## Flora Of The Malay Peninsula Volume 5:

*Guide to Standard Floras of the World* David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations and author and geographical indexes.

**The Flora of the Malay Peninsula. Volume 5, Monocotyledones (concluded), Gymnospermeae, General Indices**, 1967 *Journal of the Royal Society of Arts* Royal Society of Arts (Great Britain), 1924 *The Bamboos of the World* D. Ohrnberger, 1999-01-29 Bamboos constitute one of a few select categories of plants which are taxonomically related, very rich in species and of vital economic and ecological importance. Since the early 20th century the accepted number of species of bamboos world wide has tripled. However, until now information was scattered through numerous, often not easily available publications. *The Bamboos of the World* is the first comprehensive taxonomic as well as horticultural reference work that provides basic information on bamboos world wide, whether they are wild or cultivated, well known or rather unknown. The work, based on bamboo literature, facilitates access to further data by citation and a comprehensive bibliography. Among the main data included are botanical names with synonyms and geographical distribution of genera and species varieties with their distinctive characters, common bamboo names, plant introductions to the West, plant size and uses. The distribution of genera is mapped. *The Bamboos of the World* presents a wealth of essential information in an accessible and structured manner. It gives the opportunity to check under what names and where relevant information on any bamboo can be found. For the researcher with management and development interests, it provides a convenient means of basing bamboo resource on a sound understanding of generic and species relationships with names that appear in earlier literature put into context. The work should prove to be invaluable for those interested in the morphology, taxonomy, distribution and cultivation of bamboos. It should support botanical, forestry, horticultural and ecological research, training and resource management.
