Trauger,Brian Czech,2014-11-20 The proposed book focuses on one of the most important issues affecting humankind in this century Peak Oil or the declining availability of abundant cheap energy and its effects on our industrialized

economy and wildlife conservation Energy will be one of the defining issues of the 21st Century directly affecting wildlife conservation wherever energy extraction is a primary economic activity and indirectly through deepening economic recessions Since cheap abundant energy has been at the core of our industrial society and has resulted in the technological advancements we enjoy today the peak in world oil extraction would potentially have major impacts on civilization unless we prepare well in advance One potential economic solution covered in the book would be a Steady State Economy with a stable population and per capita consumption particularly in such industrialized countries as the United States Furthermore the lack of cheap abundant energy directly and indirectly affects conservation efforts by professional societies and federal and state agencies and NGOs concerned with wildlife issues We need to recognize these potential problems and prepare as much as possible for the consequences stemming from them Ecology ,1960 Publishes essays and articles that report and interpret the results of original scientific research in basic and applied ecology Assessment and Management of Plant Invasions James O. Luken, John W. Thieret, 2012-12-06 Biological invasion of native plant communities is a high priority problem in the field of environmental management Resource managers biologists and all those involved in plant communities must consider ecological interactions when assessing both the effects of plant invasion and the long term effects of management Sections of the book cover human perceptions of invading plants assessment of ecological interactions direct management and regulation and advocacy It also includes an appendix with descriptive data for many of the worst weeds
