Fundamentals of Protein NMR Spectroscopy Gordon S. Rule, T. Kevin Hitchens, 2006-02-16 NMR spectroscopy has proven to be a powerful technique to study the structure and dynamics of biological macromolecules. *Fundamentals of Protein NMR Spectroscopy* is a comprehensive textbook that guides the reader from a basic understanding of the phenomenological properties of magnetic resonance to the application and interpretation of modern multi-dimensional NMR experiments on ¹⁵N ¹³C labeled proteins. Beginning with elementary quantum mechanics, a set of practical rules is presented and used to describe many commonly employed multi-dimensional multi-nuclear NMR pulse sequences. A modular analysis of NMR pulse sequence building blocks also provides a basis for understanding and developing novel pulse programs. This text not only covers topics from chemical shift assignment to protein structure refinement as well as the analysis of protein dynamics and chemical kinetics but also provides a practical guide to many aspects of modern spectrometer hardware, sample preparation, experimental set up and data processing. End of chapter exercises are included to emphasize important concepts. *Fundamentals of Protein NMR Spectroscopy* not only offers students a systematic in-depth understanding of modern NMR spectroscopy and its application to biomolecular systems but will also be a useful reference for the experienced investigator.

Mind and Body, 1934 **Designing with the Mind in Mind** Jeff Johnson, 2013-12-17 In this completely updated and revised edition of *Designing with the Mind in Mind*, Jeff Johnson provides you with just enough background in perceptual and cognitive psychology that user interface (UI) design guidelines make intuitive sense rather than being just a list of rules to follow. Early UI practitioners were trained in cognitive psychology and developed UI design rules based on it. But as the field has evolved since the first edition of this book, designers enter the field from many disciplines. Practitioners today have enough experience in UI design that they have been exposed to design rules but it is essential that they understand the psychology behind the rules in order to effectively apply them. In this new edition, you will find new chapters on human choice and decision making, hand-eye coordination and attention as well as new examples, figures and explanations throughout. Provides an essential source for user interface design rules and how, when and why to apply them. Arms designers with the science behind each design rule, allowing them to make informed decisions in projects and to explain those decisions to others. Equips readers with the knowledge to make educated tradeoffs between competing rules, project deadlines and budget pressures. Completely updated and revised, including additional coverage on human choice and decision making, hand-eye coordination and attention, and new mobile and touch screen examples throughout.

Sarah Myhill, 2018-04-25 Mitochondria are the powerhouses of our cells, essential for the production and management of energy at the cell level. Dr. Sarah Myhill has spent years studying the relationship between mitochondrial malfunction and one of the most common problems that lead people to the doctor's office: fatigue. In *Diagnosis and Treatment of Chronic Fatigue Syndrome and*

Myalgic Encephalitis Dr Myhill examines this essential role of our mitochondria in energy production and why it is key to understanding and overcoming Chronic Fatigue Syndrome CFS and the inflammation that often accompanies it Myalgic Encephalitis ME She explains the importance of healthy mitochondria how we can assess how well they are functioning what we can do to keep them healthy and how to restore them to health if problems arise Since publication of the first edition in 2014 new research and new clinical findings have shed further light on a condition that is debilitating to those who suffer from it but all in the head to many doctors The second edition of this groundbreaking book includes new insights and chapters on why CFS ME is the most poorly treated condition in Western medicine the role of the gut allergy and autoimmunity Lyme disease and other coinfections reprogramming the immune system reprogramming the brain and the roadmap to recovery
