Illustrated with Coloured Plates** Maria Elizabeth JACKSON,1827 **Consumer Rites** Leigh Eric Schmidt,1995 Reexamining the story of holidays in the United States Leigh Schmidt shows that commercial appropriations of these occasions were actually as religious in form as they were secular The new rituals of America s holiday bazaar offered a luxuriant merger of the holy and the profane a heady blend of fashion and faith merchandising and gift giving profits and sentiments In this richly illustrated book that captures both the blessings and ballyhoo of American holiday observances from the mid eighteenth century through the twentieth the author offers a reassessment of the consumer rites that various social critics have long decried for their spiritual emptiness and banal sentimentality **The Annual American Catalog, 1900-1909** ,1907 Reproductive Ecology of Flowering Plants: A Manual K.R. Shivanna,Rajesh Tandon,2014-09-01 Successful reproduction is the basis not only for the stability of the species in their natural habitat but also for productivity of our crop plants Therefore knowledge on reproductive ecology of wild and cultivated plants is important for effective management of our dwindling biodiversity and for the sustainability and improvement of the yield in crop species Conservation and management of our plant diversity is going to be a major challenge in the coming decades particularly in the tropical countries which are rich in biodiversity Reproductive failure is the main driver for pushing a large number of tropical species to vulnerable category Available data on reproductive ecology on tropical species is very limited and there is an urgent need to initiate research on these lines A major limitation for the beginners to take up research is the absence of simple concise work manuals that provide step wise procedures to study all

aspects of reproductive ecology The Manual fills this void Over 60 protocols described in the manual cover the whole spectrum of reproductive ecology study sites and species phenology floral morphology and sexuality pollen and pistil biology pollination ecology breeding system seed biology seed dispersal and seedling recruitment Each chapter gives a concise conceptual account of the topic before describing the protocols The Manual caters to researchers teachers and students who are interested in any aspect of reproductive ecology of flowering plants botanists ecologists agri horticulturists foresters entomologists plant breeders and conservation biologists
