facing countless other obstacles With a historian's accuracy and a novelist's eye Tobin has captured an extraordinary moment in history To Conquer the Air is itself a heroic achievement **1990** Irina Prokhorova, Dr Arch Tait, 2013-03-28 Although 1989 and 1991 witnessed more spectacular events 1990 was a year of embryonic change in Russia Article 6 of the constitution was abolished and with it the Party's monopoly on political power This fascinating collection of documentary evidence crystallises the aspirations of the Russian people in the days before Communism finally fell It charts among many other social developments the appearance of new political parties and independent trade unions the rapid evolution of mass media the emergence of a new class of entrepreneurs a new openness about sex and pornography and a sudden craze for hot air ballooning banned under the Communist regime 1990 is a reminder of the confusion and aspirations of the year before Communism finally collapsed in Russia and a tantalising glimpse of the paths that may have been taken if Yeltsin's coup had not forced the issue in 1991 **Politics and Suicide** Nicholas Michelsen, 2015-10-08 Politics and Suicide argues that whilst the historical lineage of suicidal politics is recognised the fundamental significance of autodestruction to the political remains under examined It contends that practices like suicide bombing do not simply embody a strange or abnormal suicidal articulation of the political but rather that the existence of suicidal politics tells us something fundamental about the political as such and thinking about political violence more broadly Recent world events have emphatically shown our need for tools with which to develop better understandings of the politics of suicide Through the exploration of several arresting case studies including the Kamikaze bombers of World War Two Jan Palach's self immolation in 1969 Cold War nuclear deterrence and the suicide terrorist attacks of 9/11 Michelsen asks how we might talk of a political suicide in any of these contexts The book charts how political processes go suicidal and asks how we might still consider them to be political in such a case It investigates how suicide can function as politics A strong contribution to the fields of philosophy and international relations theory this work will also be of interest to students and scholars of political theory and terrorism political violence *Wilbur and Orville* Fred Howard, 2013-04-26 Definitive crisply written study tells the full story of the brothers' lives and work from their early childhood and initial fascination with flight the historic first flight at Kitty Hawk more [Taking Flight](#) Richard P. well argued case for the understanding of much prehistoric art as shamanistic practice Using the theoretical premises of cognitive archaeology and a careful examination of rock art worldwide Pearson is able to dismiss other theories of why ancient peoples produced art totemism art for art s sake structuralism hunting magic Then examining both ethnographic and neuropsychological evidence he makes a strong case for the use of shamanistic ritual and hallucinogenic substances as the genesis of much prehistoric art Bolstered with examples from contemporary cultures and archaeological sites around the world Pearson s thesis should be of interest not only to archaeologists but art historians psychologists cultural anthropologist and the general public WHISPERS OF THE EARTH: A JOURNEY THROUGH NATURE'S WONDERS PANKAYAR CHELVI

Maier,2023-08-08 This book is the first to identify an interpretive path through Paleolithic cave art that can provide plausible meaning to the animal figures in the Lascaux cave in France The artwork was created during a period described as the Creative Explosion spanning from 35 000 to 11 000 BC The author has found that the artists or shamans have left clear evidence of aspects of their worldview and by using ethological evidence such as a bison shedding its winter coat to identify spring as the season portrayed in a specific panel he adds a level of certainty to his interpretations In sum this book argues that the cave art describes the journey of the soul from the spirit world to the natural world and back and that it identifies a spectrum of consciousness involving the five traditional senses sight smell touch taste and hearing Moreover the book explores the hunting strategies employed early survival groups which are depicted in the cave art The role of the shamans impact on the artwork is also addressed
