Peter Hayes and Kirk Smith (eds), *The Global Greenhouse Regime: Who Pays? Science, economics and North-South politics in the Climate Change Convention*. Tokyo: United Nations University Press; London: Earthscan, 1993. xv + 382pp. £24.95 paperback.

The Climate Change Convention agreed to in Rio de Janeiro in 1992 is still largely symbolic, and must be succeeded by protocols and firm abatement agreements yet to be negotiated. This book sets itself the ambitious task of providing a basis for negotiating such a protocol under Article 5 of the Convention which states 'that the developed countries ... shall take all practicable steps to promote, facilitate and finance, as appropriate, the transfer of, or access to, environmentally sound technologies and know-how to the developing countries to enable them to implement the provisions of the Convention'. The book discusses and develops: (i) measures to assess greenhouse gas emissions; (ii) criteria, involving accountability, equity and efficiency yardsticks for who should pay; (iii) North-South carbon marginal abatement cost curves; and (iv) transfer mechanisms and burden sharing arrangements. In doing so it thus provides a good part of the staff work for the initial substantive agenda for the political negotiations which should take place, regardless of the time span it may take to negotiate the relevant protocol under the Convention.

Measures of responsibilities for climate change include indices for levels of current emissions as well as of cumulative emissions. Radiative forcing of greenhouse gases (relative strength of gases) and atmospheric residence times (duration) together impact on climate change, and in choosing this measure, the main responsibility to pay necessarily falls on the developed countries. While carbon dioxide accounts for only half of the greenhouse gases and may be even less harmful than other gases, the information base is relatively better developed and the link with fossil fuel and energy planning is well established. Hence it is a suitable basis to start negotiating an international protocol. Attempts are made to develop marginal abatement cost curves, following the work of Nordhaus and the US National Academy of Science, which would indicate where abatement expenditures are most cost effective. Thus, the stage is set for an international funding mechanism and an allocation mechanism, involving three blocks of countries: the North, the South and the East, the formerly centrally planned economies of Eastern Europe and the CIS. In the final chapter, the type of problems to be encountered during the negotiating process are examined, and an attempt is made to try to draw some lessons from other international North-South negotiating ventures which have taken some decades. The book does not discuss as yet tradeable emissions for carbon dioxide abatement, though it suggests that there is scope for such a trade to develop in future as the developed countries may be hitting the sharply rising part of the marginal abatement cost curve shortly, while many developing countries may still be at the initial flat stage of the curves, where abatement will be most cost-effective on a global scale.

Any such ambitious international new transfer mechanism for greenhouse gas abatement is unlikely to come about until the paying regions are convinced that there is a coherent energy sector supply and demand policy in prospective recipient countries, to which the international community could provide assistance: otherwise, it would amount to committing money to a bottomless pit, which is not a sustainable basis for the transfer mechanism in the Climate Convention. In Part III of the book the results of six country/regional case studies are provided of greenhouse abatement strategy development. This generally requires the analysis of scenarios for the changing primary fuel generation mix, the pattern of energy consumption and an assessment of the possibilities and effectiveness of abatement strategies and measures in each of

Flexible Specialization Poul Pedersen, 1994 The book concludes that the potential for development through small and intermediate enterprises exists in many cases despite severe obstacles which have so far prevented development from taking place

Flexible Specialization Poul Ove Pedersen, Arni Sverrisson, Meine Pieter van Dijk, 1994 Discusses how the concept of flexible specialization and innovation networks could facilitate the development of small and medium enterprises in developing countries The book concludes that the potential for development through small and intermediate enterprises exists in many cases despite severe obstacles which have so far prevented development from taking place *Development of Small-scale Industries During the New Order Government in Indonesia* Tulus Tahi Hamonangan Tambunan, 2024-11-01 This title was first published in 2000 As in many other LDCs in Indonesia small scale industries SSIs are important particularly with respect to the creation of employment opportunities SSIs are expected to absorb many millions of workers who have been displaced by current economic crisis This work seeks to explain the pattern of development of SSIs in Indonesia within a broader theoretical framework It also deals with a number of SSI development related aspects that in Indonesia so far have never or rarely been studied such as the formation of strategic alliance cluster development and application of theories of flexible specialization to the LDCs The book also tries to examine empirically the effects of the current economic crisis and to assess theoretically the likely impact of the full implementation of the agreed IMF reform package on SSI development in the country Main problems faced by small producers and the government policy environment are highlighted through several detailed examples

