Monuments to survivors and the dead were established on contemporary battlefields such as Waterloo once again hailed as sacred ground hallowed by bloodshed fit destinations for a pilgrimage Not just officers but ordinary soldiers began to be memorialized by name on the battlefield culminating in the cult of the names of the dead enshrined by the creation of the War Graves Commission in 1917 and the idea that battlefields should be preserved unchanged as seen in modern heritage management Drawing on a wide variety of literary and historical sources and taking a uniquely long term approach the book explores and links memory making practices from across the period to reconsider the ways in which battlefields are commemorated and re commemorated In so doing it makes a unique contribution to a wide range of historiographical fields British history since the fourteenth century memory studies heritage studies landscape history conflict archaeology and military history

Flodden Peter Reese,2003 Boosted by the success of naval campaigns in the Western Isles and support for the Danes James IV in a misguided attempt to support France when that country was invaded by Henry VIII's troops ordered the Scottish army across the Border At Flodden he faced English troops under the Earl of Surrey and although having a big advantage in terms of numbers suffered a defeat so humiliating that it dented Scotland's confidence for centuries James IV lost his life at Flodden and also took with him the flower of the Scottish nobility in addition to as many as 10 000 Scottish soldiers both Highland and Lowland It was nothing less than catastrophe In this re assessment of one of Europe's last medieval battles Peter Reese considers Flodden against the patterns of both countries traditional military rivalry and the personal animosity that existed between James and Henry He discusses the men who made up both armies their contrasting weaponry systems of command and military tactics and considers the major part the battle played in the road to the unification of Scotland and England A number of maps allow the reader to follow the events of the battle in close detail

Military History Glen C. Forrest,A. A. Evans,David Gibbons,2011-08-15 Chronicles battles military campaigns and wars
 throughout history from the skirmishes of the first empires of ancient Mesopotamia to the armed conflicts in the Middle East
 being waged today **England and Scotland, 1286-1603** Andy King,Claire Etty,2015-10-05 On a stormy night in 1286 a
 man fell off his horse and broke his neck setting two kingdoms on a 300 year course of war Edward I seized the opportunity
 to pursue English claims to overlordship of Scotland William Wallace and Robert Bruce headed the patriotic resistance Their
 collision shaped the history politics and nationhood of the two realms and dragged in a third with the formation of the Franco
 Scottish Auld Alliance It also created a unique society on both sides of the Anglo Scottish border What prevented peace from
 breaking out And how at the dawn of the seventeenth century could a Scottish king succeed peacefully and unopposed to the
 Auld Enemy s throne Andy King and Claire Etty trace the fractious relationship between England and Scotland from the
 death of Alexander III to the accession of James VI as James I of England Spanning medieval and early modern history this
 book is the ideal starting point for students studying Anglo Scottish relations up to the Union A Cumulative Bibliography
of Medieval Military History and Technology Kelly DeVries,2001-11-01 There is perhaps no other more lively area for study in
 medieval history than medieval military history with its attendant and complementary field the history of medieval military
 technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other
 historical genre of medieval studies or chronological period of military history What this has meant is that it is now more
 difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which
 covers what has previously been written and which in turn can assist the scholar both the more experienced academic and
 the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing
 library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references
 to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which
 centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ
 from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity

especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense
