*Complex Adaptive Leadership* Nick Obolensky, 2024-11-01 Since its publication *Complex Adaptive Leadership* has become a Gower bestseller that has been taught in corporate leadership programmes business schools and universities around the world to high acclaim In this updated paperback edition Nick Obolensky argues that leadership should not be something only exercised by nominated leaders It is a complex dynamic process involving all those engaged in a particular enterprise The theoretical background to this lies in complexity science and chaos theory spoken and written about in the context of leadership for the last 20 years but still little understood We all seem intuitively to know leadership isn't what it used to be but we still cling to old assumptions which look anachronistic in changing and challenging times Nick Obolensky has practised researched and taught leadership in the public private and voluntary sectors In this exciting book he brings together his knowledge of theory his own experience and the results of 19 years of research involving 2 500 executives in 40 countries around the world The main conclusion from that research is that the more complex things become the less traditional directive leadership is needed Those operating in the real world nonetheless need ways of coping The book is focused on helping practitioners struggling to interpret and react to increasingly VUCA Volatile Uncertain Complex Ambiguous times The book will particularly appeal to practitioners wishing to improve their leadership effectiveness as well as for students and researchers

in the field of leadership      Diversity Intelligence Claretha Hughes, 2023-06-17 This book develops and amplifies the emerging concept of diversity intelligence which is the capability of leaders to recognize the value of workplace diversity and to use this information to guide thinking and behavior Organization leaders need diversity intelligence to better interact with the changing demographics in the US and the global economy by embracing differences as strengths rather than weaknesses Without a clear understanding of diversity leaders are not fully equipped to realize organizational goals through all employees The author highlights the importance of reimagining diversity and changing perspectives while integrating it into leadership and career development plans alongside intellectual intelligence emotional intelligence and cultural intelligence In order to fully motivate diverse employees leaders must first be able to recognize differences between themselves and others without it being an obstacle to performance This edition addresses new topics related to allyship and anti racism and discusses how these concepts can sometimes hinder diversity efforts This book fits in the literature in areas of leadership and business value and aims to satisfy the need for solutions to why diversity training and management efforts continue to fall short of stated goals within organizations It is a window into how leaders can reflect on their actions and behaviors to effectively implement new diversity strategies and is an essential read for HR researchers professionals consultants and managers of global operating companies      Emergency Services Leadership Chris Nollette, Brent J.