Indonesia's Small Entrepreneurs Sarah Turner, 2013-12-19 In the context of Makassar on the eastern Indonesian island of Sulawesi the book explores the socioeconomic and cultural relationships that make life for small entrepreneurs in Makassar so distinctive Using a new framework for the study of small enterprises the small enterprise integrative framework this book gives us a greater understanding of the organization and operations of small enterprises in developing countries at both the micro and macro levels The application of this new framework for research reveals the diversity of labour flexibility networking and cluster styles amongst the enterprises studies and the constraints they face for growth Whilst the recent Southeast Asian economic crisis has been heralded by certain commentators as a new era for small enterprises in the region the book concludes that local realities for the small enterprises in Makassar mean that whilst for some it has been a time of shifting fortunes others have continued trading on the margins

Indian Industrial Clusters Keshab Das, 2017-05-15 This book presents an in depth analysis of the functional dynamics of Indian industrial clusters which have grown and stayed as hubs of business activity in India thanks to a large calibrated domestic market for goods The examples given contribute towards the understanding of theoretical underpinnings of small firm clusters in LDCs and also indicate steps towards effective policy making for SME development in general and local economic regeneration in LDCs in particular The industries studied include modern as well as traditional artisanal

sectors which span at least ten Indian states They provide insights into informality labour inter firm relationship cooperation and competition technological and organisational flexibility and forms of supportive institutional arrangements and nature of linkages with agencies external to the cluster among other things This book will be of particular interest to SME practitioners and to students and researchers of economics business management regional development economic geography industrial sociology and industrial organisation

Institutional

Adjustment for Economic Growth

Per Ronnas,Örjan Sjöberg,Maud Hemlin,2019-05-23 First published in 1998 this volume focuses on the special category of countries popularly referred to as transition economies through an analysis of small and medium sized enterprises SMEs and their role in Asian economies with a view to assessing whether they could or should provide a model for African countries The present volume explores the institutional peculiarities displayed by transition economies These are economies which are undergoing a comprehensive and fundamental societal transformation with a view to creating a utopian communist society within the frame of a centrally administered economy then a pluralistic society based on a market economy and the rule of law Much of the debate on the economic performance of African LCD s has focused on informal sector activities or on the imperative to achieve structural adjustment By highlighting instead the challenges facing two of the least successful among the African economies Ethiopia and Tanzania both of which share a socialist past this book moves beyond the above issues It argues that institutional adjustment is critical to the prospects for success in developing transition economies As such the book investigates the transaction costs environment within which small scale industrial

activities are set By drawing extensively on the Asian experience predominantly China and Vietnam but also India and Taiwan it identifies sources of transaction costs by examining not only the transactional disadvantages of small scale production but also the past and present sources of institutional inefficiency **Linking Local and Global Economies** Carlo Pietrobelli,Arni Sverrisson,2003-08-28 This new book contains contributions on countries from Italy and Mexico to China and India It recognises the disparity between conditions in these countries and poses interesting questions about post cluster globalisation **At the Interface** David B. Small,Nicola Beth Tannenbaum,1999 Co published with Society for Economic Anthropology SEA this volume takes a unique approach to the study of economics Rather than concentrating on a defined analytical unit it explores economics from the interface That is it examines the various kinds of relationships that can exist among and within economic units in a community and beyond The chapters treat the theme of the interface from four different perspectives intracommunity interfaces interfaces and the organization of communities extracommunity interfaces and the question of interfaces in archaeological investigations The authors address various topics related to household economy including the creation of different identities through shared labor the dialectical relationship between global forces and local producers in structuring economic contexts strategies that promote economic flexibility and environmental adaptation **Indian Entrepreneurship** Jay Mitra,2020-12-15 This book provides cutting edge insights into factors issues and instruments that foster entrepreneurship and innovation in its various guises in India the fastest growing economy in the world today India s future is predicated upon the capabilities of its people and organisations to identify and develop new products services types of organization and new forms of economic and social engagement with producers consumers institutions and her citizens The book addresses four critical factors people technology organisations and society It evaluates how Indian entrepreneurs utilise their range of key skills and entrepreneurial competencies in local and transnational environments It explores how software and technological development and the reorganisation of the public research infrastructure are leading to a transformation of our organisations and our capacity to develop new ones Further it examines the role of socially unity driven entrepreneurship and community based innovation centred round the arts and culture in urban and rural settings in promoting socially oriented transformation The book aims to offer a small but rich portfolio of India s unique entrepreneurial capabilities Development on the Ground Allen J. Scott,Gioacchino Garofoli,2007-05-14 Edited by two leading scholars who have been instrumental in the shaping of current thinking in the field of regional and industrial economics this volume brings together a range of theoretical and empirical contributions that analyze and explain distinct patterns of regional development and the successes and failures in this regard across the world A mixture of theoretical insights and empirical and comparative evidence it links these findings to on going policy debates that attempt to understand the success and failure of distinct regions through particular models of institutions and patterns of governance International in appeal and scope this book is an invaluable tool for students of all levels studying economics economic

