1 Galactic nebulae are

- (a) always white in appearance
- (b) always dark in appearance.
- (c) either white or dark masses of dust and gases.
- (d) mainly stars which have burning gases around their outer edges.

Beyond the stars are the nebulae, which are like clouds or wisps of light, but not all the nebulae are thus immeasurably distant. Some are tangled with stars on this side of that great assemblage named the Milky Way.
