Under the Great Bear 1900 Kushlan, 2020-08-11 For centuries the southernmost region of the Florida peninsula was seen by outsiders as wild and inaccessible one of the last frontiers in the quest to understand and reveal the natural history of the continent Seeking the American Tropics tells the stories of the explorers and adventurers who for better and for worse helped open the unique environment of South Florida to the world Beginning with the arrival of Juan Ponce de Le n in 1513 James Kushlan describes how most of the famous Spanish explorers never made it to South Florida leaving the area's rich natural history out of scientific records for the next 250 years It wasn t until the British colonial and early American periods that the first surveyors were commissioned and the first naturalists Titian Peale and John James Audubon arrived to collect draw and report the subtropical flora and fauna that were so unique to North America Moving into the railroad era Kushlan illuminates the activities of scientists such as Henry Nehrling and Charles Torrey Simpson alongside the dabbling of wealthy amateur naturalists He follows the story to the 1920s when tourism was flourishing and signs of ecological damage were starting to show Years of wildlife trade resource extraction invasive species introduction and swamp drainage had taken their toll And many of the naturalists who had been outspoken about protecting South Florida's environment had also played a part in its destruction Today the region is among one of the most thoroughly studied places on the planet but at a cost In this absorbing and cautionary tale Kushlan illustrates how exploration has so often trumped conservation throughout history He exposes how much of the natural world we have already lost in this vivid portrait of the Florida of yesterday The Florida Historical Quarterly, 1990
