Greywolf Down Rusty Cash, 2018-06-21 Sean Murphy a former US Navy F 18 pilot was discharged for shooting down two Cuban Migs against orders over the Gulf of Mexico He then joined an international team of outlaw fighter pilots flying Mig 21s disguised as Cuban Air Force fighters Together they helped Cuba gain independence by bombing a key military installation during the Cuban civil war eliminating the Communist leadership Now a colonel in the new Cuban Air Force he and his teammates are at it again as they fly updated Mig 21 lancers on a mission to battle Chinese troops invading Mexico from a Chinese conquered Guatemala Seans team helps the Mexican Air Force destroy the Chinese Air Force and aids Guatemala in freeing itself from Chinese occupation Soft Computing for Problem Solving Manoj Thakur, Samar Agnihotri, Bharat Singh Rajpurohit, Millie Pant, Kusum Deep, Atulya K. Nagar, 2023-03-01 This book provides an insight into the 11th International Conference on Soft Computing for Problem Solving SocProS 2022 This international conference is a joint technical collaboration of the Soft Computing Research Society and the Indian Institute of Technology Mandi This book presents the latest achievements and innovations in the interdisciplinary areas of Soft Computing Machine Learning and Data Science It brings together the researchers engineers and practitioners to discuss thought provoking developments and challenges in order to select potential future directions It covers original research papers in the areas including but not limited to algorithms artificial neural network deep learning statistical methods genetic algorithm and particle swarm optimization and applications data mining and clustering computer vision medical and healthcare finance data envelopment analysis business and forecasting applications This book is beneficial for young as well as experienced researchers dealing across complex and intricate real world problems for which finding a solution by traditional methods is a difficult task

Greywolf Mary G. Montgomery, 2007-10 In a world of Vietnam psychedelics and the back to earth movement Maria VonSanden struggles with her own awkward identity She feels older than her peers yet at sixteen is still quite innocent when it comes to relationships In fact the opposite sex scares her until she meets Christopher an ordinary teacher or so he seems Underneath his cheerful outgoing personality lies a labyrinth of dark secrets that Maria is determined to discover Together they struggle to free themselves from the constraints of their culture and their personal lives uncovering hidden mysteries and a forbidden love that changes her life forever And his *Optimization Algorithms in Machine Learning* Debashish Das, Ali Safaa Sadiq, Seyedali Mirjalili, 2025-05-20 This book explores the development of several new learning algorithms that utilize recent optimization techniques and meta heuristics It addresses well known models such as particle swarm optimization genetic algorithm ant colony optimization evolutionary strategy population based incremental learning and grey wolf optimizer for training neural networks Additionally the book examines the challenges associated with these processes in detail This volume will serve as a valuable reference for individuals in both academia and industry *Wild Horses, Wild Wolves* Maureen Enns, 2013 Established in 1967 the Ghost River Wilderness Area located along the eastern slopes of the

Rocky Mountains in southern Alberta is one of only three provincially designated wilderness areas in the province. As such, it is supposed to have the strictest form of government protection available in Canada, with development, motorised transportation and recreational activities either tightly controlled or altogether forbidden. This has not been the case, however. Using a stunning combination of drawn and painted images, conventional and remote photography using hidden cameras activated by heat or motion, and traditional stories told by Peigan and Stoney Nakoda people, Enns invites the reader to join her as she untangles old myths regarding Alberta's heritage and reveals some uncomfortable realities facing the province in the 21st century. The wild horses, wolves, moose, deer and bears profiled in this book have had little contact with humankind. As communities, developers and governments struggle to understand the affects of conservation, recreation and development in sacred places, it is becoming more and more difficult to keep the wild in wild animals. This project is a passionate plea for understanding, conservation and action.

Proceedings of Data Analytics and Management Abhishek Swaroop, Bal Virdee, Sérgio Duarte Correia, Zdzislaw Polkowski, 2025-04-30. This book includes original unpublished contributions presented at the International Conference on Data Analytics and Management ICDAM 2024 held at London Metropolitan University, London, UK, during June 2024. The book covers the topics in data analytics, data management, big data, computational intelligence and communication networks. The book presents innovative work by leading academics, researchers and experts from industry, which is useful for young researchers and students. The book is divided into six volumes.

Encyclopedia of Television Film Directors Jerry Roberts, 2009-06-05. From live productions of the 1950s like *Requiem for a Heavyweight* to big budget mini-series like *Band of Brothers*, long form television programs have been helmed by some of the most creative and accomplished names in directing. *Encyclopedia of Television Film Directors* brings attention to the directors of these productions, citing every director of stand-alone long form television programs, made-for-TV movies, movie-length pilots, mini-series and feature-length anthology programs, as well as drama, comedy and musical specials of more than 60 minutes. Each of the nearly 2,000 entries provides a brief career sketch of the director, his or her notable works, awards and a filmography. Many entries also provide brief discussions of key shows, movies and other productions. Appendixes include Emmy Awards, DGA Awards and other accolades, as well as a list of anthology programs. A much-needed reference that celebrates these often neglected artists, *Encyclopedia of Television Film Directors* is an indispensable resource for anyone interested in the history of the medium.

