**Flora of Agasthyamala** N. Mohanan, M. Sivadasan, 2002 Agasthyamala situated at Thiruvananthapuram District of Kerala India Biodiversity Hotspot of the Western Ghats and Sri Lanka T. Pullaiah, 2024-02-20 Biodiversity is declining at an alarming rate due to anthropogenic activities around the world This book is the first volume in the new series Biodiversity Hotspots of the World which highlights the 36 hotspot regions of the world regions that were designated as reaping maximum benefit from preservation efforts This series is our humble attempt to document these hotspots as a conservation and preservation measure This first volume in the series focuses on the Western Ghats and Sri Lanka construed as forming a community of species because of their shared biogeographical history The volume explores the diversity and conservation efforts of the extraordinarily rich species found here including plants many of which are found nowhere else in the world forests which face tremendous population pressure and have been dramatically impacted by demands for timber and agricultural land as well as the hotspot s diverse mammals birds insects and amphibian species and more The volumes in this series will be essential resources for researchers and practitioners in the fields of conservation biology ecology and evolution

**Ethnopharmacology and Biodiversity of Medicinal Plants** Jayanta Kumar Patra, Gitishree Das, Sanjeet Kumar, Hrudayanath Thatoi, 2019-08-05 Ethnopharmacology and Biodiversity of Medicinal Plants provides a multitude of contemporary views on the diversity of medicinal plants discussing both their traditional uses and therapeutic claims This book emphasizes the importance of cataloging ethnomedical information as well as examining and preserving the diversity of traditional medicines It also discusses the challenges present with limited access to modern medicine and the ways in which research can be conducted to enhance these modern practices The book also explores the conservation procedures for endangered plant species and discusses their relevance to ethnopharmacology Each chapter of this book relays the research of experts in the field who conducted research in diverse landscapes of India providing a detailed account of the basic and applied approaches of ethnobotany and ethnopharmacology The book reviews multiple processes pertaining to medicinal plants such as collecting the traditional therapeutic values and validation methods It also explores developments in the field such as the diversity and medicinal potential of unexplored plant species and applications in drug formulation to fight against anti microbial resistance AMR **Conservation and Utilization of Threatened Medicinal Plants** P.E.

Rajasekharan, Shabir Hussain Wani, 2020-07-20 Medicinal plants are globally valuable sources of herbal products Plant based remedies have been used for centuries and have had no alternative in the western medicine repertoire while others and their bioactive derivatives are in high demand and have been the central focus of biomedical research As Medicinal plants move from fringe to mainstream with a greater number of individuals seeking treatments free of side effects considerable attention has been paid to utilize plant based products for the prevention and cure of human diseases An unintended consequence of this increased demand however is that the existence of many medicinal plants is now threatened due to their small

population size narrow distribution area habitat specificity and destructive mode of harvesting In addition climate change habitat loss and genetic drift have further endangered these unique species Although extensive research has been carried out on medicinal and aromatic plants there is relatively little information available on their global distribution patterns conservation and the associated laws prevailing This book reviews the current status of threatened medicinal plants in light of increased surge in the demand for herbal medicine It brings together chapters on both wild non cultivated and domestic cultivated species having therapeutic values Thematically conventional and contemporary approaches to conservation of such threatened medicinal plants with commercial feasibility are presented The topics of interest include but not limited to biotechnology sustainable development in situ and ex situ conservation and even the relevance of IPR on threatened medicinal plants We believe this book is useful to horticulturists botanists policy makers conservationists NGOs and researchers in the academia and the industry sectors

*Ferns* Johnson Marimuthu, Helena Fernández, Ashwani Kumar, Shibila Thangaiah, 2022-05-06 Ferns are representative of genetic inheritance of great value as they include species of ancient vascular plants which have direct connection with the evolution of plant life on Earth This volume brings a selection of chapters covering a range of themes on fern biology its development and growth useful protocols for propagation and conservation purposes genetic diversity as well as medicinal and environmental applications The content is organized into four parts Biotechnology of Ferns Propagation of Ferns Ferns in Medicines Environmental Regulation This wide spectrum of the contributions provides quick access to information on the enormous potential of this plant group This book brings together most recent research work and novel techniques which is far from the traditional perspective usually followed It is of interest to teachers researchers and botanists Also the book serves as additional reading material for undergraduate and graduate students of agriculture botany forestry and ecology

*Thidiazuron: From Urea Derivative to Plant Growth Regulator* Naseem Ahmad, Mohammad Faisal, 2018-03-23 Plant biotechnology is a most interesting branch for academicians and researchers in recent past Now days it becomes a very useful tool in agriculture and medicine and is regarded as a popular area of research especially in biological sciences because it makes an integral use of biochemistry molecular biology and engineering sciences in order to achieve technological application of cultured tissues cell and microbes Plant tissue culture PTC refers to a technique of cultivation of plant cells and other parts on artificial nutrient medium in controlled environment under aseptic conditions PTC requires various nutrients pH carbon source gelling agent temperature photoperiod humidity etc and most importantly the judicious use of plant growth regulators Various natural adenine and phenyl urea derivatives are employed for the induction and proliferation of different types of explants Several phenyl urea

derivatives were evaluated and it was observed that thidiazuron n phenyl N 1 2 3 thidiazol 5 ulrea was found to be the most active among the plant growth regulators Thidiazuron TDZ was initially developed as a cotton defoliant and showed high cytokinin like activity In some examples its activity was 100 times more than BA in tobacco callus assay and produces more number of shoots in cultures than Zeatin and 2iP TDZ also showed major breakthrough in tissue culture of various recalcitrant legumes and woody species For the last two decades number of laboratories has been working on TDZ with different aspect and number of publications has come out To the best of our knowledge there is no comprehensive edited volume on this particular topic Hence th e edited volume is a deed to consolidate the scattered information on role of TDZ in plant tissue culture and genetic manipulations that would hopefully prove informative to various researches Thidiazuron From Urea Derivative to Plant Growth Regulator compiles various aspects of TDZ in Plant Tissue Culture with profitable implications The book will provides basic material for academicians and researchers who want to initiate work in this fascinating area of research The book will contain 26 chapters compiled by International dignitaries and thus giving a holistic view to the edited volume     The Indian Forester ,2009     **Rheede** ,2001     **Taxonomy and Plant Conservation** K.
