**Imagination and Fantasy in the Middle Ages and Early Modern Time** Albrecht Classen,2020-08-24 The notions of other peoples cultures and natural conditions have always been determined by the epistemology of imagination and fantasy providing much freedom and creativity and yet have also created much fear anxiety and horror In this regard the pre modern world demonstrates striking parallels with our own insofar as the projections of alterity might be different by degrees but they are fundamentally the same by content Dreams illusions projections concepts hopes utopias dystopias desires and emotional attachments are as specific and impactful as the physical environment This volume thus sheds important light on the various lenses used by people in the Middle Ages and the early modern age as to how they came to terms with their perceptions images and notions Previous scholarship focused heavily on the history of mentality and history of emotions whereas here the history of pre modern imagination and fantasy assumes center position Imaginary things are taken seriously because medieval and early modern writers and artists clearly reveal their great significance in their works and their daily lives This approach facilitates a new deep structure analysis of pre modern culture

**Tracing the Trails in the Medieval World** Albrecht Classen,2020-10-11 Every human being knows that we are walking through life following trails whether we are aware of them or not Medieval poets from the anonymous composer of Beowulf to Marie de France Hartmann von Aue Gottfried von Strassburg and Guillaume de Lorris to Petrarch and Heinrich Kaufringer predicated their works on the notion of the trail and elaborated on its epistemological function We can grasp here an essential concept that determines much of medieval and early modern European literature and philosophy addressing the direction which all protagonists pursue as powerfully illustrated also by the anonymous poets of Herzog Ernst and Sir Gawain

and the Green Knight Dante's *Divina Commedia* in fact proves to be one of the most explicit poetic manifestations of the fundamental idea of the trail but we find strong parallels also in powerful contemporary works such as Guillaume de Deguileville's *Plerinage de la vie humaine* and in many mystical tracts

**Gardens and Gardeners of the Ancient World** Linda Farrar, 2016-02-29 From the earliest of times people have sought to grow and nurture plants in a garden area *Gardens and Gardeners of the Ancient World* traces the beginning of gardening and garden history from Ancient Egypt and Mesopotamia to the Minoans and Mycenaeans Greeks Etruscans and Romans through Byzantine Islamic and Persian gardens right up to the Middle Ages It shows how gardens in each period were designed and cultivated Evidence for garden art and horticulture is gathered from surviving examples of ancient art literature archaeology actual period gardens that have survived the centuries and the wealth of garden myths associated with certain plants These sources bring ancient gardens and their gardeners back to life and provide information on which plants were chosen as garden worthy their setting and the design and appearance of ancient gardens Deities associated with aspects of gardens and the garden's fertility are featured everyone wanted a fertile garden Different forms of public and domestic gardens are explored and the features that you would find there whether paths pools arbors and arches seating or decorative sculpture The ideal garden could be like the Greek groves of the Academy in Athens a garden so fine that it was comparable with that of the mythical king Alcinoos the paradise contemplated by the Islamic world or a personal version of a garden of Eden that Early Christians could create for themselves or in the forecourt of their churches In general books on garden history cover all periods up to the present often placing all ancient gardens in one chapter at the beginning But there is so much of interest to be found in these early millennia Generously illustrated with 150 images with plant lists for each period this is essential reading for everyone interested in garden history and ancient societies

topic so that students and beginners can easily find their way to discussion of the themes and motifs they see before them when looking at a painting

Andrew Smith, 2014-09-18 Codex Alexandrinus is one of the three earliest surviving entire Greek Bibles and is an important fifth century witness to the Christian Scriptures yet no major analysis of the codex has been performed in over a century In *A Study of the Gospels in Codex Alexandrinus* W Andrew Smith delivers a fresh and highly detailed examination of the codex and its rich variety of features using codicology palaeography and statistical analysis Among the highlights of this study W Andrew Smith's work overturns the view that a single scribe was responsible for copying the canonical books of the New Testament and demonstrates that the orthographic patterns in the Gospels can no longer be used to argue for Egyptian provenance of the codex
