Whitfield Gibbons, Michael E. Dorcas, 2004

Many people fear snakes and watersnakes in particular have one of the worst reputations of any snake found in North America. Some species are commonly mistaken for venomous cottonmouths and a few may eat popular game fishes. Unfortunately few people realize the important roles many watersnakes play in natural ecosystems and consequently they are still persecuted in many regions today. Seeking to overcome common misperceptions J Whitfield Gibbons and Michael E Dorcas have compiled *North American Watersnakes* the first comprehensive study of all fourteen species of watersnakes found in the United States, Canada, Mexico, and Cuba. Individual species accounts explore all aspects of the natural history of watersnakes in North America including their behavior, physiology, life history, ecology, and conservation. Almost 100 color photographs accompany the text illustrating all 14 species and nearly all subspecies. Supplementing the species accounts are detailed color maps depicting each species' distribution and stunning black and white drawings by Peri Mason. Easy to use keys help readers to identify specimens at hand.

**The New American Landscape** Thomas Christopher, 2011-04-20

Gardeners are the front line of defense in our struggle to tackle the problems of global warming, loss of habitat, water shortages, and shrinking biodiversity. In *The New American Landscape*, author and editor Thomas Christopher brings together the best thinkers on the topic of gardening sustainably and asks them to describe the future of the sustainable landscape. The discussion unfolds from there and what results is a collective vision as eloquent as it is diverse. *The New American Landscape* offers designers a roadmap to a beautiful garden that improves, not degrades, the environment. It's a provocative manifesto about the important role gardens play in creating a more sustainable future that no professional garden designer can afford to miss. John Greenlee and Neil Diboll on the new American meadow garden. Rick Darke on balancing natives and exotics in the garden. Doug Tallamy on landscapes that welcome wildlife. Eric Toensmeier on the sustainable edible garden. David Wolfe on gardening sustainably with a changing climate. Elaine Ingham on managing soil health. David Deardorff and Kathryn Wadsworth on sustainable pest solutions. Ed Snodgrass and Linda McIntyre on green roofs in the sustainable residential landscape. Thomas Christopher on waterwise gardens. Toby Hemenway on whole system garden design. The Sustainable Site Initiative on managing the home landscape as a sustainable site.