geography regional development development studies international business international political economy development sociology and public administration Enterprise Clusters and Networks in Developing Countries Meine Pieter van Dijk, Roberta Rabellotti, 2005-07-05 This text analyzes the functions and advantages of clusters and networks for small enterprises in developing countries **Invisible Work, Invisible Workers** M. Leonard, 1998-10-07 The purpose of this book is to highlight contemporary changes in the world of work and employment by exploring the importance of the informal economy in Western Europe and the United States The book examines the myriad of ways in which individuals households and communities turn to informal economic activities in order to achieve some level of economic security in precarious economic environments Madeleine Leonard also illustrates the continued ambiguous nature of work and the ever changing boundaries between formal and informal economic activity **Local Economies in Turmoil** Arni Sverrisson, Meine Pieter Van Dijk, 2000-07-14 The main theme is how local economic cultures and economic networks in the South and in Eastern Europe are put under strain by global deregulation and how traditional and not so traditional but locally rooted structures of economic life adjust to deregulation or fail to do so All the contributions written by different authors combine a flexible specialization in clusters approach with original empirical data An Introduction and a concluding chapter by the editors brings out the common issues and conclusions *Small Firm Dynamism in East Asia* Farrukh Iqbal, Shujiro Urata, 2012-12-06 Indonesia experienced strong economic growth at greatest risk that too would be useful for strategy formulation purposes especially in cases in the 1970s with the help of high oil prices a where employment protection is an important period of stagnation in the 1980s when oil prices declined and another period of strong economic objective Finally to the extent that policies can growth after 1986 when substantial trade and alter the probability of success or failure in coping investment liberalization enabled a dramatic with shocks it would be useful to know which of policies is most effective and under what surge in labor intensive manufacturing export set production Recently the regional financial crisis conditions of 1997 1998 dealt Indonesia a severe shock The recent crisis in East Asia provides an from which it has not yet fully recovered How opportunity to examine the link between industrial structure and economic resilience The relative have its SMEs done through the twists and turns of the economy in the past quarter century impact of the crisis by size of firm can be judged Unfortunately the data needed to track the per in part by the effects on capacity utilization and formance of the SME sector are not as good for employment The table below summarizes some Indonesia as for many of the other countries in results from a survey sponsored by the World East Asia **Social Movements in Development** Staffan Lindberg, Arni Sverrisson, 2016-07-27 Nationalist movements in the South have been superseded by a plethora of different social movements This book examines these new movements and considers emerging paradigms of organization and mobilization which are related to the role movements play in economic and political development The book analyzes a number of cases and their context and discusses the implications for social movement theory The focus is on social movements among underprivileged

and middle class groups and the book is global in scope **Reader's Guide to the Social Sciences** Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense **Beyond the Regulation Approach** Bob Jessop,Ngai-Ling Sum,2006 Every now and then a book comes along that you positively want to be asked to read and review and this is one of them a major work of scholarship in its own right while at the same time a ground clearing exercise for what is to follow This it should be emphasized is a hugely impressive body of work an expansive statement of Jessop s contribution as a major figure within the world of regulation approaches Ray Hudson Economic Geography This book presents a detailed and critical account of the regulation approach in institutional and evolutionary economics Offering both a theoretical commentary and a range of empirical examples it identifies the successes and failures of the regulation approach as an explanatory theory and proposes new guidelines for its further development Although closely identified with heterodox French economists there are several schools of regulation theory and the approach has also been linked to many topics across the social sciences Bob Jessop and Ngai Ling Sum provide detailed criticisms of the various schools of the regulation approach and their empirical application and have developed new ways of integrating it into a more general critical exploration of contemporary capitalism The authors go on to describe how the regulation approach can be further developed as a progressive research paradigm in political economy Also presented is a detailed philosophical as well as theoretical critique of the regulation approach and its implications for the philosophy of social sciences and questions of historical analysis especially periodization Addressing the implications of the regulation approach for both the capitalist economy and the changing role of the state and governance this book will be of great interest to a wide ranging audience including institutional and evolutionary economists economic and political sociologists and social and political theorists

Small African Towns Poul Ove Pedersen,2019-07-23 First published in 1997 this study sees the small enterprise as performing specific tasks within the larger societal system of production and distribution and as being shaped and adapted to the specific social and economic locally specific environment of which it is a part Research was focused on fieldwork in Kenya Tanzania Uganda Zimbabwe and Bangladesh examining rural small towns serving rural hinterlands Areas explored include the building sector in Zimbabwean district service centres the building sector in small Tanzanian towns small enterprises and the public sector in Kenya and Bangladesh and the structure of small scale grain marketing in a small Ugandan town