Optimization Techniques in Engineering Anita Khosla, Prasenjit Chatterjee, Ikbal Ali, Dheeraj Joshi, 2023-04-26. OPTIMIZATION TECHNIQUES IN ENGINEERING. The book describes the basic components of an optimization problem along with the formulation of design problems as mathematical programming problems using an objective function that expresses the main aim of the model and how it is to be either minimized or maximized. Subsequently, the concept of optimization and its relevance towards an optimal solution in engineering applications is explained. This book aims to present some of the recent developments in the area of optimization theory.

methods and applications in engineering It focuses on the metaphor of the inspired system and how to configure and apply the various algorithms The book comprises 30 chapters and is organized into two parts Part I Soft Computing and Evolutionary Based Optimization and Part II Decision Science and Simulation Based Optimization which contains application based chapters Readers and users will find in the book An overview and brief background of optimization methods which are used very popularly in almost all applications of science engineering technology and mathematics An in depth treatment of contributions to optimal learning and optimizing engineering systems Maps out the relations between optimization and other mathematical topics and disciplines A problem solving approach and a large number of illustrative examples leading to a step by step formulation and solving of optimization problems Audience Researchers industry professionals academicians and doctoral scholars in major domains of engineering production thermal electrical industrial materials design computer engineering and natural sciences The book is also suitable for researchers and postgraduate students in mathematics applied mathematics and industrial mathematics

Advances in Intelligent Systems and Digital Applications Noreddine Gherabi, Janusz Kacprzyk, Sara Arezki, 2025-08-12 This book serves as a comprehensive reference providing cutting edge knowledge on intelligent systems and digital applications It covers theoretical foundations and significant issues in machine learning deep learning and data analytics Each chapter concludes with a detailed bibliography for further in depth reading Divided into two sections Foundations and Applications the book offers a complete source of information on its theme The chapters include concepts algorithms figures graphs and tables to enhance readability The target audience includes researchers practitioners and postgraduate and graduate students developing or utilizing artificial intelligence algorithms in various applications

Swarm Intelligence and Evolutionary Computation Georgios Kouziokas, 2023-03-07 The aim of this book is to present and analyse theoretical advances and also emerging practical applications of swarm and evolutionary intelligence It comprises nine chapters Chapter 1 provides a theoretical introduction of the computational optimization techniques regarding the gradient based methods such as steepest descent conjugate gradient newton and quasi Newton methods and also the non gradient methods such as genetic algorithm and swarm intelligence algorithms Chapter 2 discusses evolutionary computation techniques and genetic algorithm Swarm intelligence theory and particle swarm optimization algorithm are reviewed in Chapter 3 Also several variations of particle swarm optimization algorithm are analysed and explained such as Geometric PSO PSO with mutation Chaotic PSO with mutation multi objective PSO and Quantum mechanics based PSO algorithm Chapter 4 deals with two essential colony bio inspired algorithms Ant colony optimization ACO and Artificial bee colony ABC Chapter 5 presents and analyses Cuckoo search and Bat swarm algorithms and their latest variations In chapter 6 several other metaheuristic algorithms are discussed such as Firefly algorithm FA Harmony search HS Cat swarm optimization CSO and their improved algorithm modifications The latest Bio Inspired Swarm Algorithms are discussed in chapter 7 such as Grey Wolf Optimization GWO Algorithm Whale Optimization Algorithm WOA

Grasshopper Optimization Algorithm GOA and other algorithm variations such as binary and chaotic versions Chapter 8 presents machine learning applications of swarm and evolutionary algorithms Illustrative real world examples are presented with real datasets regarding neural network optimization and feature selection using genetic algorithm Geometric PSO Chaotic Harmony Search Chaotic Cuckoo Search and Evolutionary Algorithm and also crime forecasting using swarm optimized SVM In chapter 9 applications of swarm intelligence on deep long short term memory LSTM networks and Deep Convolutional Neural Networks CNNs are discussed including LSTM hyperparameter tuning and Covid19 diagnosis from chest X Ray images The aim of the book is to present and discuss several state of the art swarm intelligence and evolutionary algorithms together with their variances and also several illustrative applications on machine learning and deep learning

Multidimensional Signals Processing, AI Methods and Applications Lakhmi C. Jain, Roumiana Kountcheva, Wenfeng Wang, Srikanta Patnaik, 2025-02-18 This book contains new research works presented at the Third World Conference on Intelligent and 3D Technologies WCI3DT2024 organized by IRNet International Academic Communication Center held in Shanghai China during May 24-26, 2024 The main topics in this volume cover contemporary parts in the area of the multidimensional signal processing based on deep learning and related applications Special attention is given to neural networks which make up the backbone of deep learning algorithms and their improvement and research works aimed at the real time interaction with unmanned vehicles machine translation cloud computing personalized product recommendation model for autonomous robots power production monitoring and control optimization and acceleration of machine learning algorithms pattern recognition building crack detection and many others *100 Optimization Techniques* Subrata Pandey, 2023-02-23 100 optimization techniques is intended as a handbook for optimization techniques Optimization techniques and algorithms are methods used to find the most efficient solution to a problem Different techniques and algorithms may be used to solve a particular problem depending on the nature of the problem Researchers from varieties of domains are using optimization algorithms to solve problems in their domain Different optimization techniques have their pros and cons This book serves as a handbook for researchers who want to know about different optimization methods currently available and their operating principles One hundred optimization techniques are arranged in an alphabetical order Researchers and students who want to use different optimization techniques for solving their domain related problems will find this book helpful Computational Intelligence for Water and Environmental Sciences Omid Bozorg-Haddad, Babak Zolghadr-Asli, 2022-07-08 This book provides a comprehensive yet fresh perspective for the cutting edge CI oriented approaches in water resources planning and management The book takes a deep dive into topics like meta heuristic evolutionary optimization algorithms e.g. GA, PSO etc. data mining techniques e.g. SVM, ANN etc. probabilistic and Bayesian oriented frameworks fuzzy logic AI deep learning and expert systems These approaches provide a practical approach to understand and resolve complicated and intertwined real world problems that often imposed serious challenges to traditional
