## Flora Of Chamoli:

Flora of Chamoli B. D. Naithani, 1984      *Glimpses in Botany* K. G. Mukerji, B. P. Chamola, 2000      Guide to Standard Floras of the World David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations and author and geographical indexes.

**Flora of Chamoli** B. D. Naithani, 1985      **Orchid Biology: Recent Trends & Challenges** Shaik Mahammad Khasim, Sadanand Nagesh Hegde, María Teresa González-Arno, Kanchit Thammasiri, 2020-01-31 This book on Orchid Biology: Recent Trends, Challenges reviews the latest strategies for the preservation and conservation of orchid diversity and orchid germplasm. It is an outcome of the Proceedings of the International Symposium on Biodiversity of Medicinal Plants: Orchids Emerging Trends and Challenges held on 9-11 February 2018 at Acharya Nagarjuna University, India. In addition, eminent orchid experts from around the globe were invited to contribute to this book. All chapters were peer-reviewed by international experts. The Orchidaceae are one of the largest families of flowering plants, comprising over 700 genera and 22,500 species and contributing roughly 40 percent of monocotyledons. They also represent the second largest flowering plant family in India with 1,141 species in 166 genera and contribute roughly 10% of Indian flora. Orchids comprise a unique group of plants and their flowers are among the most enchanting and exquisite creations of nature. Phylogenetically and taxonomically, the Orchidaceae are considered to be a highly evolved family among angiosperms. They show incredible diversity in terms of the shape, size and colour of their flowers and are of great commercial importance in floriculture markets around the globe. Millions of cut flowers of *Cymbidium*, *Dendrobium*, *Cattleya*, *Paphiopedilum*, *Phalaenopsis*, *Vanda* etc. besides potted orchid plants are sold in Western Countries and thus the orchid cut flower industry has now become a multimillion-dollar business in Europe, the USA and South East Asia. Besides their ornamental value, orchids hold tremendous pharmaceutical potential. Root tubers of *Habenaria edgeworthii* form an important component of the *Astavariga* group of drugs in Ayurvedic medicine. It is an established fact that tubers of some terrestrial orchids have been used to treat diarrhoea, dysentery, intestinal disorders, cough, cold and tuberculosis. Some orchids, particularly those belonging to the genera *Aerides*, *Arachnis*, *Cattleya*, *Cymbidium*, *Dendrobium*, *Epidendrum*, *Oncidium*, *Paphiopedilum*, *Phalaenopsis*, *Renanthera*, *Vanda* etc. have been extensively used to

produce internationally acclaimed hybrids Yet paradoxically Indian orchids are victims of their own beauty and popularity As a result their natural populations have been declining rapidly because of unbridled commercial exploitation in India and abroad In fact some orchids are now at the verge of extinction e g *Renanthera imschootiana* *Diplomeris hirsuta* *Paphiopedilum fairrieianum* *Cypripedium elegans* *Taeniophyllum andamanicum* etc Given the global importance of orchids in terms of securing human health and wealth this comprehensive compilation prepared by international experts is highly topical Its content is divided into five main sections I Cryopreservation Biotechnology II Orchid Biodiversity Conservation III Anatomy Physiology IV Pollination Biology and V Orchid Chemicals Bioactive Compounds All contributions were written by eminent orchid experts professors from around the world making the book a valuable reference guide for all researchers teachers orchid enthusiasts orchid growers and students of biotechnology botany pharmaceutical sciences and ethnomedicine It will be equally valuable for readers from the horticultural industry especially the orchid industry agricultural scientists and policymakers

**An Overview** Mukesh Kumar,G.S. Paliwal,2011-07-15 India s phytodiversity is one of the most significant in the world India is one of the twelve mega biodiversity centers in the world and also an important center of origin of agrobiodiversity It is therefore very important to study document and conserve the plant wealth of India and also of the world before its possible extinction There are convincing scientific economic and sociological reasons for giving priority to the conservation of the major centers of plant diversity throughout the world The strategies to conserve the biodiversity include establishment of protected area network and corridors with emphasis on appropriate levels of management reduction of anthropogenic pressure on natural populations by cultivating them elsewhere programmes of augmentation reintroduction and introduction of target taxa restoration of degraded habitats etc The conservation strategies can be either in situ conservation of genetic resources within their ecosystem and natural habitat or ex situ conservation of components of genetic material of biological diversity outside their natural habitat The choice of conservation strategy depends upon the nature of the material to be conserved i e the life cycle and mode of reproduction size of individual population and ecological status Ex situ techniques include the establishment of botanical and zoological gardens banks of pollen seed tissue culture DNA etc Establishment of forest reserves national parks protected areas and on farm conservation of valuable plant varieties is being promoted to facilitate their in situ conservation

*Phytomedicine* Parimelazhagan Thangaraj,2020-04-22 Phytomedicine has become more important and gained constant improvement today for the betterment of health Herbal medicine plays a significant role in the development of new drugs contrary to the modern medicinal systems For more than a decade there has been a drastic improvement in phytomedicine across the world This growth has reached a higher level in development by pharmaceutical industries everywhere People have drifted toward herbal medication and practices for their food and health care Therefore in order to create abundant interest in the research of phytosciences this book is one of the better reference tools The bioactive compounds in plants need to be explored to know the scientific value and therapeutic properties of the medicinal plants against many diseases This book contains chapters that are relevant to the advanced research in herbal medicines and will enlighten readers to the importance of medicinal plants as daily sources of nutrition and cures for diseases This book highlights the unique features of the plants that have not been studied so far for their therapeutic potential To prove the efficacy of medicinal plants they have to be studied examined and scientifically verified Hence this book will better serve the researchers working under different aspects of phytomedicine Features The information provided through scientific validation is useful to study the pharmacological activity of herbals and their administration in the modern era The readers can find clear understanding in the research and development of phytopharmaceutical drugs The ideas incorporated in each chapter reveal the knowledge gained in studying the biological activities of the compounds present in the plant which are indeed most worthy for the development of drugs The harvesting of new ideology toward modern scientific technologies that are employed in the field of pharmacological research
